Nouvelles normes européennes dans le cadre de la politique agricole commune réformée de l'UE

2012-1-SK1-LEO05-04199

http://www.adam-europe.eu/adam/project/view.htm?prj=10165

Information sur le projet

Titre:	Nouvelles normes européennes dans le cadre de la politique agricole commune réformée de l'UE
Code Projet:	2012-1-SK1-LEO05-04199
Année:	2012
Type de Projet:	Projets de transfert d'innovation
Statut:	Clôturé
Pays:	SK-Slovaquie
Accroche marketing:	Le projet vise à créer un programme de formation en ligne pour les acteurs du monde rural en leur fournissant des informations complexes dans le domaine de la nouvelle réforme de la Politique agricole commune.
Résumé:	Nouvelle période de programmation 2014 - 2020 apportera des changements importants au sein de la Politique agricole commune (PAC) (basé sur deux piliers) qui aura un impact sérieux sur l'économie en particulier des plus grands bénéficiaires. Le plafonnement des paiements directs se traduira par une réduction des paiements pour de larges bénéficiaires parce qu'ils, en raison d'une économie de taille, ne nécessitent pas le même niveau de soutien pour atteindre les objectifs de revenus et être efficacement réalisé. Un système pour les grands bénéficiaires sera introduit où le niveau de soutien est progressivement réduit et finalement plafonné pou améliorer la répartition des paiements entre les agriculteurs. Ce système devrait cependant tenir compte de l'intensité de main-d'œuvre salariée pour éviter des effets disproportionnés sur les grandes exploitations dont les effectifs d'emploi sont élevés. En plus de cela, les États membres seront tenus d'établir des critères afin d'éviter les opérations abusives par les agriculteurs qui cherchent à échapper à des effets de plafonnement. La réforme de la PAC apportera un nouveau composant dans son premier pilier - le «verdissement» qui fera en sorte que tous les agriculteurs de l'UE à la réception du soutien vont au-delà des exigences de l'éco-conditionnalité et offrent des avantages environnementaux et climatiques dans le cadre de leurs activités quotidiennes. Toutes les fermes vont apporter des avantages environnementaux et climatiques par le biais de la diversification des cultures, des pâturages permanents et de la maintenance des pâturages, grâce à des activités écologiques, le tout éco - conditionnalité sera toujours soutenu par les paiements directs. La nouvelle PAC et ses nouveaux composants venant en vigueur depuis 2014, apportent de nouveaux défis et risques, aussi. Afin d'éviter les coupures des paiements et des pertes financières dans les exploitations agricoles, il est nécessaire de préparer les acteurs dans les zones rurales de prendre ces changements à travers le programme éducatif et interactif.
Description:	Le programme de travail met l'accent sur plusieurs tâches essentielles: 1. Sur la base de documents locaux élaboré par les partenaires pour chaque pays le Document comparatif territoriale commmon sera created.The document refléter analyzis de la situation de la mise en œuvre des principes de la PAC dans les pratiques agricoles tandis que les changements pour la période nouvelle de programmation (2014-2020) seront inclus. 2. Transfert et adaptation du contenu des modules de formation seront transférer le contenu du matériel de formation existants et de les adapter sur la situation actuelle identifié sur la base du document comparatif territoriale. 3. Création de la plate-forme de e-learning permettra d'assurer un accès à des modules de formation par l'intermédiaire de cours pilote. 4. Diffusion et exploitation seront assurées à tous les partenaires countriesvia plusieurs outils tout en se concentrant sur les principaux AIM - groupes cibles encouriging en utilisant les résultats du projet au-delà de la durée de vie du projet. Pour enxure la qualité du consortium et les activités pendant la durée du projet une évaluation interne sera réalisé ot par le partenaire bulgare.
Thèmes:	*** Formation tout au long de la vie *** Formation continue ** Utilisation et diffusion de résultats ** Développement durable ** Formation ouverte et à distance

Produit 'Training modules'

Titre:	Training modules
Type de Produit:	Modules
Texte marketing:	Training modules are the part of interactive online training system for farmers which is one of the main aims of project.
Description:	Training modules for target groups focusing on CAP, direct payments, cross-compliance conditions
Cible:	farmers, agricultural advisors and rural youth
Résultat:	Online education and training material (e-learning)
Domaine d'application:	agriculture, forestry and fishing
Adresse du site Internet:	http://www.newcap-project.eu/e-learning/login/index.php
Langues de produit:	italien anglais slovaque bulgare

Produit 'E - learning platform'

Titre:	E - learning platform
Type de Produit:	Enseignement à distance
Texte marketing:	The technical platform of e-learning system is essential for fullfilling the main aim of the project - creation of virtual training environment as a tool for extending the knowledge of farmers.
Description:	Creation of e-learning platform for realization of online training
Cible:	farmers, agricultural advisors and rural youth
Résultat:	Online education and training material (e-learning)
Domaine d'application:	farmers, agricultural advisors and rural youth
Adresse du site Internet:	http://www.newcap-project.eu/e-learning/login/index.php
Langues de produit:	bulgare anglais italien slovaque

Produit 'Pilot online course'

Titre:	Pilot online course
Type de Produit:	Matériel d'apprentissage
Texte marketing:	Pilot testing was planned as a basic tool for evaluation of Quality of project outputs (Training modules and VLE).
Description:	Pilot online course as a training course was organized and evaluated, after the availability of the online training modules.
Cible:	farmers, advisors and rural youth
Résultat:	Innovative education and training modules
Domaine d'application:	agriculture, forestry and fishing
Adresse du site Internet:	www.newcap-project.eu/e-learning/
Langues de produit:	bulgare italien slovaque

Produit 'Project brochures'

Titre:	Project brochures
Type de Produit:	Autres
Texte marketing:	Brochures are one of the dissemination tools aim of which is to transfer the information on project and its outputs to potencial beneficiaries
Description:	Project brochures contain information on consortium, planned results of the project and ways of utilization of products by potential beneficiaries
Cible:	farmers, advisors and rural youth
Résultat:	Public awareness campaigns
Domaine d'application:	agriculture, forestry and fishing
Adresse du site Internet:	http://www.newcap-project.eu/?pl=9&article=20
