Job-Trainer für Menschen mit geistiger Behinderung und Autismus-Spektrum-Störungen

2013-1-IT1-LEO05-03995

http://www.adam-europe.eu/adam/project/view.htm?prj=11120

Projektinformation

Titel:	Job-Trainer für Menschen mit geistiger Behinderung und Autismus-Spektrum-Störungen
Projektnummer:	2013-1-IT1-LEO05-03995
Jahr:	2013
Projekttyp:	Innovationstransfer
Status:	bewilligt
Land:	IT-Italien
Marketing Text:	Der Vorschlag hat das Ziel, ein Produkt auf die Ausbildung Projekt übertragen "Facilitator der Arbeitsvermittlung für Menschen mit geistiger Behinderung und Autismus-Spektrum-Störungen", finanziert von der Provinz Reggio Emilia in das Jahr 2011 (Ref. PA 2011-1219/RE). Das Projekt legte die Fundamente auf der Überlegung, dass die Fragen der Arbeit und der sozialen Integration von Menschen mit Behinderungen zu den Top-Prioritäten der Sozialpolitik Interventionen, sowohl auf europäischer als auch auf nationaler und regionaler Ebene sind. 3 Prototyp Werte oder innovative Inhalte identifiziert werden: a) Das Kompetenzprofil der "Job-Trainer für Menschen mit geistiger Behinderung und Autismus-Spektrum-Störungen" b) Das Trainingsprogramm zu entwickeln, der Job des Trainers Kompetenzen c) Die Geräte (Werkzeuge, Richtlinien und Nutzung Protokolle) sowohl auf die pädagogische Organisation der Job-Trainer-Programm und ihre Praxis ausgerichtet.
Zusammenfassung:	The RATIONALE of the proposal basis on the need to train VET experts to be reference figures in the processes of job inclusion in company contexts for people with intellectual disbility and autistic spectrum disorders. MAIN AIM is to transfer (it's a geographic, linguistic/cultural and functional transfer, from IT to AT, ES, MT, TR and from autism to a wider spectrum of intellectual and psychic disabilities) of the products and the training programme Ref PA 2011-1219/RE funded in 2011 with ESF funds by Province of Reggio Emilia: a) the job Trainer's system of competences to: analyze each individual's disabilities and potentials with reference to their social context; single out and select the host work context in order for it to meet the individual's expectations, potential and sensorial charateristics, identifying the company goals and analysing the requested skills/abilities; strengthen soft skills and abilities, as well as vocational ones that may favour the idividual's job placement in the host context; manage and foster the person's job placement in the company: b) the training programme organized in 4 UC on the model of the "Regional Qualification System" standards of Regione Emilia Romagna to cover which 7 TU foresee different methodologies (classroom, individual Project Work, in- context learning). The latter is the moment in which participants are given the opportunity to practice "on the job" the skills they have learned by "matching" an individual with intellectual disabilities and/or autistic spectrum disorders who wishes to benefit from a job placement experience in a company on the free market; c) the devices (tools, guidelines, protocols of use) aiming at both the pedagogical organization of the job trainer's course and its practical role. The expected outcome is the complete transfer, spread and dissemination of the 3 products described (as Training Model) for developing the competences and good practices necessaries to facilitate the employment of disabled people. Foreseen impacts refer to (among others): the trained VET personnel acts as a "spill over", ensuring a structural support in transition times; the VET system becomes more attractive as a more inclusive place that backs up disabled people in a true "life plan", preventing them from risks of marginalization and depletion; companies competitiveness is increased by the implementation of personnel that is appreciated in their capacities. Partnership: guarantees 1) representativeness of both direct (VET personnel, through P0 and P4) and final target groups (autistic and intellectual disabled people, through P2 and P3; in particular P2 is the spokesperson of 3,3 million autistic people in EU); 2) foreign partners from countries that particularly need to develop job integration policies aimed at disabled people (P3); 3) expertise on the management of transnational, multi-lateral transfer projects.

Projektinformation

Beschreibung: The specific objectives of the transfer are the checking of the validity, usability and limits of work integration of people with mental and intellectual deficit with respect to organizational contexts, through the use of job trainers that have been trained for that purpose, as it was experienced in the local project. The best practices/products transferred are adopted, adjusted and become a standard in the new context conditions of the partners who will take turns as transfer leaders to better ensure the identification of the limits and conditions under which effectiveness and validity of the transferred prototype persist.

