Projektinformationen

Titel:	Berufsbildung im Programm Community Mental Health
Projektnummer:	UK/10/LLP-LdV/TOI-391
Jahr:	2010
Projekttyp:	Innovationstransfer
Status:	abgeschlossen
Land:	UK-Vereinigtes Königreich
Marketing Text:	Wir nahmen den UK Primary Care Graduate Mental Health Worker Programm und Plymouth Gedankenauge OCN akkreditierten Level 3 Kurs in der psychischen Gesundheit, um eine neue Ebene 3 berufliche Auszeichnung in Slowenien, Griechenland, Polen und Litauen zu schaffen. Dies wurde der UK City & Guilds Level 3 Award in Community Mental Health Arbeit abgebildet. Der Transfer und die Anpassung März 2011 fertiggestellt und an 156 Auszubildende in der EU. Die flexible Ausbildung in allen Partnerländern akkreditiert. Http://cmht.plymouthmind.com: Evaluation Ergebnisse und Mental Health Training Toolkit wurden auf der Konferenz in Litauen im Oktober 2012 und zum Download zur Verfügung stellte Alle Lernergebnisse European Qualification Framework (EQF) Stufe 3 zugeordnet. In Polen war es notwendig, auf Stufe 6, weil der Ausbildung Level-Anforderungen für Sozialarbeiter abzubilden. Der EQR finden Sie unter: http://cmht.plymouthmind.com/category/training-resources/eqf/
Zusammenfassung:	The World Health Organisation stated: “Primary care mental health services in Europe are under-developed with long waiting times to receive treatment in the community, resulting in significant costs to individuals, communities and economies. This lack of capacity is associated with insufficient numbers of trained workers with appropriate mental health skills.” The Mental Health Action Plan for Europe recommended that priority be given to the development of new education and training initiatives; an example of which is the Primary Care Graduate Mental Health Worker role, which demonstrated that trainees without prior mental health experience could be quickly trained to enhance primary care mental health services. Aims were: to adapt the Primary Care Graduate Mental Health Worker Programme (PCGMHWP) so as to provide a new, non-tertiary vocational programme to train community mental health workers. This would increase the scope and range of mental health training and help to build capacity in primary care mental health in the United Kingdom, Poland, Slovenia, Lithuania and Greece as a model for other EU countries to explore. Objectives were: To develop, accredit and evaluate a new, level three vocational programme to train 20 community mental health workers in each partner country. Consortium: comprised a leading UK mental health charity, two Higher Education establishments (UK and Poland), two not-for-profit social care organisations (Slovenia and Lithuania) and the Mental Health Centre (Agrinio Hospital) in Greece. This diverse partnership had significant experience in teaching, service delivery and development and research in the field of mental health and social care. Outputs: level three vocational programme to train community mental health workers, with a common 10 Essential Shared Capabilities (ESC) framework in each country mapped to EQF level 3; Evaluation report; Mental Health Training Toolkit. Outcomes: An increase in primary care mental health capacity; interventions for low to moderate mental health problems to facilitate recovery, both mental and economical (eg reduction of work absences through stress). Impact: The project provided a flexible training programme template for those wishing ti implement their own community mental health worker training programmes, based on the 10 ESCs. The community mental health training toolkit, incorporating this flexible framework, is now publicly available on the project web site.
Beschreibung:	The project was split into 3 phases - development, pilot delivery and dissemination. The development and transfer of the UK product to the partners was completed in March 2011, followed by 12 months of pilot training delivery to 20 staff/students/volunteers in each country. The dissemination process spanned the

