Projektinformation

Titel:	Kompetenzen für eine nachhaltige Entwicklung der Stadt: Qualifikations-Schema zur Klimaanpassung in Bau, Architektur und Planung / CLIM-CAP
Projektnummer:	540313-LLP-1-2013-1-DE-LEONARDO-LMP
Jahr:	2013
Projekttyp:	Innovationsentwicklung
Status:	abgeschlossen
Land:	EU-Zentralisierte Projekte
Marketing Text:	Die Auswirkungen des Klimawandels führen zu einer erhöhten Notwendigkeit von Anpassungsmaßnahmen, um die Belastbarkeit aller Regionen in Europa zu erhöhen. Die praktische Umsetzung von Anpassungsmaßnahmen erfolgt hauptsächlich auf regionaler und lokaler Ebene, insbesondere im städtischen Umfeld. In dieser Hinsicht spielen verantwortliche Planer, Architekten, Entscheidungsträger sowie andere Planungs- und prozessrelevanten Berufsgruppen eine herausragende Rolle. Fehlende Qualifikation in Bezug auf Anpassung an den Klimawandel ist ein Engpass für die Umsetzung. CLIM-CAP soll diese Defizite abbauen durch die Einrichtung einer Berufsausbildung für die oben genannten Zielgruppen, sowohl für den öffentlichen und für den privaten Sektor.
Zusammenfassung:	Anpassung an den Klimawandel ist eine zukunftsorientierte, anspruchsvolle Aufgabe für Berufstätige und Entscheidungsträger in der Stadt-und Regionalplanung. Der CLIM-CAP Weiterbildungskurs enthält Input über Klimaanpassung aus verschiedenen EU-Ländern und leistet damit einen Beitrag für verschiedene Ebenen der Anpassungsstrategien.
Beschreibung:	Basierend auf einer detaillierten Markt-und Bedarfsanalyse hat das Konsortium aus sechs Partnern aus fünf verschiedenen Ländern innovative, zielgruppenspezifischen Lehrpläne entwickelt. Neben Modulen mit Schwerpunkt auf Adaptionstechniken und deren Integration in regionale und lokale Planung werden auch Unterrichtseinheiten mit Schwerpunkt auf Konfliktmoderation und die Einbeziehung der Interessengruppen entwickelt. Der Pilotkurs ist in allen fünf Ländern des Konsortiums getestet worden.
Themen:	*** Nachhaltigkeit *** Lebenslanges Lernen *** Ökologie
Sektoren:	*** Öffentliche Verwaltung, Verteidigung; Sozialversicherung *** Baugewerbe/Bau ** Gesundheits- und Sozialwesen * Wasserversorgung; Abwasser- und Abfallentsorgung und Beseitigung von Umweltverschmutzungen
Produkt Typen:	Lehrmaterial Homepage Programme/Curricula
Produktinformation:	Das wichtigste Projektergebnis ist ein marktfähiger Weiterbildungskurs, der sich mit Klimaadaption in regionaler und lokaler Planung befasst. Auf lange Sicht ist eine europaweite Verbreitung der Schulung geplant, um die Auswirkungen des Projektes zu maximieren.
