# ALL4WELL Accessible Language Learning for the Wellness Sector

2013-1-IT-LEO05-04040

http://www.adam-europe.eu/adam/project/view.htm?prj=11427

## Project Information

Title: ALL4WELL Accessible Language Learning for the Wellness Sector

Project Number: 2013-1-IT-LEO05-04040

Year: 2013

Project Type: Transfer of Innovation

Status: completed

Country: IT-Italy

Marketing Text: Accessible Language Learning for the Wellness Sector. Based on the results of the projects ELLVIS and VET4VIP, the ALL4WELL project provided a job-oriented English course giving an answer to the needs of visually impaired masseurs and wellness professionals.

Summary: The profession of a masseur is one of the most prestigious jobs for blind and visually impaired people. In some countries protective laws oblige public and private employers to employ blind masseurs. Due to the demographic development in Europe, wellness oriented applications offer increasing opportunities for masseurs and wellness professionals, especially within the tourism sector.
For the blind masseur or wellness professional verbal interaction plays a significant role in the healing process, based on positive personal relationship. Being able to make oneself understood in the patient's or tourist's language - or in a common language - increases job opportunities and success in work. Therefore, for those desiring to work in the wellness sector there is an obvious demand for broader communicative skills, knowledge of foreign languages and intercultural skills, if they want to raise their employment prospects.
However, blind or visually impaired people trying to learn a language, especially language for the job, find out that training centres are usually not prepared for visually impaired people. This is also very true for the field of blind and visually handicapped masseurs and wellness professionals where there is a perceptible shortage of suitable language training material. As a result, up to now foreign language training has been very marginal in a curriculum for visually impaired wellness professionals.
This situation is challenged by a consortium of four institutions for blind and visually impaired that either organise training for masseurs and wellness professionals or provide this training in -house. These partners are supported by three language training centres that have experience in the creation and adaptation of existing language courses for visually impaired learners.
Based on the results of the projects ELLVIS and VET4VIP, the project ALL4WELL (Accessible Language Learning for the Wellness Sector) provided a job-oriented English course in order to give an adequate answer to the needs of visually impaired masseurs and wellness professionals.
The innovative user-interface of the course provides easy access to the content, thus broadening the possibilities of language teaching to the blind and visually impaired.

Description: Within the core activities of the All4Well project have been involved developers of software/multimedia supports, with the aim to transfer and adapt the computer-based English language course ELLVIS to the needs and requirements of German, Italian and Romanian learners working in the wellness sector.
The ELLVIS language course (English Language Learning for Visually Impaired Students) is a language course especially developed for blind and visually impaired students. The course developed for Microsoft Windows systems uses force-feedback joysticks to create a haptic user interface. The course, including instructions for users is available for download under http://www.ellvis.allvip.org/prod.htm.
The software consists of a run-time player, script files for the course, and sound files for the language materials. The ELLVIS script files are encrypted, but the original script files are written in xml language.
Sample modules containing plain xml script files as well as a basic tool to modify the modules can be found on the website http://www.vet4vip.org/.
The software itself (run-time player and editing tools) was created by GedonSoft GmbH (http://www.gedonsoft.de).
The existing ELLVIS language course has been adapted to the language needs of

