Projektinformation

Titel: ECOPLANTA

Projektnummer: 2011-1-RO01-LEO05-15320

Jahr: 2011

Projekttyp: Innovationstransfer

Status: laufend

Land: RO-Rumänien

Marketing Text: Die ecoplanta Projekt ist eine 24-monatige Initiative von der Europäischen Kommission mitfinanziert, unter der Generaldirektion für Bildung und Kultur. Das Projekt zielt darauf ab, zu verbessern und zu aktualisieren Fähigkeiten und Kompetenzen für Bauern und Landarbeiter auf dem Gebiet der organischen Pflanzenschutzmitteln. Dies wird durch die Übertragung der innovative Schulungsmaterialien von der sehr erfolgreichen LdV PlantPro Projekt zur beruflichen Ausbildern, durch den Bauern und Landarbeiter profitieren können und erwerben Fähigkeiten und Kompetenzen in den biologischen Pflanzenschutz erzielt werden. Darüber hinaus wird ecoplanta die Schaffung grüner Arbeitsplätze durch Unterstützung der Landwirte auf dem Weg zum ökologischen Landbau und / oder durch die Verbesserung ihrer Beschäftigungsfähigkeit zu unterstützen, während die Förderung umweltfreundlicher Landnutzung und Landwirtschaft.

Zusammenfassung: The application of agrochemicals for controlling pests and diseases is forbidden in organic agriculture, making crop protection a constant challenge for farmers and agricultural workers. The ecoplanta partnership has identified this clear need to enhance and upgrade farmers' competencies and provide them with training material and key guidelines in order to help them adopt organic farming principles and to meet the increasing, both at a European level and globally, consumer demands. The targeted countries are Greece, Poland, Hungary and Romania, which are among the EU member states that face negative employment growth, large agricultural sectors and low GDP. At the same time, the employment situation in the agricultural sector in EU27 is changing rapidly and is becoming more competitive over the last decade. Considering these facts, it is clearly needed that VET in agriculture becomes more responsive to the labour market needs.

Beschreibung: The ecoplanta Project will
• Improve low-skilled farmers and agricultural workers' basic skills in organic pest and disease control
• Enable low-skilled farmers and agricultural workers to take advantage of opportunities that better their position in the labour market
• Make VET in the agriculture more responsive to labour market needs
• Provide VET trainers with adequate innovative tools and resources –in terms of methodology - to address the needs of farmers and agricultural workers
ecoplanta has been developed by a transnational consortium of six expert actors with complementary skills and expertise in Organic Farming, Research, Training, Business and Consulting from five EU member states i.e. Romania, Greece, Switzerland, Hungary and Poland
