Course Unit 5:	Human resource management
Sub-units	<p>Develop staff motivation system</p> <p>Develop and implement personnel training programs</p>
Course materials	<p>Human resource management in a supportive role of sustainable development & waste management</p> <p>http://www.academia.edu/1976716/Human_Resource_Management_In_A_Supportive_Role_Of_Sustainable_Development_Waste_Management</p> <p>Collection Efficiency Strategies for Success</p> <p>http://www.epa.gov/osw/nonhaz/municipal/landfill/coll-eff/k99007.pdf</p>
Course description	<p>Operations management is an area of management concerned with overseeing, designing, and controlling the process of production and redesigning business operations in the production of goods or services. It involves the responsibility of ensuring that business operations are efficient in terms of using as few resources as needed, and effective in terms of meeting customer requirements. It is concerned with managing the process that converts inputs (in the forms of materials, labor, and energy) into outputs (in the form of goods and/or services). Operations management teams attempt to balance costs with revenue to achieve the highest net operating profit possible.</p> <p>The training course will aim at people with experience who are willing to take higher position in the company or just to improve and update their knowledge. The concept of the training include 5 mandatory units and 3 optional. The optional units are for those willing to receive more specific knowledge in the topic. The training will develop the core operations management skills and competencies. The core competencies include operations knowledge, planning, control, sustainable development, human resource management and communication.</p> <p>The benefits of attending the course are, but not only: 1. Translate organization goals into operational performance objectives of quality, speed, dependability, flexibility and cost by establishing a solid operational strategy</p>

2. Efficiently utilize resources by employing effective planning and controlling activities; 3. Strategically improve operations by applying more modern approaches.

Qualification profile

After the course each participant should:

Know how to:

- Describe the operating procedures for plant management
- Use the bureaucratic processes and the appropriate reporting forms
- Implement the main principles of sustainable development
- List the main environmental aspects and impacts of collection of recyclables
- Develop methodology for reducing the impact
- Support learning and development within own area of responsibility