## Project Information

trainers and learners in the wellness sector.
Due to its special target group (blind and visually impaired students), the existing course has been refined and updated by implementing new training and learning methods and materials.
The tasks initially planned to address the project's aims were structured in the following n. 6 WPs:
WP 1 - Qualification Framework (November 2013 – March 2014)
The work package has reached its three main aims:
1. National reports from Countries Partners describing the special language learning needs of blind and visually impaired people working in the wellness sector are done.
2. A qualification framework bundling of the national reports into a common needs analysis exists.
3. The overall concept of the ALL4WELL course is described.
WP 2 - Transfer of Ellvis and Vet4Vip modules (March 2014 – July 2014)
The work package had as main aims to describe and define the (paper-based) transfer of the ELLVIS and VET4VIP into the ALL4WELL course and write a Teacher's Manual for the ALL4WELL course. These tasks are done.
WP 3 - Compilation of ALL4WELL course (June 2014 – August 2015)
Among the aims of the WP there were the following:
1. To program and to adapt the Authoring System for ALL4WELL course that allows language teachers to further adapt the modules to the needs of their learners and the ALL4WELL English course for learners working in the wellness sector.
2. To record, edit and cut the sound files for German-speaking learners, Italian-speaking learners and Romanian-speaking learners (instructions, grammar explanations, cultural information for the course). All these tasks listed above have been well accomplished.
WP 4 - Compilation of ALL4WELL English course (November 2014 – August 2015)
In this work package the ALL4WELL course has been tested and evaluated, the final version of the course and the evaluation report are now available as OER.
WP 5 - Dissemination and Valorisation (December 2013 – September 2015)
In WP5 the partnership agreed on a common dissemination strategy, the project, its goals and tasks are well-known on a national and transnational level and the project results meant for publication are easily available. The project has been well promoted and shared with the stakeholders with good results in terms of potentiality of exploitation.
WP 6 – Project Management and Reporting (October 2013 – September 2015)
This WP was fundamental for the realization of the whole project because it concerns the overall coordination of the planned activities, including the Project Management and Financial Management.
The lead partner of this WP was Centro Machiavelli (P1), who managed the project in cooperation with the P0 UICI Firenze along the two years of its duration, collected and summarised all the narrative and financial information from each partner. Then it organised everything and submitted to the National Agency both the interim report for the first 13th months and the final one, at the end of all activities.

Themes: *** Utilization and distribution of results
*** Labor market
*** Intercultural learning
*** Lifelong learning
*** Access for disadvantaged
*** Equal opportunities
*** Language training
** ICT
** Continuous training
* Open and distance learning
* Vocational guidance

Sectors: *** Education
* Professional, Scientific and Technical Activities
* Human Health and Social Work Activities

Product Types: material for open learning
modules

## Project Information

open and distance learning
teaching material

DVD

Product information: Based on the results of the projects ELLVIS and VET4VIP, the ALL4WELL project provided a job-oriented English course aimed to meet the needs of visually impaired masseurs and wellness professionals.
The innovative user-interface of the course provides easy access to the content, thus broadening the possibilities of language teaching to the blind and visually impaired. The job-oriented content that can be put into practice on the spot will not only bring new motivational input to the students, but will also provide those students with tools to improve their versatility and mobility as far as language is concerned – and thus their employment outlooks.
The project results are:
1) Qualification Framework – Need Analysis (+Technical Specifications)
2) ALL4WELL course script describing the structure, elements, learning goals, and methods of the planned.
3) ALL4WELL course Teacher's Manual describing learning goals, content and structure of the course including technical instructions and recommendations for the classroom.
4) Adapted Authoring System-Assistant for the creation and/or adaptation/updating/change of the ALL4WELL course. ALL4WELL English course for learners working in the wellness sector.
5) English course software (ALL4WELL English course)
6-7-8) Sound Packages for German-speaking, Italian-speaking and Romanian-speaking learners (instructions, grammar explanations, cultural information for the course).
9) Evaluation report describing the utilisation and impact of the ALL4WELL course.
10) Communication and Dissemination Plan (+Disemination Report)
11) Project’s website

# Product '1 - Qualification Framework - Need Analysis Report (+Technical Specifications)'

Title: 1 - Qualification Framework - Need Analysis Report (+Technical Specifications)

Product Type: procedure for the analysis and prognosis of the vocational training requirement

Marketing Text: Qualification Framework - Need Analysis Report bundles national reports from AT, DE, IT and RO, thus describes the special language learning needs and requirements of Blind and Visually Impaired People working in the wellness sector, summarised into a common Needs Analysis Report, which also contains detailed Technical Specifications and guidelines, which were very useful during the implementation of the project's activities.

Description: The Qualification Framework can be considered as Guidelines and Technical Specifications for the project implementation. It has been the basic document for the transfer of the ELLVIS and VET4VIP projects products. Therefore, it is focused on the specific/special needs of the target group, i.e. blind or visually impaired people working or preparing to work in the wellness sector.
So, this survey gave an effective contribute to achieve the projects objectives by supporting all the members of the consortium to give an adequate answer to the language learning needs of the target group.
In order to have a more detailed explanation on the technical requirements, it was necessary to produce also an annex to the Qualification Framework, contaning "Technical Specifications" for the ALL4WELL course.
This annex gives a description of general aspects of the ALL4WELL course, taking care to explain open issues related to the adaptation of the software to Windows 8 System, to introduce the new learning activities and elements of the course, the technical changes of the ALL4WELL software. In addition, it gives a brief introduction to the potential synergies between this project and the MoLLVIS Project (Mobility Language Learning for Visually Impaired Studens - LLP KA2 Languages 2014-2015), which aims to transfer the technology (that is also used by the All4Well project) to mobile devices such as smart phones and tablets. See details in the Technical Specifications annex

Target group: Language teachers for blind and/or visually impaired learners who work or intend to work in the wellness sector.

