Quality Culture through Effective Instruments for Teachers and Trainers

2013-1-NL1-LEO05-12088

http://www.adam-europe.eu/adam/project/view.htm?prj=10765

Projektinformation

Titel:	Quality Culture through Effective Instruments for Teachers and Trainers
Projektnummer:	2013-1-NL1-LEO05-12088
Jahr:	2013
Projekttyp:	Innovationstransfer
Status:	abgeschlossen
Land:	NL-Niederlande
Marketing Text:	How can we create a culture of quality assurance that reaches, influences and impacts the actions of teachers, trainers and teams so that they can improve the quality of every day leaners' experiences in VET? It is an question that this project consortium aims to answer as we regularly find that they view quality as a burden and threat and do not easily use the organisation's processes to improve quality. The partners in this project aim to provide a toolbox and a practical guide/method in six languages to improve the quality of education, with ready-to-use instruments for teachers, trainers, quality staff and mentors.
Zusammenfassung:	Objectives: - develop a quality improvement culture in line with the VET-recommendations where teachers/trainers are active players; - transfer partners' proven Q culture instruments into other consortium organisations - connect management and teachers through the management brochure; - provide an approach with supporting products (instruments), that can be used by VET providers across the EU to improve outcomes of learners.

Produkt 'International and national Reports on Needs Analyses'

Titel:	International and national Reports on Needs Analyses
Produkttyp:	andere
Marketing Text:	The international report is only available in english, but outcomes of the other partners research are used. To get an insight into the different quality approaches of the partner countries and institutions. In order to improve the quality of education we intend to: - develop a quality improvement culture in line with the recommendations of teachers and trainers in VET - learn from partners' proven quality culture instruments and adapt them for other consortium organisations - connect management and teachers through a management brochure - provide an approach, with supporting products that can be used by VET providers across the EU to improve learners' outcomes.
Beschreibung:	National reports: you can open the reports from the Spanish, German, Dutch, UK, Italian and Greek partners by clicking on the country abbreviation. Alle reports are published in english. Aim: to execute national quality research in the partner countries, as input for the quality toolkit and the quality guide, and as input for the International Report on current Needs Analyses in Quality Assurance.
Zielgruppe:	Teachers and trainers, Quality staff, Management of schools, Workfield mentors.
Resultat:	33 instruments to improve quality in VET education, aimed for use by teachers and trainers.
Anwendungsbereich:	The report provides basic information on the development of the toolkit products. These products will be based on the needs and best practices that the teachers describe in the case studies.

Produkt 'Quality Toolkit Qual4T project'

Titel: Quality Toolkit Qual4T project

Produkttyp: andere

Marketing Text: We designed a quality toolkit containing more then 30 instruments, arranged in a number of main themes. Each instrument is supported by a short guideline, adressing teacher or quality staff, or workfield; and can be used both online or as a printed text document. During the pilot phase the tools can be used in EN, ES, NL and IT. After the pilot the final versions will be published in these languages as well as DE and GR.

Content
Subjects addressed in the toolkit are:
- quality culture
- quality cycle implementation (focus on evaluation and review and adoption of the system)
- work-based learning (involving enterprises)
- professionalization and staff development
- innovation in quality assurance.
These subjects have been selected from the ten recommendations from QALLL book three.

Beschreibung: For other languages see the website: www.qual4t-project.org/quality-toolkit

Zielgruppe: Quality staff and teacher/trainers in Vocational and Adult Education and Training.

Resultat: 33 instruments to improve quality in VET education, aimed for use by teachers and trainers.

Anwendungsbereich: The products can be used for quality improvement on different topics, for instance quality improvement in the classroom, peerlearning, evaluation, lesson preparation, contact with the workfield, PDCA cycle.

Produkt 'Quality Guide'

Titel:	Quality Guide
Produkttyp:	andere
Marketing Text:	The Quality Guide offers practical support to users /facilitators of the Toolkit on how to implement the Toolkit. It explains Quality Assurance and Management in everyday language and how these are of relevance to VET. It also includes information on the Quality (PDCA) Cycle, the importance of Work Based Learning, professionalisation of VET staff and Innovation in Quality Actions.
Beschreibung:	We designed a quality guide based on: - the recommendations from the international research report - the toolkit instruments, including transferred best practices - a selected set of recommendations from the QALLL project to be transferred in a new practical guide, usable in VET education to enhance bottom-up quality culture.
Zielgruppe:	Teachers/trainers, quality staff and management.
Resultat:	Introduction to quality assurance and improvement for teachers/trainers in a practical way; explanation of the last phase of the Quality Cycle, the review phase; adressing the need to include learners and the workfield in quality improvement; the connection to European tools like EQARF, EQAVET, NLQAVET and ECVET and the recommendations of both the QALLL project and the member states' VET-representatives at the Vienna quality conference in November 2012.
Anwendungsbereich:	You can read the Quality Guide as an information guide about quality in vocational education and training. By this you will get an overview of current topics on quality management and development. Alternatively you can also use it as a work of reference to get information on different sub areas of quality and quality management. The guide provides an overview and explanation of the toolkit and how to use it.

Produkt 'International Pilot Report'

Titel:	International Pilot Report
Produkttyp:	andere
Marketing Text:	The aim of this international report is to summarize the lessons learnt from piloting the project products before providing a ready-to-use and efficient set of instruments - a toolkit, a management brochure and a practical guide - in partner languages, for “external” teachers, trainers, quality staff and mentors to impact their performances and improve the quality of everyday learners’ experiences in VET.
Beschreibung:	This report will highlight some ideas on how to use and exploit QUAL4T outcomes in the near future and beyond.
Zielgruppe:	Teachers and trainers, Quality staff, Management of schools, Workfield mentors.
Resultat:	33 instruments to improve quality in VET education, aimed for use by teachers and trainers.
