Entwicklung eines EU-einheitlichen Konzepts zur beruflichen Ausbildung Auszeichnungen in Abfälle aus dem Gesundheitswesen Management

541982-LLP-1-2013-1-UK-LEONARDO-LNW

http://www.adam-europe.eu/adam/project/view.htm?prj=11093

Projektinformation

Titel: Entwicklung eines EU-einheitlichen Konzepts zur beruflichen Ausbildung Auszeichnungen in Abfälle aus dem Gesundheitswesen Management

Projektnummer: 541982-LLP-1-2013-1-UK-LEONARDO-LNW

Jahr: 2013

Projekttyp: Netzwerke

Status: laufend

Land: EU-Zentralisierte Projekte

Marketing Text: Das Projekt zielt darauf ab, einen einheitlichen Ansatz für die Entwicklung der nationalen Berufsstandards und Berufsbildungsbildungsprogramme für Healthcare Waste Management über den EU-Mitgliedstaaten durch die Entwicklung eines neuen Gesundheitsabfallwirtschaft Qualifikationsrahmen zu schaffen, und E-Learning-Plattform.

Die Partner in diesem Projekt-Team repräsentieren einen Querschnitt der wichtigsten Akteure in der Branche einschließlich der politischen Entscheidungsträger, Entwickler, Trainingsprogramm, Trainingsprogramm liefert, regionalen Umweltzentren, Gesundheitsdiensteanbieter Fachverbänden und Umweltinstituten . Darüber hinaus sind viele dieser Akteure sind Mitglieder von Unternehmen, wodurch die Verbreitung der Projektergebnisse wird effektiv und effizient zu den wesentlichen Anspruchsgruppen in EU-Mitgliedstaaten und Beitrittsstaaten verbreitet.

Zusammenfassung: The new qualification framework developed during the project duration, will enable the EU labour force in the sector to gain a standardised set of skills regardless of the member state in which they undertook the vocational training programme. This will ensure that future healthcare waste managers will have genuine EU educational currency and therefore enabling greater mobility within the EU for this specific labour force.

In addition this approach to NOS and VET will give employers confidence that candidate selection for healthcare waste management posts is based on benchmarked healthcare waste management vocational training awards facilitating selection between candidates.

As a consequence of the new approach to healthcare waste management training the risks associated with healthcare waste management to employees of the healthcare providers will be reduced significantly as employees will be better protected as a result of a higher awareness to the risks and the measures needed to negate those risks.

Lastly the new approach will bring economic advantages to healthcare providers in these difficult financial times as good waste management practice reduces the direct cost of the waste management function through minimising the production of hazardous waste buy implementing effective segregation at source and the hidden costs of treating hospital acquired infections, personal injury to staff and the associated lost time through staff absence as a consequence.

This new approach will also lead to a better performance by healthcare providers as better waste management improves hospital hygiene and more importantly significantly reduces the risk of infection spread. All in all this new approach not only provides for a safer system of operations at the healthcare facilities but it also radically improves the health & safety and environmental performance of these institutions. This has positives not only for the facility footprint but for the broader local environment around the facility.

Beschreibung: The project has the following seven key phases;

1. Review of the current qualifications and training courses available in each of the partner countries
2. Development of a healthcare waste managers qualification framework

Projektinformation

3. Development of an associate training package for the qualification framework
4. Development of an e-learning platform, specifically designed to manage the qualification and training materials
5. Evaluation of the qualification framework and training materials
6. Dissemination of project activities and outputs
7. Formation of a stakeholder network for the project

Produkt 'Interim Report - Public'

Titel:	Interim Report - Public
Produkttyp:	andere
Marketing Text:	Interim report - Public
Beschreibung:	Preparation and submission of the interim report on the basis of work package leader inputs and financial statements at half way stage of the project applying European Commission and National Agency legal, administrative and financial rules of co-financed project management. Evaluation at project level is a crucial step since it allows a mid-term review and a qualitative and quantitative assessment of the results achieved and of the means used to achieve these results in relation to the contractually agreed budget.
Zielgruppe:	National Agency and project partners
Resultat:	The interim report was prepared at half way stage of the project and submitted on 30th July 2015. The work package leader inputs, financial statements and application of the European Commission and National Agency legal, administrative and financial rules of co-financed project management were covered in the report.

Produkt 'Assessment and national reports on the existing training provisions of professionals in the Healthcare Waste Management industry'

Titel:	Assessment and national reports on the existing training provisions of professionals in the Healthcare Waste Management industry
Produkttyp:	andere
Marketing Text:	Each participating country will conduct an assessment of the current available vocational training and vocational qualifications available for healthcare waste management professionals in their country
Beschreibung:	Nine reports, one for each participating country, will be prepared after the respective assessments of the different national VET systems and training programmes. The partners will be responsible for the completion of a single survey, based on their findings at a national level.P4 will be responsible for the co-ordination and collation of information from these reports. P1 will conduct a comparative study and will prepare a final report in WP4, identifying and documenting common and different qualifications' demands and training needs, between the countries. The identified qualifications will be related to the respective NQFs (where applicable). Additionally, the possibilities, means and problems concerning the implementation of EQF/ ECVET and the defined occupational profile in relation to Healthcare Waste Management, will be assessed.
Zielgruppe:	Individuals working or with an active interest in the healthcare waste management and vocational training sectors.
Resultat:	Comparison report based on the outcomes of the 9 national reports prepared by each partner country.
Anwendungsbereich:	Reference material for the development of the EU-HCWM qualification and training package.
Homepage:	www.hcwm.eu
Produktsprachen:	Englisch

