PIRATE - ECVET Lehmbau Europa - Empfehlungen und Handreichungen zur Kompetenzbewertung und Ausbildung im Lehmbau

528117-LLP-1-2012-1-FR-LEONARDO-LMP

http://www.adam-europe.eu/adam/project/view.htm?prj=9973

Projektinformation

Titel:	PIRATE - ECVET Lehmbau Europa - Empfehlungen und Handreichungen zur Kompetenzbewertung und Ausbildung im Lehmbau
Projektnummer:	528117-LLP-1-2012-1-FR-LEONARDO-LMP
Jahr:	2012
Projekttyp:	Innovationsentwicklung
Status:	laufend
Land:	EU-Zentralisierte Projekte
Marketing Text:	LEHM - der kreative und universale Baustoff nachhaltiger Architektur und Gestaltung. ECVET - ein Werkzeug um Lerninhalte zu schaffen, die zwei tragende Marktbereiche unterstützen : ökologisches Bauen und Sanierung. PIRATE - ein Projekt zur Entwicklung von Einheiten von Lernergebnissen im Lehmbau, wo die benötigten Kompetenzen zusammengefasst sind. Unsere ECVET Lehmbau Einheiten werden • Fachkräfte fördern, durch Möglichkeiten modularer Qualifizierung, Mobilität, Weiterbildung und Berufssuche ; • Lehrkräfte unterstützen bei der Ausarbeitung neuer Inhalte und Prüfungsprotokollen, bei der Bewertung von Lernergebnissen ; • Zertifizierungsberechtigte Einrichtungen helfen bei der Überarbeitung or Neuerschaffung von Qualifikationen, bei grenzübergreifendem Vergleichen. Die meisten der PIRATE-Partner haben schon in europäischen Lehmbauprojekten mitgewirkt. In den internationalen Arbeitgruppen werden Verbindungen geknüpft werden, Erfahrungsaustausch stattfinden, Ergebnisse kapitalisiert werden.
Zusammenfassung:	In dem europäischen Projekt PIRATE arbeiten 18 Organisationen aus 8 europäischen Ländern zusammen um dem Mangel an kompetenten Arbeitskräften im Lehmbau zu begegnen. Das Projekt hat zum Ziel, den Lehmbau in die Berufsbildung zu integrieren. PIRATE steht für ECVET Lehmbau Europa - Provide instructions and resources for assessment and training in earth building. Hierzu erarbeiten wir Lerneinheiten nach den Empfehlungen des europäischen Qualifikationsrahmens. Diese Lerneinheiten sollen die Anforderungen des Arbeitsmarkts und die Praxis auf der Baustelle abbilden und als Grundlage für die berufliche Aus- und Weiterbildung dienen.
Beschreibung:	The project will associate 3 parallel development stages to implement ECVET - Experiment procedures for integration of units of new learning outcomes into existing qualifications, in collaboration with competent institutions. - Design new learning outcomes and test procedures for their assessment in national context and their transfer in mobility context, with credit award. - Develop concepts to combine ECVET and ECTS. The issues will be translated into operational and quality recommendations.
Themen:	*** Lebenslanges Lernen *** Anerkennung, Transparenz, Zertifizierung *** Erstausbildung ** Nachhaltigkeit ** Hochschulbildung ** Unternehmen, KMU ** Chancengleichheit ** Weiterbildung * Nutzung und Verbreitung von Ergebnissen * Arbeitsmarkt * Qualität * Interkulturelles Lernen * Berufsorientierung und -beratung
Sektoren:	*** Baugewerbe/Bau ** Erziehung und Unterricht
Produkt Typen:	Beschreibung neuer Berufsprofile Evaluierungsmethoden

Projektinformation

	Film Homepage Transparenz und Zertifizierung
Produktinformation:	The main product will be a matrix of ECVET units of learning outcomes for EQF levels 3 and 4, with criteria of assessment, in the main earth building load bearing wall techniques : rammed earth, cob, earth brick masonry (compressed bloc or adobe).

Produkt 'Matrix of ECVET Units of learning outcomes in earth building'

Titel:	Matrix of ECVET Units of learning outcomes in earth building
Produkttyp:	Evaluierungsmethoden
Marketing Text:	
Beschreibung:	The matrix of learning outcomes in earth building techniques provides lists of knowledge, skills and competence as well as criteria, indicators, recommendations for assessment. It is translated into all partnership's languages and published on the public website as a printable electronic document
Zielgruppe:	Trainers, training providers, assessors, learners, certifying bodies
Resultat:	
Anwendungsbereich:	Competent bodies for certification will have access to: - models for learning agreements for mobility exchanges in the earthbuilding field; - examples of procedure for application of ECVET; - example of evaluation of informal and non formal learning outcomes ; - example of transfer and validation (transnational and national) ; - quality recommendations for application of ECVET; - proposal for quality recommendations; - proposal for combination of ECTS and ECVET.

