http://www.adam-europe.eu/adam/project/view.htm?prj=8394

Projektinformation

Titel:	eLearning für eGovernment
Projektnummer:	518366-LLP-1-2011-1-BG-LEONARDO-LMP
Jahr:	2011
Projekttyp:	Innovationsentwicklung
Status:	abgeschlossen
Land:	EU-Zentralisierte Projekte
Marketing Text:	Interoperabilität ist die Fähigkeit von Informationssystemen elektronische Dokumente zu bearbaiten, speichern und austauschen,mit der Hilfe von einheitlichen technologischen Standards und Prozessen.Im Era von fortgeschritenen Informationsgesellschaft,Interoperabilität von Informationssystemen verschiedene Organizationen,öffentlich und privat,wird ein Hauptfaktor für die Effizienz der Wirtschaft.Die EU Digitale Agenda,eins der 7 Flaggschiffe von der Europe 2020 Strategie,definiert Interoperabilität als die Hauptaktionslinie.Während die meisten EU Ländern ausständige Rahmengesetzgebung entwickelt haben und die nötigen Institutionen für eingerichtet haben,die Kentniss der spezializierte Regelungen und die nötige Fähigkeiten bleibt ungenügend.Das derzeitig Vorschlag wird die Kentnisse und Fähigkeiten von Interessenträger in eGovernment Projekten über ganze Europa verbessern durch das Entwickelung von einem innovativen eLearninginstrument,basiert auf die eigene Untersuchung des Konsortiums.
Zusammenfassung:	ELGI – das Projekt eLearning für eGovernment beschäftigt sich mit dem Problem von Interoperabilität im Kontext von eGovernment und die Einrichtung eines europaweiten grenzüberschreitenden elektronischen Dienstleistungen. Das Projekt wird das Wissen der Beteiligten im E-Government-Projekte in ganz Europa durch die Entwicklung einem innovativen eLearninginstrument, basiert auf die eigene Untersuchung des Konsortiums der Stand der Technik.. Die Hauptziele des Projekts sind: ->Ein eLearninginstrument für die Ausbildung zum Thema Interoperabilität von öffentlichen Verwaltungen zu entwickeln, und insbesondere auf: - Gesetzliche Regelungen für die Interoperabilität - Die besten europäischen Praktiken - Eine Analyse der administrative Informationssysteme, um die Anforderungen für die Interoperabilität zu erfüllen - Erforderliche Neuordnung von administrativen Informationssystemen: technische, semantische, organisatorische - Zertifizierungsprozess für die Interoperabilität - Schaffung von angemessenen Aufgaben für neue Verwaltungssysteme - Best Practices Beispiele, Tests ->Vertretern der Zielgruppen auszubilden
Beschreibung:	Die vorliegende Projekt wird eine innovative eLearninginstrument entwickeln, gezielt an Zielgruppen in 6 Ländern - Mitglieder der EU (BG, EL, ES, IT, LV, PL). Die Zielgruppen des Projekts sind: - Mitarbeiter der lokalen, regionalen und nationalen Behörden, staatlichen Institutionen und Agenturen; - Managers von eGovernment-Projekten; - Informationssysteme Entwickler; - Politische Entscheidungsträger; - VET Organisationen; - Lehrer und Ausbilder. Das Konsortium wurde für die Zwecke des vorliegenden Projekts im Hinblick auf Fähigkeiten und Know-how aus einer Vielzahl von Sektoren zu sammeln gesetzt: Forschung (RTU, SWSPZ), Hochschulbildung (RTU, SWSPZ), Erwachsenen-gezielte und Berufsbildung (TEZA, IFI:), öffentliche Verwaltung Verbindungsbüro (LOGOSPA, IFI), ICT (TEZA, BESTCYBERNETICS), Interoperabilitäts-Zertifizierung (TEZA). Jede Partnereinrichtung ist ein führender Bildungs-/ Weiterbildung Organisation mit einem umfassenden Netzwerk bei den Zielgruppen und hat die Mitteln eine effektive und effiziente Verbreitung und Nutzung der Projektergebnisse zu sichern. Der produzierte E-Kurs wird eine qualitativ hochwertige innovative Produkt, das in die

Projektinformation

Ausbildungsprogramme der Konsortiumteilnehmer aufgenommen werden wird.

