Towards a European qualification for Solid Waste Facilities' Managers (Acronym SWFM-QF)

528022-LLP-1-2012-1-GR-LEONARDO-LMP

http://www.adam-europe.eu/adam/project/view.htm?prj=10049

Project Information

Title: Towards a European qualification for Solid Waste Facilities' Managers (Acronym SWFM-QF)

Project Number: 528022-LLP-1-2012-1-GR-LEONARDO-LMP

Year: 2012

Project Type: Development of Innovation

Status: running

Country: EU-Centralised Projects

Marketing Text: SWFM-QF aims at developing a European qualification and training framework to address the needs of Facilities Managers in the waste management industry and in line with the EU 2020 Flagship Agenda for New Skills and Jobs.
The core demand for this action stems from the fact that the "new generation" of waste management facilities are becoming highly technical worksites therefore affecting the structure of the required qualifications and the composition of the skills for the professionals in the sector.

Summary: The proposed project aims at developing a European qualification and training framework to address the needs of Facilities Managers in the waste management industry.
SWFM-Qf is in full agreement with the EUROPE 2020 Flagship Agenda for New Skills and Jobs. Specifically the project falls into the objectives of:
• Modernisation of labour markets to raise employment levels and trigger growth and
• Acquisition of new skills to enable workforce to adapt to new conditions such as technology advancements and legislation compliance in waste management sector.

Description: Despite the constant increasing need for technically skilled employees to maintain and operate the advanced waste treatment facilities, the qualifications and VET frameworks of Solid Waste Facilities Managers (SWFM) have a diversified structure within the EU states and they are not aligned with EQF and ECVET initiatives.
SWFM-QF intends to cover this gap by developing a common professional qualification and training framework in line with the directions of the EU policy. The outcome will be a range of standardized profiles suitable for the different levels of SWFM qualifications.
The main project products will be: national surveys on the NQFs and VETs regarding SWFMs; an EU Network of experts; a communication & Knowledge Exchange Platform; a comparative report on existing qualifications and VETs in the SWM industry in line with EQF and ECVET; a competence frame for professionals' profile in the SWM industry (EQF level 4-6); a training tool-kit for the implementation of a SWFM course (access criteria, requirements, curriculum, sources for training material); evaluation processes; dissemination activities; a 5-year Exploitation Plan.
The outputs of SWFM-QF will seek to facilitate the transnational mobility and to improve the labour quality in the waste management sector by delivering a transparent qualifications system in line to the requirements of the EU policy, which supports the recognition and transfer of qualifications and competences across the EU countries.

Themes:
*** Labor market
*** Sustainability
*** ICT
*** Lifelong learning
*** Open and distance learning
*** Ecology
** Enterprise, SME
** Equal opportunities
** Initial training

Sectors:
*** Water Supply; Sewerage, Waste Management and Remediation Activities
*** Human Health and Social Work Activities
** Professional, Scientific and Technical Activities

Product Types: others

Product 'Project Work Plan'

Title:	Project Work Plan
Product Type:	others
Marketing Text:	The Project Workplan will include critical path analysis, log of key interdependencies and the initial risk management plan that will help the effective planning, management, implementation, reporting and evaluation of the project.
Description:	PCU have developed a detailed work package plan describing all project tasks, activities, deliverables, assigning of responsibilities to partners for each one of them and setting the respective deadlines and objectives and criteria that have to be fulfilled. Additionally a Risk Management Plan was developed and integrated within the Work Package Plan. SWFM-QF work plan was concluded with a 15 days delay
Target group:	Members of the SWFM-QF consortium.
Result:	Effective planning, management, implementation, reporting and evaluation of the project.
Area of application:	
Homepage:	
Product Languages:	English

Product 'Interim / Final Reports'

Title:	Interim / Final Reports
Product Type:	others
Marketing Text:	Elaboration and submission of the project's Interim and Final Report according to the Grant Agreement and the specifications of the EACEA.
Description:	All deliverables were submitted in both hard copies and electronic format. All reporting formats for project level and commission level relating to project management were elaborated according to the EC guidelines
Target group:	Members of the consortium (including EACEA and Commission services and project reviewers)
Result:	Effective management, implementation, reporting and evaluation of the project.
Area of application:

