What NaSaBau is delivering:

- NaSaBau (Sustainable Renovation and Building)

-is a Project co-financed by the Lifelong Learning Programme of the European Union.

- Is transferring the innovative **SURECON qualifications** to the participating partner countries (Translation and Adaptation to the national framework conditions)

- Is piloting the curriculum in the participating partner countries and evaluating and refining it

- Is applying for the curriculum to be recognised for the purposes of technical training in the partner countries

- Is initiating the integration of the curriculum as a standard component of further training in the partner countries

-Is documenting the project results and making them available throughout Europe.in the form of a Transfer Handbook.

The Transfer of an Innovative Further Training Curriculum for Sustainable Renovation Advisers

Concluding Event

15 September 2015

Leipzig, Germany

Presentation of the Project Outcomes

Discussion Forum
“Europe - Going Forward ”

Lifelong Learning Programme

NaSaBau – Project Conclusion

- Sustainable renovation has a key role to play in the achievement of Europe's climate goals. Europe has over 200 million residential buildings each of which will require major refurbishment approximately once every 20 years. The need for refurbishment represents a valuable opportunity to upgrade a building to achieve a higher level of comfort, reductions in energy loss, preparation for climate change and future proofing in relation to the changing needs of the occupants, changeover to low toxic building materials etc.

- The sustainable renovation of housing stock is a market with enormous potential and of equal interest to manufacturers and sellers of sustainable building materials, planners and the construction trades. For the most part the value added represents a gain for the local economy. Sustainable renovation prioritizes the use of materials, which have a lower environmental load at all life cycle stages from manufacture through transport to processing and are maximally recyclable following demolition (Circular Economy).

-Advisers trained in the SURECON philosophy offer building owners an integrated concept for their renovation project. SURECON advisers focus on the client as the project's starting point and have at their disposal a range of specially tailored communications tools.

NaSaBau – Project Conclusion

Invitation to

The Concluding Meeting
of the NaSaBau Project
(Sustainable Renovation and Building)

ON: Tuesday 15 September 2015
1100 hrs to 1600 hrs

IN: Viktor's Residenz-Hotel Leipzig, Georgring 13, D-04103 Leipzig
(Beside the Main Railway Station)
Leipzig, Germany

Participation is free-of-charge

As places are limited, please confirm your attendance in advance by email to abschluss@nasabau.de

Event and Project Coordination:
EnergieCity Leipzig GmbH:
Ralph Klocke: Tel: 0049 521 3998 3665
Iris Meier: Tel: 0049 341 3559 1627
Email: abschluss@nasabau.de

NaSaBau - Project Conclusion

Programme:

11.00:
Welcome address by Prof. Dr Hans-Jochen Schneider of the NaSaBau Consortium Lead - EnergieCity Leipzig GmbH;

11.15 – 12.15:
- **The Idea behind NaSaBau and SURECON**
- **The SURECON Curriculum**
- **The 10 Day SURECON Training Programme for SURECON Advisers: Dr Ingo Dammer**
