Main goal of our project

To transfer the results of **TES Project** to **Telework Training of Education and Training Operators** through the adaptation of the Training Modules to the e-Training context, the linguistic localization and the structural adaptation of the main TES products.

Main specific objectives:

- Analyze and adapt TES Model and System and TES Training Modules.
- Implement the linguistic localizations of the T&T Portal and updated Training Modules.
- Plan and implement three Training Courses and three updating seminars
- Realize and publish a book in hardcopy and e-Book format, in Romanian and in all the other Partnership languages different from Italian and English.

In ***"Call for Proposals 2008 and the Guide for Applicants"*** we had selected the below items:

4.1. Programme general objectives:

√	To support participants in training and further training activities in the acquisition and the use of Knowledge, skills and qualifications to facilitate personal development
√	To support improvements in quality and innovation in vocational education and training systems, institutions and practices
√	To enhance the attractiveness of vocational education and training and mobility for employers and individuals and to facilitate the mobility of working trainees

4.2. Programme operational objectives:

	To improve the quality and to increase the volume of mobility throughout Europe of people involved in initial vocational education and training and in continuing training, so as to increase placements in enterprises to at least 80.000 per year by the end of the LLP
√	To improve the quality and to increase the volume of cooperation between institutions or organizations providing learning opportunities, enterprises, social partners and other relevant bodies throughout Europe
√	To facilitate the development of innovative practices in the field of vocational education and training other than at tertiary level, and their transfer, including from one participating country to others
√	To improve the transparency and recognition of qualifications and competences, including those acquired through non-formal and informal learning
	To encourage the learning of modern foreign languages
√	To support the development of innovative ICT-based content, services, pedagogies and practice for lifelong learning.

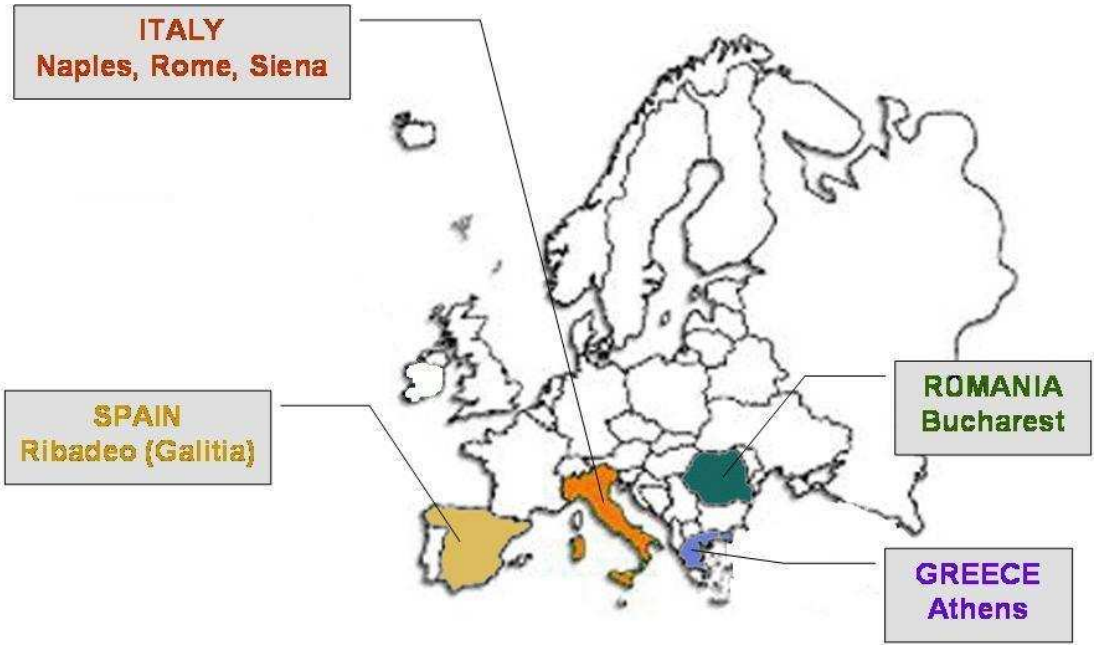
4.3. Contributions to European priorities LdV:

√	Priority 1: Developing the skills and competences of VET teachers, trainers and tutors
	Priority 2: Developing the quality and attractiveness of VET systems and practices
	Priority 3: Transparency and recognition of competences and qualifications
	Priority 4: Skills development of adults in the labour market
	Priority 5: Raising competence levels of groups at risk
	Priority 6: Developing the learning environment

Outcomes

- Training Modules
- e-Learning Courses
- Orientation Seminars
- Book
- "Telework & Training" Portal

Countries involved in project: Greece (ALLWEB), Italy (**CEMSAC, SILABO**), Romania(**CCD, CTANM, ISE**), Spain(**CIFP Porta da Auga**), are represented in the next map:



First activity: 17 – 21 December 2008. Bucharest, project meeting

Tom SAVU welcomed the participants and briefly presented the meeting's timetable and organizational information. Then, the participants presented their organisations. The main subjects at this meeting was:

- "TES – Telework Education System" Project presentation, the TES Portal, TES Teleservices Centre, TES e-Learning Platform
- T&T Project general presentation
- Requests regarding project's implementation

- T&T Project - Objectives, Results and Products
- T&T Project - Methodology and Work Plan
- Overview of ongoing Work Packages
- Administrative and Financial Rules of the LLL-TOI Leonardo da Vinci Programme Expenses Accounting methodology

The project's newsletter will offer articles relevant project data to teachers, about what they need to know to get technology into their schools. It might also give teachers tips on integrating technology into their classrooms. Students and parents may also be interested in applying the concepts to the way they use technology at home.

Project participants data