Product 'Quality Handbook'

Title:	Quality Handbook
Product Type:	others
Marketing Text:	The purpose of this document is to define the structure of the project's Quality Management System, the tasks and responsibilities of the involved personnel and finally the procedures and guidelines which will be used by WP Leaders to ensure high standards of quality of the work produced.
Description:	The Quality Handbook include procedures like : - Communication between participants; - Documentation; - Production of reports and deliverables; - Review of the various types of deliverables and reports; - Internal Auditing; - Non conformities, corrective and preventive actions; - Dissemination; - Management Review of the results of the Quality Management internal audits and the corrective actions that were implemented in cases of divergences from the initial specs.
Target group:	Programme participants (including Commission services and project reviewers)
Result:	Efficient internal auditing. High standards of quality of the work produced.
Area of application:	
Homepage:	
Product Languages:	English

Product 'Interim and Final Quality Reports'

Title:	Interim and Final Quality Reports
Product Type:	others
Marketing Text:	An Interim and a Final Quality Reports were compiled in the context of the project's interim and final report respectively.
Description:	They include the results of the implemented measures for quality management and assurance from the project start to the overall project duration. The reports are available in printed format and also as PDF version for download via the network website. Interim Quality Report:http://www.swfm-qf.eu/main/?page_id=7303&lang=en Final Quality Report: http://www.swfm-qf.eu/main/?page_id=7309&lang=en

Product 'Project's Monitoring and Evaluation System'

Title:	Project's Monitoring and Evaluation System
Product Type:	others
Marketing Text:	The deliverable is a supportive tool to be used for the monitoring and evaluation of the project's execution. Time, cost and target's achievement will be tracked and assessed via the use of specific measurable indicators. These data will provide the necessary input for project evaluation and subsequent actions.
Description:	The Monitoring and Evaluation System consists of the following modules: - Gantt Chart, for the time monitoring of the Project execution - Matrix of the Project's Deliverables and Milestones (including scheduled and actual completion dates, calculation of probable delays, identification of responsibilities). - Project Evaluation Spreadsheet. The evaluation of the project will be implemented with a separate tool using a series of progress indicators. For each indicator, the target will be defined, and the realized quantity will be noted.
Target group:	Members of the SWFM-QF consortium. EACEA project officers.

Product 'Survey national reports on the qualifications of professionals in Solid Waste Management industry'

Title: Survey national reports on the qualifications of professionals in Solid Waste Management industry

Product Type: procedure for the analysis and prognosis of the vocational training requirement

Marketing Text: The survey focused on the assessment of the nature, content and regulation of qualifications for Managers in Solid Waste Management Industry in the eight EU countries which participate in the project (Greece, Germany, Italy, Hungary, UK, Poland, Lithuania and Bulgaria). The existing National Qualifications Frameworks (NQF) was identified. The complete range of knowledge, skills and competences were depicted. In the same survey the status of the industrial waste management labour market was examined, as well as the national legislation concerning the specific profession, the working conditions, the value of qualifications, the range of age of the professionals, and the status of Waste Management profession in industry and in society.

Description: Eight reports, one for each participating country, were prepared after the realisation of respective surveys on the qualifications, knowledge, skills, competences and labour status of Solid Waste Facilities Managers. Each survey was conducted via the distribution of more than 200 questionnaires to companies, vocational training institutes, and competent bodies. An original questionnaire was prepared in English by the Work Package Leader. The questionnaire was translated in the languages of all project partners by staff members in order to broaden the range of responders to the survey procedure. Finally, it was distributed 3736 questionnaires either in hardcopy format or electronically and received back 750 filled in questionaires.
The reports were prepared in English
http://www.swfm-qf.eu/main/?page_id=7314&lang=en

Target group: Companies, Industries, Vocational Training Institutes, Competent bodies related to Health and Safety issues (training included).

Result: Eight reports, one for each participating country, were prepared after the realisation of respective surveys on the qualifications, knowledge, skills, competences and labour status of Solid Waste Facilities Managers. Each survey was conducted via the distribution of more than 200 questionnaires to companies, vocational training institutes, and competent bodies. An original questionnaire was prepared in English by the Work Package Leader. The questionnaire was translated in the languages of all project partners by staff members in order to broaden the range of responders to the survey procedure.
The reports were prepared in English.

