Project Information

Title:	European RecyOccupation Profile
Project Number:	D/03/B/F/PP-146 056
Year:	2003
Project Type:	Pilot Project, project with multiplying effect (2000-2006)
Status:	completed
Country:	DE-Germany
Marketing Text:	The closed-loop waste economy will become one of the most important growth sectors in Europe in the next decade The initial deficit of suitable qua...
Summary:	The closed-loop waste economy will become one of the most important growth sectors in Europe in the next decade The initial deficit of suitable qualification measures in the whole of Europe must be overcome in order for the goal guidelines of the European environmental policy to be reached and to justify the change in structure The European RecyOccupation core profile, which was developed as part of the LEONARDO project, is suitable for adaptation so that the qualification deficit of the unskilled workers in the closed-loop waste economy can be tackled long term. Within the European RecyOccupation Profile –project conditions are to be achieved for the European core profile RecyOccupation to be implemented and expanded in chosen countries.
Description:	
Themes:	* Social dialog * Enterprise, SME * Ecology * Access for disadvantaged * Initial training
Sectors:	* Professional, Scientific and Technical Activities * Other Service Activities

Product 'National implementation concepts'

Title: National implementation concepts

Product Type: others

Marketing Text:

Description: Implementation of the European Core Profile ECO-Recycler in seven national systems

Target group: Direct target group:
Teachers and trainers, social partners, experts and key figures in the sector.
Indirect target group:
Trainees, (skilled)workers, marginally qualified people, the disadvantaged/ people most at a disadvantage in the labour market

Result: Steps for implementation in partner countries for the testing of occupational profile RecyOccupation are prepared and have been tested in pilot cases.
