SRS

Response in 1-2-3

What is SRS

Student Response System

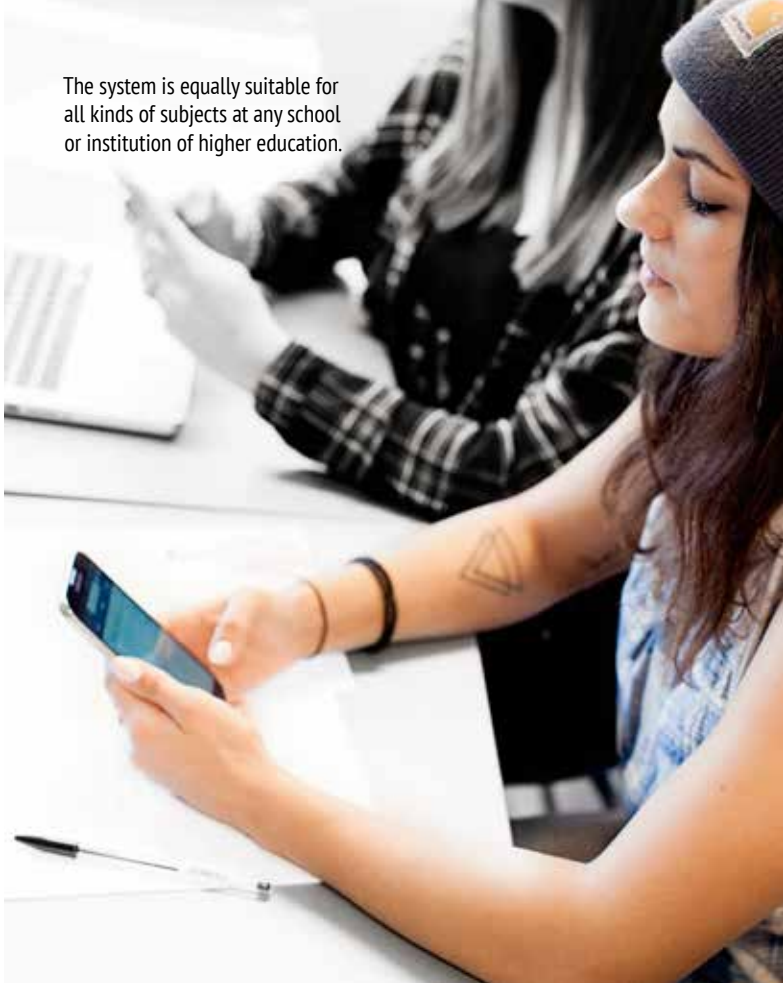
SRS is a voting system that turns students' own computers and handheld devices such as smart-phones or tablets into immediate response tools.

The students answer questions and quizzes set by the teacher, who gets an immediate overview of the students` understanding of the topic covered. The results are immediately displayed on a screen or board, and can be used as a springboard for discussion and student involvement.

Interact with all the students, including those who are usually too modest or non-responsive to speak up.

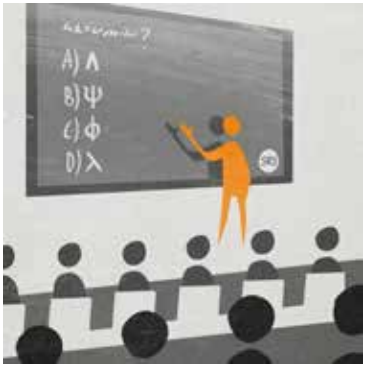
"SRS requires only a fraction of the time to conduct a vote"

Prof. Liviu Moldovan,
University of Targu Mures, Romania



The system is equally suitable for all kinds of subjects at any school or institution of higher education.

Tools and services developed by teachers and students



1 Ask a question

The teacher puts a question or quiz to the students. The question can be in any format - PowerPoint, PDF, pictures, video or any kind of multimedia, written on a blackboard or just given orally.

2 The students vote

The students answer the question using their mobile devices.

3 Results appear

The results appear immediately on a projector/digital whiteboard, preparing the ground for involvement and discussion in class.

Response in 1-2-3

Why use SRS in higher education?

Do you have students who do not participate in class?
Do the students really understand the content of your lecture?
How do you get feedback from the students?

Turn your students´ smartphones, tablets and laptops into immediate response tools with SRS.

Advantages

- A flexible tool for the teacher
- Student commitment
- Immediate response
- Works via WiFi
- Is compatible with modern mobile devices
- No logistics
- Enables the teacher to ask spontaneous questions
- Sets off the modest students
- Easy installation

"Teaching becomes more efficient, and the students perform better"

Sven-Olof Larsson,
Centre for Flexible Learning,
Söderhamn, Sweden

There are no issues with logistics, as the system works on the students' handheld devices or computers.

Turn your students' smartphones, tablets and laptops into immediate response tools!
