Co-Construire une Bonne Orientation

2013-1-IT1-LEO05-04029

http://www.adam-europe.eu/adam/project/view.htm?prj=11128

Information sur le projet

Titre:	Co-Construire une Bonne Orientation
Code Projet:	2013-1-IT1-LEO05-04029
Année:	2013
Type de Projet:	Projets de transfert d'innovation
Statut:	Clôturé
Pays:	IT-Italie
Accroche marketing:	Le projet a transferé une méthode innovante d'orientation basée sur la créativité, l'art et les TIC dans 37 domaines professionnels. Êtes-vous intéressé à adhérer au projet?

Résumé: The intent to plan the TOI starts from the results achieved by the LdV Partnership project “Co-Building a Good Guidance”, awarded by the European Commission with the “Star Project 2011” label.
The main problem analysed by the partners reveal how the students have problems to find appropriate jobs after the end of their studies. The students don’t know what to do in the future and express fear to enter in the labour market. The main cause of these problems is the poor motivation of the students. A part of the target group would like to change training because the present training is not appropriate for them after a while. Furthermore, they express a general fear of not finding a job, a condition that increase their confusion about the training they are following.
The project purpose is to improve the motivation for school of the students. In order to achieve the project purpose two main results must be achieved : decreased number of students that would like to change training and increased ability to think about career choice. The achievement and sustainability in time of the purpose can lead to the following general objectives for the students: decreased drop out, decreased problems of finding appopriate jobs, improving their insertion in the labour market; reducing fear to enter in the labour market; improved knowledge of their future career and quality of life, taking in account the respective situation of girls, of boys and both.
The italian applicant organisation coordinated the Partnership Project that generated the transferable guidance method and instruments. The Romanian Inspectorates of Education, the French international centre of education of Montpellier, the Dutch regional training centre Noorderpoort, the Latvian special boarding school development centre and the Conference for adult lifelong learning of southern Switzerland participate in the transfer of the method as core-partners. The EDU-VET Institutions of the italian and french partners support their work in the dissemination, exploitation, and sustainability of the project.
The partners involve in the project 87 schools in 5 Countries for a total amount of 2.955 students attending their 2nd year of professional and vocational training in 35 different training sectors.
The project leads to the description of 35 professions made by the students with the transferred innovative method of guidance. The preliminary analysis and the experimentation of the transfer in a sample of schools anticipate the geographical and sartorial transfer of the method in the participating Countries. Students improve their transversal and key competences thanks to the transferred method.
The partners are going to exploit the project results and deliverables for three training years after the project end. The EDU-VET Institutions and the stakeholders network of each partner are going to disseminate and exploit the project in their territories in cooperation with the partners.

Description: The students of each partner, in cooperation with the guidance and training staff, develop a new tool/instrument for the description of a profession in a specific sector using the visual arts as a mean of expression.
The didactic approach is multi disciplinary. It is essential the active involvement of a guidance operator/trainer for the coordination of the didactic activities with the other trainers involved. The trainers are going to guide and coach students, they will manage the creative, management and operational aspects of the activity in autonomy.
The development of the innovative guidance method is going to increase the following competences of students: Key competences: languages, ICT, Mother

Information sur le projet

tongue communication; Transversal competences: creativity, autonomy, time management, work in groups, problem solving, communication, self-confidence, motivation, personal development, leadership, responsibility, organisation skills, learning, actor/ Proactive/ Active part, self-awareness, gender awareness, equal opportunities; Technical competences : professional skills, health and safety in work place, quality assurance, workplace organisation.
The transfer of the innovative method is organised in two phases. The coordinator transferred the method to the partners in the first year, supporting them in the adaptation of the didactic activity in the training curricula of the selected schools. The partners applied the method in one school per type (professional, vocational, apprentices, etc.) in the first year, while in the second year they are going to work on the geographical spread of the transfer. The experimentation of the method in a sample of schools allowed the partners to learn and apply the innovative method of guidance, adapting it to their different contexts if necessary, before to spread its transfer at geographical level.
The partners agreed to apply the method as curricula activity in order to be easier to include it in the training activities of the involved schools.

Thèmes:
*** TIC
*** Orientation professionnelle
*** Accès pour les personnes moins favorisées
*** Formation initiale

Sectors:
*** Industrie Manufacturière
*** Agriculture, Sylviculture et Pêche
** Activités de Services Administratifs et de Soutien
** Transports et Entreposage
** Commerce; Réparation d`Automobiles et de Motocycles
** Construction
** Production et Distribution d`Eau; Assainissement, Gestion des Déchets et Dépollution
** Production et Distribution d`Électricité, de Gaz, de Vapeur et d`Air Conditionné
** Hébergement et Restauration
** Santé Humaine et Action Sociale
** Information et Communication
** Enseignement
** Arts, Spectacles et Activités Récréatives

Types de Produit:
Film
Modules
Autres
Procédure pour l'analyse et le pronostic des besoins de la formation professionnelle
Enseignement à distance
Matériel d'apprentissage
Matériel pour l'enseignement
Site Internet
Méthodes d'évaluation

Information sur le produit:
The main products developed by the project are:
- questionnaires for students, trainers and parents;
- on-line database with analysis results;
- ECVET matrixes for students and trainers;
- 37 professions descriptions made by the students;
- quality assurance toolbox;
- dissemination and exploitation materials.