Produkt 'Project web site'

Titel:	Project web site
Produkttyp:	Homepage
Marketing Text:	
Beschreibung:	The project public website is linked to the collaboration platform. Public pages will start short before the kick-off meeting in December 2012 (month 4). It will be maintained for at least 5 years (until 2017). The website will provide information about the project aims, programme and partners, including links to their website and email. The website will be developed during the project according to the updated dissemination needs. It will be used to make available to the public the projects results and products all along the project, for free download. The website will contain sections in each language of the partnership : EN, FR, DE, ES, PT, CZ, SK, SR. december 2012
Zielgruppe:	
Resultat:

Produkt 'Newsletters'

Titel:	Newsletters
Produkttyp:	andere
Marketing Text:	What is these PIRATE's quest about? They are looking for earth! The purpose of all their activities is to get earth recognized as a modern, healthy, creative and sustainable building material. And as a such to be taught to any professional of the construction sector, from the mason to the engineer. The projects newsletters tell about the partners efforts to introduce earth into national training systems.
Beschreibung:	An electronic newsletter will be released twice a year during the projects life. It contains updates about main events and outcomes of the project. It will include focus from partners about specific aspect of the project. The newsletter will be sent to all public who submitted for it on the website.
Zielgruppe:	trainers and teachers, learners, assessors, training providers
Resultat:	Newletter 1 (february 2013) and presents the consortium and gives insight in partner activities Newsletter 2 (september 2013)
Anwendungsbereich:	The newsletters are used on all the levels of dissemination. They are available on the public project website and and sent to - the staff and members of the project partners - all the persons and organizations the partners are in contact with, both in the european process of describing learning outcomes and in the national process of certifying ECVET units.

Produkt 'Project flyer'

Titel:	Project flyer
Produkttyp:	andere
Marketing Text:	Look at the map and imagine the network these PIRATEs are about to weave across Europe! The builders, trainers, architects and engineers involved in this ECVET project are determined to share their treasure with you : earth building skills and techniques, as ancient as mankind but as new as low energy housing, disaster prevention and affordable housing.
Beschreibung:	1000 flyers with basic information on the project aims and partners and including contact information, will be printed and distributed to partners during the kick-off meeting. It serves mainly to redirect towards the website. These flyers contain very few text and are therefore only printed in English. Partners may edit pdf versions in their language.
Zielgruppe:	- partners staff and members, - key actors for dissemination and certification, - builders involved in the development process of the new units of learning outcomes
Resultat:	The English flyer has been printed in november 2012 and distributed during the kick-off meeting among the consortium partners for further dissemination. Unfortunately there is a mistake in the adress of the project website on the printed flyer (http//: instead of http://) Since the flyer has been translated into several other languages : FR, CZ, PT
Anwendungsbereich:	
Homepage:	
Produktsprachen:	Englisch

Produkt 'Project leaflet'

Jorchel_et_al_Provide_instructions.pdf

http://www.adam-europe.eu/prj/9973/prd/14/1/Jorchel_et_al_Provide_instructions.pdf
Earth is a unique building material which is easily accessible and available. Building products and processes using earth need little embodied energy during the whole life circle. The use of earthen building material reduces the carbon dioxide emissions and contributes to a healthy indoor climate. Moreover earth architecture has an aesthetic value. Historic and modern buildings take advantage of these technical, aesthetic, environmental and social benefits. There is a still small but growing market in earth construction. The advances obtained with PIRATE project, trying to contribute for the growth of this specific market, will be presented in this paper. The PIRATE project aims to disseminate the benefits of modern earth construction by creating lifelong learning opportunities, putting the emphasis on competence standards in this sector. Eighteen organisations from eight European countries, all active in the earth construction sector as professional associations, education and training providers or small companies, have come together to develop units of learning outcomes and get them recognised within national certified courses. The new standards comply with the European Qualification Framework (EQF) and the European Credit System for Vocational Education and Training (ECVET)

