Project Information

Title: MAP:ECVET

Project Number: LLP-LdV/TOI/2007/AT/0029

Year: 2007

Project Type: Transfer of Innovation

Status: completed

Country: AT-Austria

Marketing Text: Medical Assistant Professions = MAP's: transparency and consistency urgently needed! The Austrian Association of qualified Medical-Technical Staff [Verband der diplomierten medizinisch-technischen Fachkräfte Österreichs (DMTF)] is bringing greater transparency and cooperation to European health systems. A trendsetting EU project managed by the Austrian Association of DMTF lead by Dr. Petra & Mag. Robert Herz, make the professions of diagnostic, therapeutic and nursing assistants comparable for the first time.

Medical Assistants' positions (MAP) account for a large percentage of employees in health institutions and doctors' practices. The Medical-Technical Specialist (MTS) is a classic example of a category of medical assistant in great demand in Austria. The three aspects of an MTS's training (laboratory, radiology and physical medicine) give them a specialist role and yet enable them to be deployed flexibly.

Summary: MAP:ECVET - medical assistant professions and ECVET. There is currently no possibility for mutual recognition and crediting of education contents and graduation within the medical assistance professions in Europe. MAP:ECVET will draw on results from precursor ECVET-based projects such as VQTS, EKC and METOIM and devise a model for achieving transparency for the medical assistance professions in Europe.

Description: MAP: ECVET Project
medical assistance profession : European Credit System for Vocational Education and Training

The problem addressed by the MAP:ECVET Project is that there is no possiblity for mutual recognition and crediting of education contents and graduation within the medical assistance profession in Europe. Except for individual bilateral agreements between some European countries, members of this profession are unable to practice it in other European countries and have no way of obtaining professional authorization to do so. This state of affairs minimises their mobility as human resources in this sector and restricts their personal freedom.

The MAP:ECVET Project will draw on results from existing projects already implemented and developed and will devise a model for achieving transparency and professional authorization for medical assistance professions based on the ECVET model for Europe.

Themes:
*** Utilization and distribution of results
*** Labor market
*** Quality
*** Sustainability
*** Lifelong learning
*** Recognition, transparency, certification
*** Equal opportunities
*** Continuous training
*** Initial training
** Vocational guidance

Sectors: *** Human Health and Social Work Activities

Product Types: website
transparency and certification
procedure for the analysis and prognosis of the vocational training requirement
others

Product 'additional result: job description'

Title:	additional result: job description
Product Type:	description of new occupation profiles
Marketing Text:	The job description is neccessary to use the competence based framework.
Description:	This job description gives an abstract overview about the tasks and duties of the medical assistance professions in the scope of practice. The job description should always be used together with the “MAP:ECVET competence bases framework”. Together with the job description it will be possible to compare professions and define their qualifications.
Target group:	experts in education
Result:	job description of "real" tasks and duties of MAP's
Area of application:	The question of responsibility for creating the job description is different in the partner countries. Never the less, it must be guaranteed that experts are creating the job description, knowing exactly the contents and specifications.

Job description empty

job description framework leer final.pdf

http://www.adam-europe.eu/prj/3051/prd/7/2/job%20description%20framework%20leer%20final.pdf

Product 'Result 1.1: Job description (additional result)'

Title:	Result 1.1: Job description (additional result)
Product Type:	description of new occupation profiles
Marketing Text:	The assessment of competences requires a description of the profession. In the project MAP: ECVET a template for job description has been developed. The central questions are: • Which ACTIVITIES are performed in principle? • Is it possible to define main activities? This job description describes activities sequences a profession requires. A good job description also includes information on entry conditions, the training duration and opportunities of developments. To know whether the described profession represents individual skills, requirement profiles by the employer will help. A job description is, however, never all-encompassing, the profession is always. The profession is involved in a constant change process and can therefore not be separated from the viewpoint of the author.
Description:	People from the professional environment! Those people who are in a work process and therefore know the relevant work processes and are able to describe them. Therefore a job description is an inventory of facts (state of the art), what is done in the workplace To ensure an objective result it is necessary that a large group of experts (10 to 20) of the profession check the work processes and the job description and correct and / or customize them if necessary.
Target group:	education facilities, MAP's, employers
Result:	MAP:ECVET job description
Area of application:	education facilities, MAP's, employers, workplace
Homepage:	
Product Languages:	English