EU HCWM Comparison Report 3.3 Existing Vocational Qualification Systems.docx

http://www.adam-europe.eu/prj/11093/prd/3/1/EU%20HCWM%20Comparison%20Report%203.3%20Existing%20Vocational%20Qualification%20Systems.docx
Comparison Report on the current vocational, educational and training programmes & qualifications available within the healthcare waste management sector in each of the participating partner countries (Albania, Greece, Germany, Italy, Poland, Slovenia, Spain, FYROM and the UK)

Produkt 'Communication and Knowledge Exchange Tool'

Titel:	Communication and Knowledge Exchange Tool
Produkttyp:	Homepage
Marketing Text:	The communication and knowledge exchange tool will be an IT platform which will be constructed by an IT expert, appointed by the Lead Partner. The knowledge base will highlight good practices, as well as any information concerning knowledge, skills and competences. The contents concerning each of the participating countries will be clustered together and will form part of the comparative study.
Beschreibung:	The Work Package leader will establish an initial template of issues under which each partner will be asked to provide relevant information. New knowledge developed during the project would be added to the knowledge base including the experiences gained from surveys, workshops, and conferences. Other European and international competent bodies will be invited to add their work. The IT platform will be developed in English. Versions to the other project languages may be created by the involved staff based on the needs of their national networks.
Zielgruppe:	Individuals working or that have an active interest in the healthcare waste management or VET sectors.
Resultat:	Dedicated area of the project website specifically for the dissemination of information and guidance relating to good practices within the healthcare waste management and VET sectors. Additionally, a LinkedIn group has been created for the project network.
Anwendungsbereich:	
Homepage:	www.hcwm.eu
Produktsprachen:	Englisch

Produkt 'EU-HCWM Network'

Titel:	EU-HCWM Network
Produkttyp:	Verbreitungsmethoden
Marketing Text:	A national network will be created in each participating country. The members of the networks will be representatives of all stakeholders' target groups, i.e. direct beneficiaries like vocational training providers and potential learners; policy and decision makers; other stakeholders like local communities, healthcare providers, and environmental organizations. Each member will have to register with the network.
Beschreibung:	A complete database of contact details will be created and this will comprise the EU-HCWM network. The members of the network will be the core recipients of the project activities and outputs. Additionally, they will be asked to participate to the on-line internal evaluation process for the validation of the project products. The final synthesis of the network is anticipated after the completion of the internal validation process.
Zielgruppe:	Individuals working in, or with an active interest in, the healthcare waste management or VET sectors.
Resultat:	LinkedIn group for the project and a network database
Anwendungsbereich:	
Homepage:	www.hcwm.eu
Produktsprachen:	Englisch

Produkt 'Draft National Occupational Standards for a Healthcare Waste Manger'

Titel:	Draft National Occupational Standards for a Healthcare Waste Manger
Produkttyp:	Lehrmaterial
Marketing Text:	National Occupational Standards (NOS) have been developed covering various aspects of healthcare waste management at EQF level 6.
Beschreibung:	Recommendations for the development of a National Occupational Standard, for the common recognition of the qualifications of the Managers in the Healthcare Waste industry within Europe, will be based on the comparative analysis of the respective qualifications in participating countries. The approach adapted will be the enumeration and detailed classification of the knowledge, skills and competences currently required and likely to be required by the Healthcare Waste Facilities Managers over the next 5 years, derived from relative curricula and consultation within the industry. The results will be presented in the form of a matrix in line with the EQF standards. As part of the process, the allocation of credit will be defined; the selection of key areas of learning will be defined and these learning points will be designated and grouped to create distinct learning units.
Zielgruppe:	Professionals working within the healthcare waste management sector, or training/education providers.
Resultat:

Produkt 'Report based on the outcomes of internal evaluation'

Titel:	Report based on the outcomes of internal evaluation
Produkttyp:	andere
Marketing Text:	The internal evaluation will concern the evaluation of the proposed National Occupational Standards and the suggestions by the members of the EU-HCWM Network. The members of the network will be invited to complete an evaluation questionnaire. The evaluation questionnaire will mainly assess the adequacy and relevance of the proposed learning units.
Beschreibung:	he internal evaluation will be realised via the Communication and Knowledge Exchange Tool by the members of the project Network. The outcomes of the evaluation, including the results of the evaluation questionnaire and the forum discussions will be depicted on a report that will be produced by the Work Package Leader. The questionnaire will be available on the IT Platform in English, Greek, German, Italian, German, Catalan, Polish, Slovenian, Macedonian and Albanian. The results of the procedure will be translated by the staff members in English and the report of results will be developed in English as well.