Paccoud_Didier_Earth_goes_Europe.pdf

http://www.adam-europe.eu/prj/9973/prd/14/1/Paccoud_Didier_Earth_goes_Europe.pdf
Earth material has numerous advantages when it comes to reducing environmental impacts in the building sector, but its use remains limited as few professionnals are trained : very few formal trainings exist at european level. European earth-building training projects were undertaken during the last years to open the way for the official recognition of earth-building's skills and knowledge. This is an essential part of the effort to widespread the use of earth in the building sector. This paper intends to stress the interests of assessment to get earth construction recognized and introduced in current construction trainings at all levels, and to recognize learning outcomes to deliver certificates. Firstly, the concepts of assessment criteria and units of learning outcomes, part of the ECVET framework (European Credit system for Vocational and Educational Training) will be described through example of previous experiences in european earth-building training. In a second part, the development of this experience acquired with projects dealing with clay plasters will be presented : the PIRATE (Provide Instructions and Recommendations for the Assessment and Training in Earth-building) project aims to build with 18 european partners the foundations of european earth masonry and supervision trainings by proposing assessment criteria and defining units of learning outcomes able to integrate existing curricula. Finally, the current progress of this project will open to questions about the opportunities and issues encountered so far.

Veranstaltungen

BRICK Test

Datum	25.02.2015
Beschreibung	Our second test exam aims at re-evaluating the matrix design in a different environment and including mobility issues. It is planned and organised in the formal context of an experienced VET centre, welcoming 2 foreign trainees. We use the level 3 & 4 drafts to assess learning outcomes for unit Bb. With BRICK Test, we end the validation phase of the project.

Healthy Houses 2014 conference

Datum	10.10.2014
Beschreibung	The conference was visited by a group of European partners of the earth building and training network. Partners of PIrate Project and of the project New Members of ECVET Earth building participated. There was a joint presentation by the two projects about ECVET Earth building. First Grégoire Paccoud - as P2 in Pirate project presented a presentation about assessment and certification. Then Uta Herz - as a participant of the “New Members for ECVET Earth building” presented the European Earth Building Network. The presentation aimed to give a background understanding of the history and future of European networking to improve VET in Earth Building and a background understanding of how the PIRATE project started. Then the different partners sat in the podium and each of them told how and why they joined the European Earth building network. This was a unique experience for the audience listening to earth building partners from Poland, France, Germany, Cyprus, Spain, UK, Slovakia and of course Czeck Republic.

SUPERV 2

Datum	17.02.2014
Beschreibung	At the end of SUPERV1, we have decided that the units described in the CSPM1 document were too detailed (too many units) and we have decided to create a specific unit frame by grouping some of CSPM units and by developing some others (for example for “Study”). This new frame is composed of eight units. P6 has presented a first draft of learning outcomes for these 8 units (French version from 30 of May 2013 and 27 of January 2014, partial English translation from 10 of February 2014. P3 has amended these documents (drafts of February 13th 2014). The learning outcomes listed in the 8 units are derived from a) the competence standards of the French “national teaching program”(PPN) for civil engineering and sustainable construction; b) the eight CSPM units c) the learning outcomes listed in the ROME (Répertoire Opérationel des Métiers et des Emplois = professions and jobs database of the French Job centre). d) some learning outcomes described in certain qualification of the RNCP database (www.rncp.cncp.gouv.fr). • The main objective of SUPERV2 was to add learning outcomes specific to earth construction into these units. • The second objective of Superv 2 was to start the discussion/creation of assessment criteria for levels 5 and 6. • Further objectives were - the presentation of the results of the survey about earth contents in teaching programmes of higher education - the work on the glossary (WP2) of building professions - a look at the homework planned after superv 1 - the domains for trades, occupation, professions in building sector at levels 5, 6 and 7 in the various countries present in superv group (UK, Germany, France and Portugal), - the existing national documents on the description of skills at levels 5, 6 and 7.

BRICK 1

Datum	13.03.2013
Beschreibung	The core of the first meeting of workgroup BRICK is to share the national meetings results about levels and units and to find how to shape the units according to the different national and professional frames and experiences. To achieve a shared result, small transnational groups are formed. It is expected to have a common list of units, as well as a common list of skills and knowledge at the end of the meeting..

MONO 1

Datum	02.02.2013
Beschreibung	The first meeting of the MONO group was to start the technical process of capturing, writing and sorting materials from the national group meetings into Skills, Knowledge and Competence. This was discussed in the light of the need to bring two technologies, rammed earth and cob, into a single process and the best way to achieve that. It is expected to have a common, agreed list of skills (tasks) and knowledge, divided according to 4 to 6 main categories of activities (units) by the end of the meeting.