Area of application: The collected information will be used in WP-4 for the designation of the first version of a harmonised competence and training frame for the different levels of SWFM qualifications in line with the directions of the EU (EQF, ECVET) policy.

Product 'Survey national reports on the existing training procedures of professionals in Solid Waste Management industry'

Title:	Survey national reports on the existing training procedures of professionals in Solid Waste Management industry
Product Type:	procedure for the analysis and prognosis of the vocational training requirement
Marketing Text:	The survey assessed the existing national VET systems on the professions of Waste Management in industry. Any formal and informal training was taken into consideration. Information like the structure and content of the VET programmes, their cost, the possible source of financing, their learning outcomes and acquired knowledge were examined. The second survey was conducted at all partners' countries of the project (Greece, Germany, Italy, Hungary, UK, Poland, Lithuania and Bulgaria).
Description:	Eight reports, one for each participating country, were prepared after the realisation of respective surveys on the different national VET systems and training programmes regarding Solid Waste Facilities Managers. Each survey was conducted via the distribution of more than 200 questionnaires to companies, vocational training institutes, and competent bodies. An original questionnaire was prepared in English by the Work Package Leader. The questionnaire was translated in the languages of all project partners by staff members in order to broaden the range of responders to the survey procedure. The reports were prepared in English. http://www.swfm-qf.eu/main/?page_id=7319&lang=en
Target group:	Companies, Industries, Vocational Training Institutes, Competent bodies related to Health and Safety issues (training included).
Result:	The learning procedures, through which the identified qualifications of professionals in the Solid Waste Management Industry are acquired, will be mapped.
Area of application:	The collected information will be used in WP-4 for the designation of the first version of a harmonised competence and training frame for the different levels of SWFM qualifications in line with the directions of the EU (EQF, ECVET) policy.

Product 'Communication and Knowledge Exchange Tool'

Title: Communication and Knowledge Exchange Tool

Product Type: website

Marketing Text: SWFM-QF IT Platform (ITP) was developed as an on-line tool for internal communication, data store for documents, for reporting purposes, etc. ITP can be accessed via the project's website, through a single secure login. All SWFM-QF interested stakeholders may have access to all ITP specific contents, groups, and services from anywhere in the world with a web browser. Each service plays a vital role in delivering the value of online communities as well as communicating, sharing, and publishing many different types of information

Description: ITP serves as a tank of knowledge and information including good practices, innovative training procedures, training material sources, articles, national and European legislations, concerning the training needs and qualification profile professionals in the Waste Management industry.
SWFM-QF documents draft deliverables are initially created or uploaded in SWFM-QF ITP and then made available through the public SWFM-QF website. ITP articles are clustered in different categories depending their contents.
All partners agreed to continue to upload articles on solid waste management and training issues of professionals involved in this sector, during the overall duration of the SWFM-QF project and after its conclusion. It was acknowledged by project
partners that this is a good way to trigger the interest of project target groups and other interested stakeholders and also
motivate them to register to SWFM-QF international Network.
Other European (like CEDEFOP) and international competent bodies (like ISWA) will be asked to continue to add their work.
The IT platform was developed in English. Versions to the other project languages may be created by the involved staff based on the needs of their national networks.
http://www.swfm-qf.eu/main/?page_id=5818&lang=en

Target group: Public deliverable.

Result: Communication and dissemination of the project's deliverables and training material developed.
Evalaution of the proposed framework of the training needs and the qualification profile professionals in the Waste Management industry.

Area of application:

Homepage: http://www.swfm-qf.eu/main/?page_id=5818&lang=en

Product Languages: English

Product 'SWFM-QF Network'

Title: SWFM-QF Network

Product Type: website

Marketing Text: Within Work package 3, the project's network was established. All partners exploited the foreseen dissemination activities, i.e. informative workshops, informative material, project website and newsletters, in order to establish the project network of stakeholders. Initially, each partner established a national network. The eight national networks were merged into the construction of the project network in which members of a broader European range was included.