Themen: *** Fernlehre
** IKT
** Lebenslanges Lernen
* Nachhaltigkeit
* Weiterbildung

Sektoren: *** Erbringung von Freiberuflichen, Wissenschaftlichen und Technischen Dienstleistungen
** Erbringung von Sonstigen Wirtschaftlichen Dienstleistungen
* Information und Kommunikation

Produkt Typen: Lehrmaterial
Programme/Curricula
Unterlagen für offenen Unterricht

Produktinformation:
- State-of-the art international report
- Research on national policy and practices
- e-Course Curriculum
- Course scenario and objects
- Electronic course
- Localized file packages
- Test Training
- Presentation of exploitation activities and result

Produkt 'State-of-the art international report'

Titel:	State-of-the art international report
Produkttyp:	Fernlehre
Marketing Text:	The synthesis report will be produced by P2. The report will summarize and communicate overall EU strategies, policies and endeavours related to interoperability and security of information as well as lessons learnt from undertaken on European level efforts and implemented programmes and projects.
Beschreibung:	Study of publicly available documents constituting EU policies and reflecting EU practices with focus on the requirements for interoperability and security of information. Analysis of activities and documentation produced under the EC Program IDABC and its follow-on programme: “Interoperability Solutions for European Public Administrations” (ISA) as well as information acceptable within Open Source Observatory and Repository for European public administrations (OSOR), Bridge/Gateway Certification Authority (BGCA), IDABC Open Source Event 2009, the Open World Forum 2010, 2020 Free Libre Open Source Software(FLOSS) Roadmap, ePrtactice.eu case studies and other sources reflecting Stat-of-the-art in project’s related areas. The activity includes research and segmentation of information; verification of information sources; notifying authors of the selected information and acquiring rights to distribute it. The State-of-the art international report will be performed in close conjunction with state-of-art reports at national level in 6 European countries.
Zielgruppe:	• Local, regional and national public administrations, national institutions and agencies; • Managers of eGovernment projects; • SMEs; • Policy makers at national and EU level; • VET organizations; • Teachers and trainers organizations;
Resultat:	State-of-the art international report
Anwendungsbereich:	Training institutions; local, regional and national public administrations; SMEs

Produkt 'Research on national policy and practices'

Titel:	Research on national policy and practices
Produkttyp:	andere
Marketing Text:	The aim of WP3 is the conduct of research into the national legal base (strategic frameworks, laws, implementation regulations, etc), specific requirements, case studies and best practices in the field of interoperability in each country represented in the partnership. WP3 will be performed in close conjunction with WP2, which focuses on the same issues on European level. The activity includes research and segmentation of information; verification of information sources; notifying authors of the selected information and acquiring rights to distribute it. The information will be made available in the partner's language and in English, as the working language of the consortium.
Beschreibung:	Identification and summary of the national aspects and peculiarities in the field of interoperability in each Country (strategic frameworks, laws, regulations, implementation, specific requirements, organizational aspects, technical aspects, case studies, best practices, etc.)
Zielgruppe:	• Local, regional and national public administrations, national institutions and agencies; • Managers of eGovernment projects; • SMEs; • Policy makers at national and EU level; • VET organizations; • Teachers and trainers organizations.
Resultat:	State-of-the art national report
Anwendungsbereich:	Training institutions; local, regional and national public administrations; SMEs

Produkt 'e-Course Curriculum'

Titel: e-Course Curriculum

Produkttyp: Programme/Curricula

Marketing Text: The topics covered in the course are based on the needs analysis and market research and needs analysis performed and are as follows:
- legal regulations of interoperability;
- the best European and world practices;
- an analysis of administrative information systems to meet the requirements for interoperability;
- required re-engineering of administrative information systems: technical, semantic, organizational
- certification process for interoperability;
- specification of adequate tasks for new administrative systems
- best practices, examples, tests

Feedback will be collected through a questionnaire at the end of the course in order to improve the product further and ensure that the service is in line with the need of the target groups. Opinions will be sought on:
1. The difficulties the learner experienced in the course
2. What the learner liked most on the course.
3. Whether the course was interesting and useful.
4. Recommendations for improving the course.

