Project Information

Title: SECOND CHANCE

Project Number: 2013-1-CH1-LEO05-00866

Year: 2013

Project Type: Transfer of Innovation

Status: completed

Country: CH-Switzerland

Marketing Text: TAKE YOUR SECOND CHANCE AND BUILD YOUR FUTURE, THANKS TO A TRAINING PATHWAY, WHICH WILL ALLOW YOU TO GAIN A QUALIFICATION.

Second Chance is an alternative training pathway leading to a Vocational Education and Training (VET) qualification customised especially for young adults aiming to gain a first professional qualification.
The training model developed during the project is dedicated to young adults who wish to gain access to a first VET (Vocational Education and Training) qualification and offers an alternative and modularised opportunity to those who wish to be involved in a personalised training.
The Second Chance project developed a modularised training model, which integrates workplace learning, informal experiences and recovery of basic knowledge, skills and competences in order to facilitate young adults to access to a qualification through lifelong learning.

Summary: Studies carried out in Switzerland and all over Europe, have shown that risks of unemployment and marginalisation from the labour market are correlated with a lack of qualification.
In particular, young adults who prematurely interrupt their training cycles (“drop out”, early school leavers and etcetera), face serious difficulties to integrate themselves in a stable manner in the labour market.
Despite good purposes and active measures undertaken all over Europe to fight early school leaving, the issue is still open and specific efforts should be made in order to promote qualification pathways addressed to young adults. In this sense flexible offers of learning opportunities with personalised training pathways can be a way to facilitate the achievement of a recognised qualification. Furthermore, workplace learning, informal experiences and recovery of basic knowledge, skills and competences should be better integrated in a comprehensive learning setting.

Starting from a previous German national project (named EPRO), the Second Chance project developed a comprehensive training model, which is trying to answer the following questions:
-How to develop flexible and personalised training, able to facilitate the acquirement of a proper professional qualification, dedicated to people who risk to be left out from the labour market?
- How to aid them to approach a professional training opportunity?
- What measures should be adopted in order to recuperate the basic competences needed for professional training?

Description: The main goal of the Second Chance project was to target the social and labour market exclusion of unqualified people by developing and implementing a new alternative training opportunity leading to a Vocational Education and Training (VET) qualification.

The main goal was pursued by:
- The contextualisation of the EPRO experience in order to elicit the key conditions / requirements needed for the successful implementation of the Model, comparing it to different experiences developed in Switzerland and in the other partner countries.
- The transfer of the EPRO model by adapting it to the retail sector and to its exigencies, to the needs and the regulation of the Swiss VET system - taking into account the peculiarities of the VET systems of the other participating countries.
- The definition of an innovative Model, including the design of a modular qualification path.

Project Information

- The development of Guidelines for the application of the Model in other countries.
- The activation of a Swiss Steering Committee (including institutions and social partners), and a transnational Steering Committee to guarantee a wider impact of the project at a European level.
- The dissemination and exploitation of the Model, by planning and launching a Raising Awareness Campaign.
- The promotion of the pilot implementation of the Model, initially in the field of Retail and Trade sector in Ticino Canton.
- The development of operational partnerships involving stakeholders and key actors in the field of Initial and Continuous Vocational Training and Active Labor Market Policies, in order to consolidate the practice at a local as well as transnational level (valorisation and consolidation).

Themes:
*** Access for disadvantaged
*** Continuous training
*** Initial training
** Labor market
** Lifelong learning
** Recognition, transparency, certification
** Vocational guidance
* Enterprise, SME
* Equal opportunities

Sectors:
*** Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles
*** Education

Product Types:
teaching material
website
others
program or curricula
modules
procedure for the analysis and prognosis of the vocational training requirement

Product information: During the project the following main products were developed:

- An analysis grid to collect and compare information about VET systems, early school leavers phenomena, NEETs, youngster unemployment, and etcetera, in the different countries involved.
- A virtual case study to analyse the training opportunities for low qualified people in the different countries involved.
- A national benchmarking report presenting the situation of every country involved in the project.
- A European summary report, summarising and comparing the data collected through the analysis grid and the National benchmark reports.
- A modularized training model including learning units description and training tools.
- A set of Guidelines aiming at presenting the model, the procedures, the actions useful to implement the Second Chance model.
- A training programme explaining how the modular structure, the learning units were developed in Switzerland and additionally a training programme adapted to the Polish VET system and needs.
- A toolbox collecting the tools used in the project.
- Logo and coordinated image of the project.
- Flyer, brochures, Powerpoints presentations and etcetera used to present the Second Chance project and model.
- The Second Chance Website, presenting the project and collecting the products produced.
- National stakeholders workshop in every country.
- A raising Awareness Campaign including the development of the “Chance Giver” concept (assessment grid and chance giver label) for companies promoting Second Chance training opportunities and the Second Chance Prize to award people who undertook a qualification path according to the Second Chance philosophy.
- A pilot formative workshop addressed to stakeholders, VET actors and trainers.

Project Information

- A final conference presenting and discussing the main outcomes of the project.

For a detailed list and to download the products, please refer to the project's Internet site (http://secondchanceproject.net) or to the "products" section of this platform.

Product 'Common analysis grid'

Title:	Common analysis grid
Product Type:	procedure for the analysis and prognosis of the vocational training requirement
Marketing Text:	Grid to collect information and compare the situation about VET systems, NEETs, youngsters' unemployment and second chance training and programs in the different participating countries.
Description:	The analysis grid is a useful tool to collect information and relevant facts and figures. The grid was integrated in the National Benchmark Report and provides comparable data about the situation in the different countries involved in the project. In addition to the grid, the consortium also developed a short questionnaire to collect information about training opportunities in the retail sector.
Target group:	Internal (Projects' partners)
Result:	Common analysis grid (.pdf/word document) and questionnaire about training in the retail sector (.word document)
Area of application:	The analysis grid was used to collect information and relevant facts and figures that helped the consortium to understand how to develop the Second Chance model so as to be suitable in different contexts. The data collected constitutes the National benchmarking report, which permits to compare the situation of the different countries involved. More than this other data and study were collected and used to compare the situation in the different countries.