Description: A national network was created in each different participating country (Hellas, Germany, Italy, Hungary, Poland, Lithuania, Bulgaria and UK). The members of the eight networks originate mainly from all projects target groups. All eight national networks comprise the overall SWFM-QF Network. Network members had an active role in the projects activities (participation in informative events, final conference, evaluation of core project's deliverables, etc). Network members were considered as the main informational and dissemination points regarding project's activities, results and deliverables.
SWFM-QF Network members were considered both as receiptors and donors of projects activities, results and deliverables. The same stands for the foreseen projects exploitation activities. All project partners were looking for new members for the SWFM-QF Network during the overall project duration and will continue to do so after its conclusion. Currently SWFM-QF Network amounts 392 active members in 11 EU countries. Via SWFM-QF website, interested stakeholders can register to the SWFM Network and then have access and exploit all the projects results, outcomes, deliverables and the contents of the Knowledge Base.
http://www.swfm-qf.eu/main/?page_id=7329&lang=en

Target group: Direct beneficiaries like vocational training providers and potential learners; policy and decision makers; other stakeholders like local communities, industrial companies, and environmental organizations.

Result: Promotion of the project's activities and outputs to the members of the network. Additionally, they will be asked to participate to the on-line internal evaluation process for the validation of the project products.

Area of application:

Product 'Comparison report of the identified national qualifications and VET'

Title: Comparison report of the identified national qualifications and VET

Product Type: procedure for the analysis and prognosis of the vocational training requirement

Marketing Text: The aim of the current report is to enhance the comparability and transferability of the Solid Waste Facilities' Managers qualifications in the context of the implementation of the EQF.

Description: The aim of the comparison report is to enhance the comparability and transferability of the Solid Waste Facilities' Managers qualifications in the context of the implementation of the EQF.
The comparison report is based on the national reports and compares the qualifications of Solid Waste Facilities' Managers in the 8 countries studied on three key dimensions:
Governance, examining the different nature of the system of governance of qualifications and the different modes of VETs associated with them.
Education and Training, examining the preferred mode and length of each county's VET and the content of the respective VET programs (types of knowledge and scopes).
Labour Market, examining the value of qualifications/skills in each country's labour market, the status of Solid Waste Management in the occupation/sector/society, the activities that SWF' Managers carry out, the basis of the wage and employment conditions, and apprentices/ trainees for each country.
The report was created in English and translated in all languages of participating countries (Bulgarian, Hungarian, Italian, German, Greek, Polish and Lithuanian).
http://www.swfm-qf.eu/main/?page_id=7296&lang=en

Target group: Public deliverable.

Result: The identified qualifications will be related to the respective NQFs (where applicable). Additionally, the possibilities, means and problems will be assessed concerning the implementation of EQF/ ECVET and the defined occupational profile in relation to Solid Waste Management.

Area of application: The project leader will prepare a comparative report identifying and documenting common and different qualifications' demands and training needs, between the 8 countries.

Product 'Harmonised Competence Frame'

Title: Harmonised Competence Frame

Product Type: procedure for the analysis and prognosis of the vocational training requirement

Marketing Text: Based on the findings of the comparative assessment of qualifications, an integrated frame with detailed definition of expected knowledge, skills, and competences concerning the profile of Facilities Managers in the Solid Waste Management industry will be structured (expected at EQF levels 4-6).

Description: A harmonized qualification framework to fulfill the needs of for managers occupied in different types of solid waste management facilities, was fully developed. The identified qualifications are presented in the form of a matrix according to EQF level 6 knowledge, skills and competences descriptors, supporting to their recognition and adoption across the European Union countries.
The methodology used to compile the SWFM Harmonised Qualifications Framework was based on the methodology implemented for the development of a Professional Profile.
It is anticipated, the developed qualification frameworks to contribute to a wider understanding of the roles and responsibilities, activities and tasks of waste managers in managing effectively and sustainably different solid waste management facilities.
The harmonized qualification framework was created in English and translated in all languages of participating countries (Bulgarian, Hungarian, Italian, German, Greek, Polish and Lithuanian).
http://www.swfm-qf.eu/main/?page_id=7304&lang=en

Target group: Members of the SWFM-QF Network.