Result: The Qualification Framework has individuated in which number and on what type of level the respondents do already dispose of language skills necessary for their (prospective) jobs and in which way an English course, using innovative techniques and tools in transfer of a former project, could be tailored to their needs as visually impaired learners. As emerged during the survey, the addressed target group maybe very heterogeneous as far as age or actual employment situation is concerned. But there is a common denominator: their knowledge of professional English is rather poor or not existing, the handling of everyday situations in English is a bit different, but most of the participants declared to "feel a significant lack of practical experience". Considering the above results, the Qualification Framework was very useful for all the consortium in order to choose a properly level for a language learning course. Taking into account the emerged needs, it has been situated between A1.2 and A2.1 on the ECF scale.
"Technical Specifications" supplied an effective contribute to achieve the project objectives by giving to the users a more detailed overview on the technical aspects of the course and on the potential synergies between this project and the MoLLVIS Project (Mobility Language Learning for Visually Impaired Studens - LLP KA2 Languages 2014-2015).

Area of application: Internal use for the project Consortium in order to well define the contents of the ALL4WELL course.

Product Languages: English

# Product '2 - ALL4WELL course script'

| | |
|---|---|
| Title: | 2 - ALL4WELL course script |
| Product Type: | teaching material |
| Marketing Text: | ALL4WELL course script describes structure, elements, learning goals and methods of the planned ALL4WELL English course. |
| Description: | The course scripts package contains the course materials, writing of scripts for training the English language within the concept of ALL4WELL project, taking into account the results contained in the Needs Analysis Report and the indications of the Qualification Framework, including the Technical Specifications. All 10 units have been defined and refined taking in consideration the various challenges that a learner of English faces at this particular level (between European classification A1 and A2). |
| Target group: | Language Teachers/Trainers, Blind and Visually Impaired Learners |
| Result: | This Product was a basic key result for implementing all the other planned project's activities. In fact, despite it was based on results of the former projects ELLVIS and VET4VIP, script is totally a new product with regard to content, structure, and activities. It means that all 10 units were properly developed for the ALL4WELL course and have been the basic structure for recording the sound files, as further step of the planned activities. |
| Area of application: | Language Teaching/Learning for Blind and Visually Impaired Learners |
| Homepage: | http://www.all4well.org/products/language-modules/ |
| Product Languages: | German<br>Italian<br>English<br>Romanian |

# Product '3 - Teacher's Manual (English and German versions)'

| | |
|---|---|
| Title: | 3 - Teacher's Manual (English and German versions) |
| Product Type: | teaching material |
| Marketing Text: | Teacher's Manual describes learning goals, content and structure of the ALL4WELL course, including technical instructions and recommendations for the classroom.<br>It is available both in English and in German languages, due to the decision of the 4 German speaking partners (3 German and 1 Austrian) to translate it for their users. |
| Description: | In detail, the Teacher’s Manual is a tool necessary for teachers/trainers who have to do the the necessary, preliminary preparations to use the ALL4WELL course.<br>This means that all facilities in the classroom need to be adapted to a range of eye conditions and that the environment is so flexible (and the teacher as well) that the facilities can be adjusted according to needs of blind and visually impaired people. |
| Target group: | Language Teachers/Trainers, Blind and Visually Impaired Learners |
| Result: | This product helps to the preparation of the teacher/trainer himself and of his classroom in such a way that he can teach to a ‘mixed group’ of blind and visually impaired learners. A mixed group means that some of the learners have no sight at all whereas some of them can partially see.<br>So, the Teacher Manual is a very useful tool for teachers/trainers who approach to test (and use) the ALL4WELL course. Therefore, it contributed actively to the testing and the transfer of the course to new potential users. |
| Area of application: | Implementation of the ALL4WELL course and Teaching Languages for Blind and Visually Impaired Learners |