Product 'European summary report'

Title:	European summary report
Product Type:	others
Marketing Text:	The European report summarizes and compares the data collected through the National Benchmark Reports.
Description:	The summary report groups and compares data and information collected by the partners of the consortium. It provides an overview of the situation and highlights differences and common points about VET systems, youngsters' unemployment, early school leaving and second chance opportunities.
Target group:	Internal (Projects' partners), stakeholders, National agencies, European commission.
Result:	European summary reports (.pdf document) produced with the contribution of the whole consortium.
Area of application:	The summary report highlighted emerging needs in different European countries and provides useful information for the development and the transfer of the second Chance model.

Product 'Learning units'

Title:	Learning units
Product Type:	program or curricula
Marketing Text:	The Learning units define the contents of the Second Chance modular training pathway.
Description:	The learning units have been developed in a modular way in order to offer a flexible qualification pathway leading to a certification in the retail sector.
Target group:	Internal (Projects' partners, Swiss and transnational committee), National and local institution and stakeholders.
Result:	Structured learning units (collected in a .pdf document) describing the training contents of the Second Chance model.
Area of application:	The learning units are the basis of the Second Chance model and have been designed specifically for the training in the retail sector but are easily transferable to other sectors

Product 'Second chance guidelines'

Title:	Second chance guidelines
Product Type:	program or curricula
Marketing Text:	Guidelines give useful information to transfer and implement the Second Chance model.
Description:	The guidelines aims at presenting the Second Chance model as an integrated set of procedures and means, sustainable in different institutional contexts, thought to foster the reintegration of early school leavers and drop out in a qualification pathway. The guideline focuses on challenges to be faced and on actions to be undertaken to give a “second chance” to people without a formal qualification. Furthermore the guideline gives some suggestions about the competences and the skills needed by the trainers and about how to train the trainers dealing with low qualified people.
Target group:	Internal (Projects' partners, Swiss and transnational committee), National and local institution and stakeholders
Result:	Manual including guidelines and recommendations to transfer, adapt and implement the Second Chance model (.pdf document)
Area of application:	The guidelines focuses on challenges to be faced and on actions to be undertaken to give a “second chance” to people without a formal qualification. The guidelines gives all the main information about how the Second Chance model was thought and developed, stressing out the attention on the key elements for a successful transfer and implementation of the model.

Product 'Second chance Toolbox'

Title:	Second chance Toolbox
Product Type:	teaching material
Marketing Text:	Collections of tools for the model implementation.
Description:	The toolbox gathers the main tools used during the project, to collect and analyse information and to develop the Second Chance training model. The toolbox includes: documents produced during the project, teaching aids produced by the EPRO model in Germany and other means produced by the partners in previous projects. The toolbox also collects a set of possible tools and teaching aids, which can be used for the implementation of the training modules particularly during the assessment phase.
Target group:	Internal (Projects' partners, Swiss and transnational committee), National and local institution and stakeholders
Result:	Collection of tools and documents, presented in their original language, collected by the partners (downloadable on Second Chance Internet site). The different tools are downloadable under: http://secondchanceproject.net/en/toolbox
Area of application:	The toolbox incorporates different resources that have been used to develop the Second Chance model and that can be a useful source of inspiration for the transfer of the model in other national system or to other economic sectors.

Product 'Second Chance website'

Title:	Second Chance website
Product Type:	website
Marketing Text:	Project website
Description:	The website presents the project main information and results and offer th possibility to download different documents and products produced during the project.
Target group:	Internal (Projects' partners, Swiss and transnational committee), National and local institution, stakeholders, media, specific target groups and generic public
Result:	Website
Area of application:	The website is an important information tool used to communicate and disseminate the main outcomes of the project.
Homepage:	http://secondchanceproject.net/
Product Languages:	French English German Italian

Product 'Publications'

Title:	Publications
Product Type:	others
Marketing Text:	Newspaper, magazine and blog articles published trough specialised printed or online media.
Description:	Publications are part of the dissemination strategies of the project and aimed at presenting Second Chance to a wider public and more in general to raise the awareness about the need of second chance training opportunities for young adults without a qualification.
Target group:	Internal (Projects' partners, Swiss and transnational committee), National and local institution, stakeholders, media, specific target groups and generic public
Result:	Articles publicised trough digital and paper media. A selection of publications can be downloaded on the Internet site: http://secondchanceproject.net/en/download-links/
Area of application:	Dissemination and communication of the project.
Homepage:	http://secondchanceproject.net/en/download-links/

Product 'Chance Giver label'

Title:	Chance Giver label
Product Type:	others
Marketing Text:	The Chance Giver label is dedicated to companies that effectively support and facilitate the access of their low qualified employees to vocational training and qualifications.
Description:	The Chance Giver concept was developed by the consortium in order to give recognition to companies investing in the basic professional training of their young adult employees, especially those needing to recover a first vocational qualification. In addition to the general concept of the label the consortium also defined a self-assessment procedure, based on an assessment grid, for the interested companies.
Target group:	Companies, stakeholders and authorities.
Result:	Chance Giver concept and assessment procedure for companies (.pdf document)
Area of application:	The Label is a tool to encourage companies to promote Second Chance training opportunities on the workplace. It is a marketing tool useful to approach the companies and capture their attention.