Produktinformation: We adapted the Primary Care Graduate Mental Health Worker Programme to develop a level 3, community mental health training programme flexible enough to meet diverse, local community training needs. The programme is characterised by shared goals and outcomes based on the widely established 10 Essential Capabilities for Mental Health and a quality control was set up to achieve parity in levels of training that are transparent so as to allow mapping onto EU mental health competency frameworks. This was agreed by partners at the preparatory meeting (Ljubljana - Jan 2010) and formed the basis of the Transfer of Innovation. The programme was formally adopted by partners at the partnership meeting in Agrinio, Greece, March 2011.
Our training aims were to: produce a community mental health training programme to: promote positive mental health and awareness of the importance of addressing mental health issues; strengthen information available to patients about mental health; improve knowledge held within GP practices about the network of community resources available for people with mental health problems; promote wider community networking and liaison; support the delivery of brief, CBT-based interventions and self-help interventions for people with common mental disorders of all ages.
Training content embraced assessment, problem-formulation and treatment; knowledge of common mental health problems; planning care; record keeping and confidentiality; recovery; pharmaceutical interventions; planning and executing project work; IT skills. The 10 Essential Capabilities were embedded as a baseline for safe and effective practice. This framework embraces Working in Partnership; Respecting Diversity; Practising Ethically; Challenging Inequality; Promoting Recovery; Identifying People's Needs and Strengths; Providing Service User-Centred Care; Making a Difference; Promoting Safety and Positive Risk Taking; Personal Development and Learning.
To maximise flexibility the training model employed Learning Contracts, Work-Based Learning Projects, Portfolios of Learning or Individual Learning Plans. The Learning Contracts (Individual Learning Plans) were used to identify learning goals, practice experience and education needs. The Work-Based Learning Projects allowed knowledge and skills to be acquired within a framework that also allowed projects to be tailored to local need. The Portfolio of Learning was used to document evidence of personal learning and practice experience in the form of a reflective journal.
These three tools were used to accredit the learning. Responsibility for 'safe-practice' rested with the student's supervisor who was to provide a 'Statement of competence' if the student or trainee was deemed fit to be awarded a Community Mental Health Training Certificate, upon completion of the training in 2012.
All activity on the project was captured in the form of a mental health training toolkit now published as a guide for public use in the EU as a whole

Produkte

1 Community Mental Health Work Training Programme

Produkt 'Community Mental Health Work Training Programme'

Titel: Community Mental Health Work Training Programme

Produkttyp: Module

Marketing Text: Level 3 community mental health work training programme.

Beschreibung: Ergebnis 1: Level 3 Accredited Vocational Training Programme
Ergebnis 2: Community Mental Health Training Toolkit
Ergebnis 3: Internationale Konferenz in Siauliai, Litauen
Ergebnis 4: Project Evaluation Report
Ergebnis 5: Website
Ergebnis 6: Flexible Akkreditierung Rahmenprogramm
Es ist wichtig, hier zu sagen, dass die Ergebnisse # 1 # 2 und # 6 sehr vernetzt wurde im Laufe des Projekts. Zum Zeitpunkt der Antragstellung, der Plan für 3 verschiedene "Ergebnisse", aber die Praxis war, mit der Forderung nach verschiedenen Akkreditierungsstellen in Europa gerecht zu werden, nicht nur auf der Ebene 3, sondern auch auf der Stufe 6 auf der European Qualification Framework, wurden diese 3 Ergebnisse am besten beschrieben innerhalb der Community Mental Health Training Toolkit sich.
Alle Informationen und Materialien im Zusammenhang mit den oben genannten Produkt Ergebnisse können auf der Website des Projekts (Ergebnis # 5) am http://cmht.plymouthmind.com gefunden werden

Zielgruppe: Organisationen, die berufliche Community Mental Health Arbeit Ausbildung, um die Kapazität in gemeindenahen psychosozialen Unterstützung bauen zu liefern.

Resultat: Wir passten die Primary Care Graduate Mental Health Worker Programm innerhalb eines flexiblen Rahmens lieferbar sowohl Level 3 und Level 6 berufliche Auszeichnungen. Die Ausbildung umfasst 10 Module: 5 Pflicht-und 5 nicht obligatorisch. Flexibilität wird in der Ausbildung, so daß unterschiedliche geführtes Lernen Stunden unterzubringen, in einem Modul eingebaut, je nach den Bedürfnissen der verschiedenen Land Akkreditierungsstellen.

Die Internationale Konferenz fand im September 2012 und Präsentationen auf der Website des Projekts veröffentlicht.

Anwendungsbereich: Gemeindenahe psychosoziale Unterstützung - Arbeiten based training.
