Lifelong Learning Programme

JUBILEE
Job Building Energy Efficiency

NEWSLETTER 4: PARIS // 15-16 October 2015

European Program	Life Learning Program Leonardo Da Vinci Multilateral Projects for development and innovation
Project number	2013-1-FR1-LEO05-49037
Duration	01 October 2013 – 30 September 2015

INTRODUCTION TO THE MEETING AND REPORT OR THE QUALITY MANAGEMENT

After the welcome given by Professor Marvillet, it was explained the situation of the project: basically, Mr. Marvillet informed that the French National Agency had agreed with the amendment presented by the partnership in order to be able to extend the duration of the project until the end of December of this year. As consequence of this resolution, the Jubilee team has three more months to finish the work that they started two years ago.

Mr. Antonio Mir gave a presentation about the situation of each Work Package, and the partners took decisions about the deadlines to finish each task.

BRAINSTORMING ABOUT THE SUSTAINABILITY OF THE PROJECT

In this session, all the institutions participating in the project made suggestions in order to make the Jubilee Project sustainable in the future. Some of the ideas are the following:

- Teachers can use the training materials in their ordinary lessons.
- We can promote Jubilee students mobility for internships in companies.
- To offer to "Talent students" the possibility of travelling to other countries to receive the formation of the module prepared by other schools.

This project had been funded with support from the European Commission. This publication reflects the view of the author only and the Commission cannot be held responsible for the information contained in this newsletter.

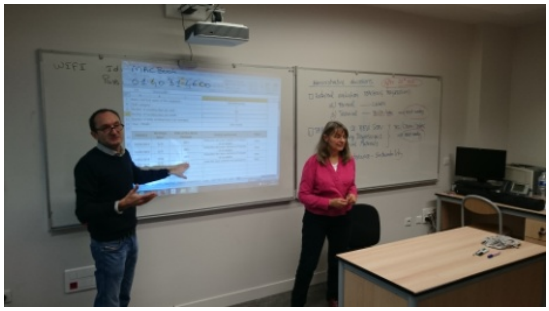
- To offer an "Open Course" with all the modules aimed to unemployed people. We could make a special brochure for this.

VISIT TO THE NEW FACILITIES OF CNAM

Mr. Karim Terki and Mr. François Cougan were the leaders of this interesting visit. Just a few months ago, the **Centre des Formations Industrielles** has inaugurate this new building with many different workshops. Jubilee partners visited those which are related with the areas of Energy, Heating, Cooling, Air-conditioning and renewable energies. A very interesting experience for all the technical teachers!

REPORT ABOUT ADMINISTRATIVE MATTERS AND CONCLUSSIONS

Ms. Martine Drouin –accompanied by Mr. Jean-Luc Rigaud– was responsible of dealing with the last workshop of the meeting: the preparation of the documentation for the Final report. She made a revision of the proper documents to be sent to her, and gave the last announcements regarding the justification of the expenses.



Finally, at the end of the meeting, each partner gave a few words expressing their feelings regarding the experience of being part of the Jubilee team: all of us hope the project to be sustainable. Let's keep working with it!