Beschreibung: The curriculum will contain:
1. Name of the programme
2. Aims
3. Target group
4. Obtainable competences
5. Entry prerequisites
6. Training Hours
7. Methods of the training
8. Modules of the Programme
9. Training process
10. Grading policy
11. Conditions of certification
12. Method of surveying satisfaction, realization and efficiency of the training. Processing and utilization of feedback.

Zielgruppe: Staff of local, regional and national public administrations, national institutions and agencies; Information systems developers.

Resultat: Training programme of the course, tailored made to the specific needs of stakeholders in e-Government services.

Anwendungsbereich: Training institutions; local, regional and national public administrations; SMEs

Homepage: http://www.elgiproject.eu

Produktsprachen: Englisch

Produkt 'Course scenario and objects'

Titel:	Course scenario and objects
Produkttyp:	Programme/Curricula
Marketing Text:	The aim is the development of the course scenario, i.e. the structure of the course will be specified - the start point, the links between the various screens and their hierarchal order. The base elements of the course will be specified – introduction to the course, instructions for use, basic terminology, entrance test, study content – structured by topics, control questions to every chapter, final test, etc. During its' beginning phase this work package is developed simultaneously with WP2 and WP3 as it depends on their input. It's final phase is performed simultaneously with WP 6 to provide interactive input into course development.
Beschreibung:	The course objects will be specified and described. The “Course objects” are defined as small, independent chunks of knowledge or interactions stored in a database, which can be presented as units of instruction or information. They are typically self-contained, interactive, and reusable. The following learning objects will be available in this platform: - audio-visual elements - animations - quizzes / simulations The guidelines how to produce these course objects will be prepared for partners responsible of development of these elements.
Zielgruppe:	Staff of local, regional and national public administrations, national institutions and agencies; Information systems developers.
Resultat:	Description of the information that will make the course contents. Description of the course structure.
Anwendungsbereich:	Training institutions; local, regional and national public administrations; SMEs.
Homepage:	http://www.elgiproject.eu
Produktsprachen:	Englisch

Produkt 'Electronic course'

Titel:	Electronic course
Produkttyp:	Lehrmaterial
Marketing Text:	The deliverable under WP6 is an electronic course as a learning tool on the topic of interoperability of public administrations, and in particular: a) legal regulations of interoperability; b) the best European and world practices; c) an analysis of administrative information systems to meet the requirements for interoperability; d) required re-engineering of administrative information systems: technical, semantic, organizational e) certification process for interoperability; f) creation of adequate tasks for new administrative systems g) best practices, examples, tests
Beschreibung:	The electronic course will be developed in two phases: During the first phase, the course scenario and objects, the graphic design of the product will be created whilst the stylistic decisions will be made. Video, audio or animation objects will be produced. These objects will be compiled to form the primary course version in English. During the second phase, there will be a compilation of the primary and 6 localized versions into one coherent electronic course.
Zielgruppe:	Staff of local, regional and national public administrations, national institutions and agencies; Information systems developers.
Resultat:	The e-course will be a market-ready product, designed for audiences in 6 EU courtiers: PL, LV, IT, ES, EL, BG. A version in English ready for localization/ customization will also be available.
Anwendungsbereich:	Training institutions; local, regional and national public administrations; SMEs.
Homepage:	http://www.elgiproject.eu
Produktsprachen:	Bulgarisch Polnisch Englisch Griechisch Italienisch Lettisch

Produkt 'Localized file packages'