Result: The results will be presented in the form of a matrix according to EQF / ECVET Criteria (definition of qualification in terms of learning outcomes, mapping in onto the EQF via qualification frameworks, designing qualifications in transferable units of learning outcomes with allocation of credit points linking qualifications with related VET programmes for validation, transfer and recognition of learning outcomes achieved in formal, informal and non formal contexts.

Product 'Info - Training Toolkit'

Title: Info - Training Toolkit

Product Type: transparency and certification

Marketing Text: An Info - Training Toolkit will be developed in three phases steps for the SWFM's course implementation. The three phases will concern
a. the definition of access criteria for the implementation of the SWFM future course.
b. the creation of SWFM course requirements and curriculum. The curriculum will summarize the structure and contents of the training course whereas the qualification profile, the course's concept, the requirements for the trainers, participants and for the training facilities and infrastructures will be thoroughly defined.
c. the organisation of relative training – informative material.

Description: Based on the developed different, EQF level 6, qualifications modules the curriculum for the vocational training of Solid Waste Facilities' Manager is depicted in detail.
The courses concept and structure for each qualification module is analytically presented. Furthermore trainees' and trainers' requirements are described. Informative material that can be used for training is proposed.
Finally, a Multinational glossary of the relative technical terms used in different solid waste management technologies and facilities are presented.
The Info - Training Toolkit was created in English and translated in all languages of participating countries (Bulgarian, Hungarian, Italian, German, Greek, Polish and Lithuanian).
http://www.swfm-qf.eu/main/?page_id=7391&lang=en

Target group: Members of the SWFM-QF Network.

Result: All training material/ references will be uploaded at the project's IT platform and will be regularly updated.

Product 'Report based on the outcomes of internal evaluation'

Title: Report based on the outcomes of internal evaluation

Product Type: evaluation methods

Marketing Text: The development activities will be followed by a separate phase dedicated to the evaluation of i) the proposed competence frame of the EQF levels 4 – 6 and ii) the proposed curriculum of the training course and the respective training and informative material. The evaluation process will be implemented in two phases, an internal and an external evaluation.
The first phase, internal evaluation, will concern the evaluation of the competence frame and the proposals by the members of the SWFM-QF Network.

Description: The internal evaluation was realised via the Communication and Knowledge Exchange Tool by the members of the project Network. The outcomes of the evaluation, including the results of the on-line questionnaire and the forum discussions were depicted on a report that was produced by the Work Package Leader. The questionnaire was available on the IT Platform in English, Greek, German, Italian, Hungarian, Polish, Lithuanian and Bulgarian. The results of the procedure were translated by the staff members in English and the report of results were developed in English as well.
http://www.swfm-qf.eu/main/?page_id=7339&lang=en

Target group: Members of the SWFM-QF Network.

Result: Regarding the proposed framework of Solid Waste Facilities' Manager at EQF levels 4 - 6, the questionnaire will mainly assess the integrity of the proposed knowledge, skills and competences' and the extent of their conformity with the EQF level, the value of the learning outcomes, and the adequacy of the learning units. Regarding the agreement proposals, the questionnaire will seek to assess their impact to the mobility and quality of professionals in the Solid Waste Management industry across Europe.

Product 'Reports on the outcomes of external evaluation'

Title: Reports on the outcomes of external evaluation

Product Type: evaluation methods

Marketing Text: The second phase of the evaluation will involve external evaluators for the assessment of the aforementioned products of Work Package 4. At least two experts per country are expected to be appointed. The selection of experts will be realised in each country in cooperation and in line with the Life Long Learning national authorities. The evaluators will be highly experienced in vocational training sector with special knowledge of the Solid Waste Management industry.

Description: In each participating country two external experts were appointed for the evaluation of the proposed competence framework, the proposed training course curriculum and the training material that was prepared under WP4. The external experts came from the vocational training and the solid waste management industry sector. The project partners selected the external experts in close cooperation with the national Life Long Learning authorities of each country. A common template for the reports' compilation was prepared and provided by the Work Package Leader to the external evaluators. The reports entailed a rigorous analysis of the proposed products and resulted into suggestions for certain modifications. The reports were produced in English.
http://www.swfm-qf.eu/main/?page_id=7341&lang=en

Target group: Members of the SWFM-QF Network.
Public Deliverable.