Produit 'Questionnaires'

Titre:	Questionnaires
Type de Produit:	Procédure pour l'analyse et le pronostic des besoins de la formation professionnelle
Texte marketing:	
Description:	The questionnaires were used by the partners to analyze the problems and difficulties of students in initial vocational training about guidance. There are three questionnaires, one per target group: students, trainers and parents. Each questionnaire is made of 23 questions that analyze the guidance problems and difficulties of students before the choice of the training and within the training course.
Cible:	The questions were adapted to three different target groups: students, trainers/teachers and parents.
Résultat:	The result allowed to understand the perception of the three target groups about the problems and difficulties of the beneficiaries (IVT students), stressing out trends and difficulties to be solved.
Domaine d'application:	Vocational schools Technical schools Professional schools General schools

Produit 'Training of trainers'

Titre:	Training of trainers
Type de Produit:	Matériel d'apprentissage
Texte marketing:	
Description:	The partners trained the trainers of the 64 schools involved in the project with training seminars/workshops. The partners had been trained by the coordinator in the 1st transnational meeting. The partners used the following products to carry out the activity: - method presentation - training of trainers programme - videos made by the trainers
Cible:	Trainers/teachers Guidance operators
Résultat:	The result allows to apply the training of trainers in any school/Country using the available material: - method presentation: useful to understand how to apply the innovative method in the classes (step by step didactic method) - training of trainers programme: useful to set up and develop training seminars/workshops - videos: useful to put in practice the training received and to have an idea about the method content.
Domaine d'application:	Vocational education General education Technical education Pre-secondary, Primary education

Produit 'Competences Assessment Matrixes'

Titre: Competences Assessment Matrixes

Type de Produit: Méthodes d'évaluation

Texte marketing:

Description: The assessement matrixes allowed the partners to evaluate the impact of the transferred method in the development of the students and trainers skills and competences.
The matrixes include Unitis of Learning Outcomes and Learning Obejects realted to the key, transversal and tecnical competences developed by students and trainers.
Each Partial Competence of a Unit of Learning Outcome is described in steps of learning using the Boom Taxonomy and the ECVET holistic approach.
The partners defined two assessment matrixes: one for students and one for trainers.
The partners agreed as well assessement guidelines in order to help involved schools and trainers to use the evaluation tool properly.

Cible: Students
Trainers

Résultat: The guidelines of assessment include the process of evaluation that trainers should use to evaluate the competences that students and trainers achieve thanks to the innovative method of guidance.

Domaine d'application: Vocational education
Techincal education
General education

Produit 'Description of the professions'

Titre:	Description of the professions
Type de Produit:	Film
Texte marketing:	
Description:	The students of the involved schools described their future profession with the use of visual art and ICT within the international contest "Steps to my Future". The result leaded to the description of many profesisons in different Countries. The objective is to set up a European guidance database of profession descriptions that can be used by students to understand what they might do in their future if they choose a particular training course.
Cible:	Students of pre-secondary education Students in initial vocational training Parents
Résultat:	The result help students and families in the choice of the proper training course. The youth language of the products/results and the social media used to disseminate them will help the partners to achieve their goal: to help students with guidance difficulties and to avoid guidance errors and drop out.

Produit 'Common Units of Learning Outcomes'

Titre: Common Units of Learning Outcomes

Type de Produit:

Texte marketing: The partners verified the ECVET matrixes set up for students and teachers assessments in order to compare their standard training profiles and find out similar units of learning outcomes to be used for future common mobility activities.

Description: The result allowed the partners to identify the common Units of Learning Outcomes of their training profiles:
1. students
- key competences and technical competences are commonly included in all partners training profiles
- transversal competences have too many differences among partners (none of the 5 competences is common to all partners)
2. teachers/trainers:
- key competences: Netherland and Latvia do not have 1 of the 2 competences in their trainer profiles
- transversal competences: all partners trainers profiles include all the competences
- technical competences: Latvia does not have 1 of the 2 competences in the trainer profile; all other competences are included in the trainer profiles of the participanting Countries.

Cible: Students and trainers

Résultat: ECVET matrix

Domaine d'application: Vocational education

Produit 'Final report of the transfer'

Titre:	Final report of the transfer
Type de Produit:	
Texte marketing:	The report will be useful for new schools, institutions and policy makers interested to apply the method. The report allowed the partners to measure the project impact.
Description:	The final report of the transfer collects the strenght, weaknesses, benefits and difficulties of the partners in the development of the transfer. It includes as well the processes used by each partner to develop the activity and the final evaluation of the competences acquired by students and teachers.
Cible:	Students, trainers, EDU-VET institutions, project managers, stakehoders

Produit 'Quality assurance reports and toolbox'

Titre:	Quality assurance reports and toolbox
Type de Produit:	
Texte marketing:	The evaluation reports enabled the partners to ensure the development of the project by analyzing the quality management of the project, the state of development of the WPs and activities, the amount and quality of products / deliverables produced, and the link between what has been achieved and the expected results. The toolbox collects the instruments and tools used by the coordinator and the evaluator (P9) to monitor and evaluate the project cycle management.
Description:	The reports helped the partners to identify / highlight critical issues and problems in order to solve them promptly. At the same time the eports allowed the coordinator and partners to assess the level of achievement of results and to verify the quantity and quality of work performed. The result will allow the partners to have at their disposal monitoring and evaluation instruments for the future transfer and sustainability of the transfer.
Cible:	project managers, partners, stakeholders