Titel:	Localized file packages
Produkttyp:	Lehrmaterial
Marketing Text:	The e-course developer will extract all text files using specialised software. These files will be in English. Every partner will translate the files into their own language and return them back to the developer, where they will be compiled into one electronic course.
Beschreibung:	The electronic course will be localized, i.e. translated into the languages of the consortium and adapted to national target groups' needs. The process of localization will be automated through the use of a localization tool (software product), that extracts all text fields and displays them in a convenient form for translation. A copyright tool will be used, i.e. one that provides independent mechanisms and algorithms for localization. Each partner will translate the text files into their national language.
Zielgruppe:	Staff of local, regional and national public administrations, national institutions and agencies; Information systems developers.
Resultat:	The course will be available in English, in a format which is easy to update or localize (adapt to national and cultural characteristics) and can thus be suited to the needs of audiences throughout Europe.
Anwendungsbereich:	Training institutions; local, regional and national public administrations; SMEs.
Homepage:	http://www.elgiproject.eu
Produktsprachen:	Bulgarisch Griechisch Spanisch Lettisch Italienisch

Produkt 'Test Training'

Titel: Test Training

Produkttyp: Fernlehre

Marketing Text: A test training will be organized for a target number of 50 trainees in each country. The trainees will be representatives of the project short term target groups: the staff of local, regional and national public administrations, national institutions and agencies and information systems developers in Europe and 6 countries in particular - Bulgaria, Greece, Italy, Latvia, Poland and Spain. A total of 300 representatives will be reached (6x50) trough the e-course test groups in each country (source: feedback forms).

The training will be web-based. The learner will use their own computer, either at work or at home. A helpdesk will be available for technical issues and a network of tutors will be available for contact in case of difficulties with the content in each partner country. A Learning Management System will be used to deploy, manage, track and report on interactions between learner and content and between the learner and tutor.

Beschreibung: At the end of the course, the user will be directed toward a questionnaire, where feedback will be sought on:
1. The difficulties the learner experienced in the course
2. What the learner liked most on the course.
3. Whether the course was interesting and useful.
4. Recommendations for improving the course.
The feedback will be used to improve the course further.

Zielgruppe: Staff of local, regional and national public administrations, national institutions and agencies; Information systems developers.

Resultat: A total of 300 representatives will be reached (6x50) trough the e-course pilot training in each country. Feedback from this training will be sought from each learner and used to improve the course further.

Produkt 'Presentation of exploitation activities and result'

Titel: Presentation of exploitation activities and result

Produkttyp: Verbreitungsmethoden

Marketing Text: The final exploitation report will incorporate partner's national reports and provide comparisons of the
dissemination and exploitation activities among the partner countries. The final exploitation report will
serve as a tool to communicate and to pass the results to the general public related to the education,
scientific community, decision makers and policy researchers etc at the national and EU level.

Beschreibung: Each project partner will prepare a national exploitation plan in order to present its idea of feasibility of exploitation and dissemination of results. The adoption of theoretical background (based on previous project's results) and linking with national providers will assist to execute the most convenient exploitation plan. Partner's reports will serve as an evaluation instrument to define the Final Exploitation Plan at the level of consortium as a whole.
Mainstreaming activities will be addressed to decision-makers at national and EU level: a final exploitation report containing pilot localization results and recommendations will be developed and sent to policy makers, with the aim to mainstream project's results in terms of policy. Specific attention will be put in showing possible connection between interoperability of public ICT structures and other initiatives, in order to strengthen mutually their potentials.

Zielgruppe:
- Local, regional and national public administrations, national institutions and agencies;
- Managers of eGovernment projects;
- SMEs;
- Policy makers at national and EU level;
- VET organizations;
- Teachers and trainers organizations.

Resultat: Sustainability of the use of project results in Partner countries. Creation of opportunities for the transfer of the online materials and course into additional European countries aiming the further development of the training materials.

Anwendungsbereich: Training institutions, public institutions, SMEs.

Veranstaltungen

Launch of ELGI project

Datum	07.11.2011
Beschreibung	On 7th and 8th of November 2011 the kick off meeting for the launch of the “ELGI – eLearning for eGovernment project” took place in Sofia. Along with TEZA, other five organizations coming from Latvia, Poland, Greece, Italy and Spain participated in the meeting, debating during those two days the main technical, administrative and financing aspects to be taken into account for the project implementation. Partners had the chance to clarify the concrete project planning and the most appropriate ways to reach the ambitious aims of the project.