Result: Each evaluator will produce one report with remarks and suggestions over the content of the Competence Framework, the proposed training course curriculum and the training material. The outcomes of the evaluation procedure, including conclusions and suggestions stemming from the forum discussions, the questionnaire results and the external experts reports will be examined and taken into account for the fine-tuning of the products.
No of reports: 16

Product 'Communication and Dissemination Handbook'

Title: Communication and Dissemination Handbook

Product Type: distribution methods

Marketing Text: After the approval of the project, a detailed Communication and Dissemination Plan (CDP) will be compiled. The plan will be based on the project's targets' groups, end users' needs, considering simultaneously the waste management sectors they are activated in. The CDP will explain, in an analytical way, the project partners' roles and responsibilities, the time framework (start, end dates) and the allocated budget for each activity. The impact of valorisation activities to the different types of target groups will be monitored and further evaluated. Monitoring parameters (i.e. questionnaires, numbers of participants) will be determined for each valorisation activity. Collected data will be assessed and the results will be integrated in the project interim and final report. In case, that deviations are observed from the set objectives then corrective actions will be recommended to all partners to ensure optimal valorisation of project results.

Description: The purpose of this document is to define the proper Dissemination and Communication Strategy ensuring maximum impact of the project during its life span and sustainable benefits after the project is ended. The Handbook deals with items like strategic objectives of the dissemination plan, project results, users/interested sectors who will benefit from the project's results, internal and external communication methods and mechanisms, content and instruments of dissemination, activities' timetable, tasks and partners' responsibilities, resources (people and budget) required, EU regulations and logos applied, languages in which the products will be developed, project logo, contact persons, etc.
The contents and the material were approved by the Steering Committee of the project. A procedure for regular revisions was also included.
The document was developed in English and is available in PDF version for download from the project website.
http://www.swfm-qf.eu/main/?page_id=7346&lang=en

Target group: Direct Beneficiaries, Policy and Decision Makers and other stakeholders.

Result: The purpose of this document is to define the proper Dissemination and Communication Strategy ensuring maximum impact of the project during its life span and sustainable benefits after the project is ended.

Product 'Project Web-site'

Title: Project Web-site

Product Type: website

Marketing Text:

Description: Project web-site was initially launched in English language, but now its main parts are translated and are available in the languages of all the other participating countries (GR, DE, IT, HU, PL, LT, BG), too. All project results and deliverables can be accessed via the project's website. SWFM-QF project description and objectives, partners profile, contact details, calendar of events, announcement of meetings, workshops, links to other relevant EU projects, download area, collection of the frequently asked questions etc) and, of course, a direct link to the Solid Waste Facilities Managers' Qualifications and details for the their vocational training (included in the Info-Training Toolkit).
http://www.swfm-qf.eu/main/?page_id=7353&lang=en

Target group: All interested parties

Result: Via SWFM-QF website visitors can register to the SWFM Network and exploit all the projects results, outcomes, deliverables and the contents of the Knowledge Base. Additionally subscription services for SWFM-QF e-Newsletter. All projects activities are published in SWFM-QF website in order to provide visibility and transparency to the public. The SWFM-QF website will remain active for the next 5 years (at least)) on the abovementioned address http://www.swfm-qf.eu and is going to be updated with the foreseen project's exploitation activities. It will also remain the main communication tool for the SWFM-QF Network members

Product 'Informative Leaflets'

Title: Informative Leaflets

Product Type: others

Marketing Text: Two informative three-folded leaflets, one introductory and one describing the project's core results dliverables were compiled, printed and distributed. Both leaflets were and will be further distributed to informative events that SWFM-QF partners will participate according the project's foreseen exploitation activities. 4000 informative leaflets were issued in all 8 EU countries and almost all were distributed

Description: Two informative three-folded leaflets were created. A "start-up" (first) leaflet was prepared in view of the informative workshops at the beginning of the project. The leaflet presented the project structure, objectives, targeted results and activities. The second one was prepared towards the end of the project and in view of the final conference. The leaflet presented the core results and deliverables that had been reached by the project.
The initial version of the leaflets was English and translated in all languages of participating countries (Bulgarian, Hungarian, Italian, German, Greek, Polish and Lithuanian).
http://www.swfm-qf.eu/main/?page_id=7059&lang=en

Target group: All interested parties. Members of the SWFM-QF network.