| Product Languages: | German<br>English |

# Product '4 - Authoring System - Assistant'

| | |
|---|---|
| Title: | 4 - Authoring System - Assistant |
| Product Type: | others |
| Marketing Text: | Authoring System - Assistant for the self adapting and updating of the ALL4WELL English language course |
| Description: | The Authoring System for ALL4WELL English course is an Assistant that allows language teachers to further adapt and update the modules to the needs of their learners.<br>Due to the main purpose of the Assistant, the user interface is relatively simple. |
| Target group: | Language Teachers and all partners, Language teachers and blind/visually impaired learners in the wellness sector. |
| Result: | The Assistant was adapted to support the integration of mp3 sound files and text-to-speech functions.<br>The Manual for the Assistant was adapted to include all new features of the All4Well Assistant. |
| Area of application: | The Assistant can not be used to create new types of activities (it is not designed for this goal), but it proved to be very useful in assembling individual lessons by combining existing activity types. |
| Homepage: | http://www.all4well.org/15-2/reports/ |
| Product Languages: | English |

# Product '5 - All4Well English Course'

Title: 5 - All4Well English Course

Product Type: material for open learning

Marketing Text: ALL4WELL English course software for German, Italian and Romanian blind and visually impaired learners working in the wellness sector, to be used through an alternative interactive user interface for language learning using force-feedback devices (joystick and 3D-sound technology).

Description: The English course is addressed to German, Italian and Romanian visually impaired speaking learners working in the wellness sector. The concept comes from the LLP ELLVIS and VET4VIP projects and basic idea was to transfer the existing modules and to adapt these modules to the needs of vi learners in the wellness sector. It has an alternative interactive user interface for language learning using force-feedback devices (joystick and 3D-sound technology) used within both projects mentioned above. The course is designed for beginners learners who – for whatever reason – cannot read or write Braille. Therefore the course focuses on listening comprehension and oral skills and covers level A1. Designed as self-learning course, it can also be used in the classroom.
To support usage in the classroom, the ALL4WELL course is accompanied by the Teacher's Manual (see product n. 3). Instructions, assistance, grammar information or cultural background information are delivered in the learner language (German, Italian, Romanian).

Target group: Blind and visually impaired German, Italian and Romanian speaking learners working in the wellness sector, all partners and language teachers.

Result: The result is a vocational English course. It is the core and main project’s result that consists of a language learning tool, a topic-oriented package modules for German, Italian and Romanian blind and visually impaired learners working in the wellness sector, like masseurs and physiotherapists. For this target group good communicative skills, knowledge of foreign languages and intercultural skills are absolutely necessary. The course helps them to get better employment perspectives.

Area of application: The sound files are included in the English course software (Product n. 5), which can be used as self-learning course and/or combined to a course, for example, as a topic in the classroom, due to its modular design. Its modules are flexible, can be further adapted by the language teacher to a learner's specific needs through the use of the Authoring System (see product n. 4). The specific content of the modules (topics, learning goals, methods) follows the guidelines set by the Qualification Framework and Course Specifications (see product n. 1).

# Product '6-7-8 Sound Packages English, German, Italian, Romanian'

| | |
|---|---|
| Title: | 6-7-8 Sound Packages English, German, Italian, Romanian |
| Product Type: | others |
| Marketing Text: | The product is a package of sound files for German, Italian and Romanian speaking learners containing the whole All4Well course. The complete set of German, Italian and Romanian sound files are included in the software of the All4Well course, as integrating part of the English interactive language learning pathway. |
| Description: | The English/German-Italian-Romanian sound files (and sound messages played by the text-tospeech system of the Windows operating system) are the base elements of the All4Well course that focuses on listening, understanding and speaking skills.<br>Therefore they form the main part of the course together with the course scripts (Product n. 2) and the Teacher's Manual (Product n. 3).<br>In the same way, also for the other two target languages, the Italian and Romanian sound files provide the learners with an authentic language, spoken at a natural pace by different speakers with different accents, taking into account the specific cultural requirement of each country. |
| Target group: | Blind and visually impaired German, Italian and Romanian speaking learners working in the wellness sector; all partners and their language teachers and learners. |
| Result: | The sound files are the core and main project's result that provides a language learning tool for blind people working in the wellness sector, like masseurs and physiotherapists. For this target group good communicative skills, knowledge of foreign languages and intercultural skills are absolutely necessary. The sound files provide the learners with an authentic language, spoken at a natural pace by different speakers with different accents.<br>They help the learners to improve their listening comprehension, and in a more general way, to get better employment perspectives. |

