Why a project like Prometeus is necessary?

The issue of mobility regarding education and training is a crucial element to make our territories more competitive.

During these last years, the programmes and initiatives on education and training co-financed by the European Union provide EU citizens tools and opportunities to perform learning and work experiences abroad.
The EU 2020 Strategy launched, among its flagship Initiatives, "Youth on the Move", to improve the quality and international attractiveness of higher education, promoting mobility among students and young workers.
However, to have access to the available EU funds and to implement effective mobility interventions it is necessary to set up specific technical knowledge that, not always, who is devoted to the promotion of such type of interventions has got.

The Leonardo da Vinci programme

The **Leonardo da Vinci Sectoral Programme**, part of the Lifelong Learning Programme 2007-2013, answers the education and training needs of all people involved in vocational education and training systems as well as of the institutions and sectoral organisations.

In particular, Leonardo da Vinci Multilateral Projects "Transfer of Innovation" aim to improve the quality and attractiveness of Vocational Education and Training, adapting, integrating and transferring existing innovations of previous Leonardo da Vinci projects or of any other national, European or international innovative projects into vocational training systems and organisations at national, regional, local or sector level.

What is it about?

Prometeus, initiative co-funded within the Life Long Learning European Program – Leonardo da vinci – promotes the diffusion and transfer of methods and competences necessary to draft qualitative mobility actions and projects.

Prometeus is addressed first to people working in the education and training system, to trainers, project managers who operate in post-school training contexts but also to public administrators, officers and organisations acting in the promotion of mobility exchange initiatives.

The methodology

Learning to effectively plan an action of transnational mobility requires a participatory approach able to reproduce the dynamics of negotiation and comparison among subjects who belong to very different cultural contexts and organisational identities.

Prometeus foresees a self-instruction courseware preliminary to Project Work Labs and tutoring actions for the development of at least 20 proposals of Mobility projects to submit by the deadline expected.

Prometeus promotes intense coaching and tutoring of the trainers and operators involved, so to assure an integrated training path, characterized by the alternation of theoretic learning, the updating of basic information, the simulated application of regulations and standards, a comparison with application forms and call for proposals, the activation of networks and real alliances, coaching and counselling, role playing and case discussion.

Project structure

Prometeus spreads over 24 months and involves 3 European Countries – Italy, France, Spain – with a specific attention to the peripherical areas and, sometimes, the territories lagging behind, where the high unemployment rates and the obstacles to enter the labour market can be faced through an overall strategy able to pooling information and experiences, to increase the quality of training and teaching, so to make students and young workers more competitive into the labour market.

Activites:

- **Updating the Courseware "To Plan Mobility Projects"**
  - Updating the training path by adapting it according to the new European political an strategical framework
  - Widening the network of direct and potential users of the training path
- **Updating platform and testing**
  - Updating and implementing the support platform to supply the contents
- **Local Awareness Seminars**
  - Encourage and launch the direct exchange among the participants, and set up their involvement in the project activities
- **Training "To Plan Mobility Projects"**
  - Access to the self-training path called "To plan Mobility projects"
- **To plan mobility projects : Laboratories of Project Work**
  - Arrangement of at least 20 mobility project applications and supporting measures of coaching and technical consulting
- **Transversal activities of dissemination, exploitation, monitoring and evaluation**
