Ce projet se penche sur ces questions dans 19 pays européens et à un niveau pan-européen.
Résumé:	This project will sustain a Thematic Network of organisations with shared concerns for the delivery of VET in archaeology, by - supporting close links between VET to working life in archaeology in order to make VET more responsive to labour market needs, and - improving sectoral identification and anticipation of skill needs and their integration in VET provision.
Description:	Partners will collect data from sectoral employers in their own state, identifying VET priorities, and will then present recommendations using this evidence to VET providers.