Product 'Exploitation Plan Handbook'

Title: Exploitation Plan Handbook

Product Type: others

Marketing Text: One of the main aims of SWFM-QF will be to ensure the effective transfer and the sustainable use of the project's results as well as the sustainable enlargement of the project network during and after the project span. Exploitation activities will include both mainstreaming actions to stakeholders and identified decision-makers and multiplication actions of the project's results.

Description: The main goal of the current Exploitation Plan is to serve as an on-going, concise work plan for setting out the main exploitation aspects of the SWFM-QF project and to establish suitable actions to make SWFM-QF a successful and sustainable project for a long period.
The Exploitation Plan Handbook identifies the exploitable results of the project in terms of products, experiences, policy lessons and European cooperation and describes the strategy to exploit these products at European, national and regional levels. The exploitation addresses both mainstreaming actions, taking advantage of the participation of the project's partners to networks and links to public authorities and lifelong learning decision makers, and multiplication exploiting the establishment of the SWFM-QF Network. The monitoring of the exploitation activities will follow an approach similar to the monitoring of the dissemination activities.
http://www.swfm-qf.eu/main/?page_id=9528&lang=en

Target group: SWFM-QF partners have already identified and included in the project target groups other VET and waste management policy makers that can be interested to projects' results. Indicative exploitation activities include:
•National and European developers of Vocational Qualifications and Frameworks and respective Accreditation Organisations will be informed for the methodology adopted for the development of the Waste Facilities' Manager European Qualification and Training Framework.
•Industrial and Waste Management Associations may collaborate with VET providers, to develop and certify training modules, based on project's training guide, to satisfy their members' personnel and other workers vocational needs and professional evolution. The same stands for Environmental competent authorities at different administrational levels, according the respective requirements of the new Waste Framework Directive.

Result: Stable frameworks of cooperation throughout the life-cycle of the project as well as the continuing use of the project's results after the project end.

SWFM-QF Technical Meeting

Date	24.02.2014
Description	During the 24th and 25th of February 2014 a Technical meeting was held in Reggio Emilia, Italy. It was successfully organized by the Sinergie Soc. Cons. a r.l.. Main purpose of this technical meeting was to involve Partners to comprehend what we had to do till end of July 2014- end of the Evaluation process and to finalise the Harmonised Qualifications Framework – EQF alignment and credit points allocation. http://www.swfm-qf.eu/main/?p=8664&lang=en
Target audience	Members of the SWFM-QF Steering Committee
Public	Closed event
Contact Information	Dr. Lefteris Karagiannidis and Themistoklis Kasampalis: L.Karagiannidis@sigmaconsultants.gr - t.kasampalis@sigmaconsultants.gr - info@swfm-qf.eu
Time and place	24th and 25th of February 2014, Reggio Emilia, Italy

Informative workshop (F-BB, SBG-DD)

Date	26.11.2013
Description	On the 26th of November 2013 the informative workshop for the dissemination of the project "Towards a European qualification for Solid Waste Facilities' Managers – SWFM-QF" funded in the framework of Lifelong Learning Programme under the action of LEONARDO DA VINCI Multilateral Projects for Development of innovation (Grant Agreement reference no 2012-3351/001-001 signed on 12/09/2012) was held in Dresden, Germany. At the workshop managers of branch associations, SME and multinational firms from public and private owned waste management companies were present to discuss i.e. about the challenges of a stronger working task oriented development in the field of first and further education. During the meeting the results of the comparison report were discussed, especially with regard to the current state and challenges of the German waste management industry. This provided a very fruitful basis for the discussion of typical working tasks in the waste management industry. For this different working groups were formed. The workshop was attended by more than 25 stakeholders from top and middle level management (corporate level and human resources) as well as trainers. http://www.swfm-qf.eu/main/?p=7284&lang=en
Target audience	All interested parties and stakeholders
Public	Event is open to the public
Contact Information	Dr. Lefteris Karagiannidis and Themistoklis Kasampalis: L.Karagiannidis@sigmaconsultants.gr - t.kasampalis@sigmaconsultants.gr - info@swfm-qf.eu