# Product '9 - Evaluation Report'

| | |
|---|---|
| Title: | 9 - Evaluation Report |
| Product Type: | others |
| Marketing Text: | The Evaluation Report contains the description of the results obtained through the testing of the All4Well English course. |
| Description: | Evaluation Report deliverable describes the utilisation and impact of the ALL4WELL course. In detail, the report is focused on the description of the ALL4WELL course testing done by the partners involved in this task, especially the organizations for blind and visually impaired people partners of the project, and their users linked with them who working in the wellness sector. |
| Target group: | Blind and visually impaired German, Italian and Romanian speaking learners working in the wellness sector (or interested to work in); all partners and their language teachers, other trainers/ teachers and stakeholders of this sector, interested in the All4Well English course package. |
| Result: | The language modules have been tested and evaluated as self learning course and in the classroom with learners. Other corrective actions linked to new features, poor sound quality, or technical problems (hardware, operating system, bugs of the software and the content) have been collected, categorized according to importance and priority and delivered to the technicians involved in the software implementation and refinement, who promptly corrected them to give a stability to the software.<br>In detail, have been evaluated the accessibility of English modules, their usage in training activities and as self-learning modules.<br>Also, it was evaluated the adaptability of the English modules, it was refined the language learning modules package.<br>Evaluation of the course through the institutions for the blind has been done via observation of the learners and by questionnaires for teachers and learners.<br>Even that all partners participated in this activity, the main workload was on the institutions for people with blindness and visually impairment. |
| Area of application: | Analysis of the impact in the short and long therms period. Further implementation, improvement and updating of the English course software. |

| Product Languages: | English |

# Product '10 - Communication and Dissemination Plan'

Title: 10 - Communication and Dissemination Plan

Product Type: others

Marketing Text: "Communication and Dissemination Plan" contains the dissemination and valorisation strategy of the whole project. Annex: Dissemination and Valorisation Report.

Description: The dissemination and valorisation strategy of the project has been summarised in a common "Communication and Dissemination Plan", which tries to achieve the following goals:
- Information about the project and the project results
- Sensitisation of training institutions for blind and visually impaired people to new user interface technologies and computer-based language training (especially for the wellness sector)
- Sensitisation of language schools to new user interface technologies and CBT for Blind and Visually Impaired People
- Sustainability and usage of the concept and products after the project's runtime UICI FI produced also a report on the dissemination and exploitation activities, as adding document enclosed to this final report.

Target group: General Public, Associations for People with special needs, Language Schools, Vocational training centers, stakeholders.

Result: In detail, in order to achieve the transferring objectives of the project in the Dissemination Plan it was very clearly stated that is crucial to proceed with activities aimed not only to communicate/promote but also to transfer and exploit the project's results.
So, ALL4WELL planned to hold a series of dissemination events specifically aimed at Language schools and training organizations' for blind and VIP towards the end of the project. These events provided support for schools and training centers concerned about language teaching and developing sensible long term strategies for access of blind and visually impaired people. The project introduced its knowledge and experience to these events as a way of providing support and hands-on assistance to potential users within their context. These events have been based around the best praxis developed within the ALL4WELL project.

Area of application: Dissemination, Valorisation, Exploitation, Transfer

# Product '11- Project Website'

| | |
|---|---|
| Title: | 11- Project Website |
| Product Type: | website |
| Marketing Text: | Official website: http://www.all4well.org where is possible to find a presentation of the project and its products and results and further detailed information and documentation. |
| Description: | Concerning the contribution to the objectives of the project, general public is very important for communicating and for awareness about the needs of blind and visually impaired people. Today internet is the main tool for reaching a relevant audience to be sensitised about potentialities and about restrictions and opportunities connected with visual impairment, including language learning, ICT and labour market. |
| Target group: | General Public |
| Result: | Accessible official website where it is possible to find detailed information on activities, products and results of the whole project. |
| Area of application: | Communication and Dissemination |