From the comparison between the different results of the contextualization comes the added value of this proposal to the various transferred practices/products, in terms of their optimal and “widespread” standardization (transferrable validation, sustainable reproduction and valorisation at further stakeholders).

Themen:
*** Arbeitsmarkt
*** Lebenslanges Lernen
*** Sozialer Dialog
*** Zugang für Benachteiligte
*** Chancengleichheit
*** Weiterbildung
** Berufsorientierung und -beratung
** Unternehmen, KMU

Produkt 'QUALITY PLAN'

Titel:	QUALITY PLAN
Produkttyp:	andere
Marketing Text:	The Quality Action Plan aims to ensure quality assurance and outcomes of high quality in the following three project areas: a) Project Performance b) Project Main Products/Outcomes c) Project Impact
Beschreibung:	This action plan is part of the external quality assessment process that is applied in the project in order to monitor the project performance and assure the high quality standards in its implementation. It is based on the discussions and agreements between the partners and the external evaluator that took place at the kick-off meeting in Reggio Emilia at CSPMI premises.
Zielgruppe:	Partners
Resultat:	The Quality Action Plan is structured as a live/online spreadsheet from googledocs.
Anwendungsbereich:	The Quality Action Plan will remain as a live and online document that as such facilitates transparent revisions according to the project progress and achievements.

Produkt 'FINAL COUNTRY REPORTS WP 2'

Titel: FINAL COUNTRY REPORTS WP 2

Produkttyp: Verfahren zur Analyse und Prognose des Berufsbildungsbedarfes

Marketing Text: 5 country reports (IT, MT, AT, ES, TR)

Beschreibung: The reports intend to present the results of the analysis made in each country that aim to check the useability (in terms of value in use), the limits and the expectations on the training and profile of "Job trainer"
course:
Facilitator of the job placement for persons with intellectual disabilities and autism spectrum disorders

Zielgruppe: The analysis was conducted through an inquiry where questionnires and interviews were used;
teachers and educators have been involved in the surveying of product reuseability, whereas the Services in charge of disabled persons' job placement, parents' associations, disabled persons' families, people in charge of social co-operatives, stakeholders and enterprises have been involved with respect to the expectations on the useability of the training course.

Resultat: The analysis of the re-usability of the training programme has enabled teachers and educators involved in the research to point out the importance of acquiring skills to design the transition to employment of disabled students and to emphasise the separateness that characterizes the world of education with respect to the world of Labour. The analysis of the expectations of the proposed training model, conducted involving the
families, the dedicated services, the representatives of associations, the stakeholders and the businesses, refers to the same need to adapt the skills of school personnel to the diverse needs of people with disabilities. The expectations are oriented mainly on the development of specific knowledge regarding the different types and capabilities of individuals, the ability to network, identify and activate the opportunities offered by the territory, increasing the knowledge of the workplace to align education with the needs of businesses.

Anwendungsbereich: Schools, training agencies, stakeholders

KICK OFF MEETING in REGGIO EMILIA

Datum	27.11.2013
Beschreibung	Project launch - WP 1 "Project Management". The aim of this WP is to ensure the complete coordination of roles and resources among partners, by sharing the project's key objectives and gradual alignment of practices on assumptions of synergy and complementarity among the roles identified in the process of drafting the proposal. In the scope of WP1 the kick off meeting of the project is planned and the co-ordination rules are defined with respect to the progress of the project and for the management of the communication that is necessary to the coordination of activities. As Applicant of the proposal, the responsibility of WP1 is entrusted to CENTRO SERVIZI PMI (IT - P0). The responsibility of the monitoring with learning function is entrusted to an expert which is not part of the consortium (CYBERALL ACCESS – Greece) to ensure a greater objectivity in evaluation. Purpose of the Kick Off Meeting: - Sharing of project goals among partners - Detailed planning of activities related to the different WPs - Budgeting and administrative management of the project activities - Structuring of the implementation procedures and support to the organization of activities - Reporting and communication among partners - Monitoring of the progress and quality control of processes/outcomes of the project.