Informative workshop (ICERMS)

Date	13.11.2013
Description	ICERMS took the opportunity and jointly hosted an information workshop for the dissemination of the project "Towards a European qualification for Solid Waste Facilities' Managers – SWFM-QF" with key sector stakeholders in Scotland and Northern Ireland and in this regard the workshop was organised with the assistance of and in partnership with both the Scottish Qualification Authority and the UK Waste Management Industry Training and Advisory Board. The workshop was arranged for Wednesday 13th November 2013 at the Huntingtower Hotel in Perth, Central Scotland. The participants were drawn from the VET sectors in both Scotland and Northern Ireland from where all the VET centres for the waste industry sent representatives to the event. The event itself was attended by 30 delegates and the presentation on the project was well received and created a decent amount of discussion. This was mainly centred around the ramifications for the UK VET system in the context of the project. The delegates were encouraged to register at project website and to participate in the virtual network. Guidance on this process was contained on the delegate packs. In conclusion this was an extremely useful event and it hopefully will result in more registrations at the project web for network participation. It is clear however that a second event would be needed in England to ensure that the project truly had undertaken a national awareness raising agenda in the UK. http://www.swfm-qf.eu/main/?p=7157&lang=en
Target audience	All interested parties and stakeholders
Public	Event is open to the public
Contact Information	Dr. Lefteris Karagiannidis and Themistoklis Kasampalis: L.Karagiannidis@sigmaconsultants.gr - t.kasampalis@sigmaconsultants.gr - info@swfm-qf.eu

Informative workshop (SINERGIE)

Date	27.09.2013
Description	Many ideas and suggestions emerged during the workshop "New skills for new jobs: towards a European qualification in waste management sector", organised within the event "Ravenna2013", in order to analyse possible connections between emerging needs and current competences in the waste sector in "Sala Verde – camera di commercio di Ravenna" in Ravenna on 27th of September 2013. First of all the importance of an integrated approach between environment, quality, health and safety, combined with advanced planning procedures, whose implementation is expected in particular from public bodies. The system changes very quickly while the law takes a lot of time to evolve, so the economy must be considered as the first driver for the waste system in the decision-making process. Waste recycling can have positive impacts on the social, environmental and economic spheres however the significant revenues in this sector contributed also to the development of illicit trafficking by criminal organisations. It is therefore necessary to strengthen the legal regulation concerning environmental violation and crimes and to promote the recovery of waste, still hampered by those who see the recovery as a loss of income. Waste are finally a social question: illicit waste management causes environmental and sanitary problems, therefore it is important to start considering sanitary implications not only during the planning and management processes (collection, recovery, plants construction,..) but also in the design of the facilities. http://www.swfm-qf.eu/main/?p=6984&lang=en

Informative workshop (BIA)

Date	26.09.2013
Description	On the 26th September 2013 the informative workshop for the dissemination of the project "Towards a European qualification for Solid Waste Facilities' Managers – SWFM-QF" funded in the framework of Lifelong Learning Programme under the action of LEONARDO DA VINCI Multilateral Projects for Development of innovation. (Grant Agreement reference no 2012-3351/001-001 signed on 12/09/2012) was held in Bulgarian Industrial Association. This new Leonardo Da Vinci project will provide a mechanism through which waste management vocational training awards will be benchmarked across Europe taking cognisance of the different stages of evolution in the diversity of EU member states relative to vocational training in the waste management industry. During the workshop BIA experts presented the project and the results achieved so far. The results from the 2 national surveys and the results from the already developed Comparison report were presented to the stakeholders. The current situation in the waste management industry was discussed and was agreed that there is lack of available training programs in the field. The need for professional education in the field was realised and the invited stakeholders declared their full support for the project. Additionally, leading experts from the Ministry of Environment and Water in Bulgaria presented some crucial knowledge connected to waste management. http://www.swfm-qf.eu/main/?p=7008&lang=en
