Projektinformationen

Titel: ON-LINE. Learning to improve quality of life. New ways of access to multimedia learning for people with learning disabilities

Projektnummer: D/04/B/F/PP-146 104

Jahr: 2004

Projekttyp: Pilotprojekt, Projekt mit Multiplikatorwirkung (2000-2006)

Status: laufend

Land: DE-Deutschland

Marketing Text: Online
is a learning-project and
tries to develop a new learning culture especially for those young people, who have difficulties in learning.

...

Zusammenfassung: Online
is a learning-project and
tries to develop a new learning culture especially for those young people, who have difficulties in learning.

Online
will be offered a chance to use multimedia techniques without barriers.

Online
will understand learning as part of life quality. This life quality must be fostered and deepened throughout their life – maybe, they need assistance or not.

Online
will be developed and evaluated
together with this "special learners".

table of content:

• To understand learning as a process of one's own activity and a self constructing process – to plan one's own learning.
• A new understanding of the SEN learner, who will more and more accept the responsibility for his own learning, but may need assistance.
• A new understanding of the role of the teacher, who will be an adviser and a assistant, who accompanies learning.
• Arranging new settings for learning, which help the student in his way of learning and make learning easier for him.
• Besides the classical methods of learning there will be used new ways of study techniques: methods, which are self organized, which are computer assisted and if possible close to the working place.
• Using new media in an innovative way (e.g. computer competence/basic skills for the target groups).
Multiple learning
• arrangements in different places for learning (adult learning centres, libraries, museums, virtual colleges)
• Different social settings for learning (single learning, learning with partners and in groups, with the help of mentors and in tandems)
• "Learning is a pleasure" – this will be the character of the learning atmosphere in combination with positive incentives for learning.

Produkte

1 Learning incubator

Produkt 'Learning incubator'

Titel: Learning incubator

Produkttyp: Unterlagen für offenen Unterricht

Marketing Text:

Beschreibung: Learning incubator: information package with project description (virtual handbook), tools as: description of step-by-step approach for counselling as On-line planning for the future, learning material, teaching material, best practice

Zielgruppe:

Resultat: Set-up of a homepage of the project where all relevant data and products on the project will be available for down loading as well as a discussion database for exchange and communication of the project partners.
Development and description of the innovative counselling method, description of the background of the method as well as course of method and instructions for implementing on the basis of the phase of analysis, adaptations and building of new developments on existing methodical deficits.
: Presentation of the actual situation. Which learning needs do people with learning difficulties have with respect to their own education (what is available?) Access of (further) education (how do I get there?).
information package with project description (virtual handbook), tools as: description of step-by-step approach for counselling as On-line planning for the future, learning material, teaching material, best practice.
: curriculum for a training of already acting educational and vocational advisers .
carrying out of two pilot trainings for educational and vocational advisers according to the Online future model, as a result 3 counselling tandems per participating country are to be trained.
Carrying out of 2 pilot phases with at least 5 participants per country (people with a mental disability with special attention to an adequate repartition concerning age and sex). Carrying out of a planning for the future and information protocol, educational and vocational itinerary plan (learning circles).
: Online model with all components as described, adapted to the results and experiences of the pilot phases, finished package (Online-model file) with all descriptions, manuals, check lists concerning the counselling procedure, vocational itinerary plan, educational plan, videos if possible, forms and CD-Rom.
: Development of an information plan on potentials and educational possibilities of people with learning difficulties. Sensitization of the public in all partner countries. Approaches and goals of the On-line project are to be propagandized at events of information during project time in all partner countries and the status of the project at the time being as well as the so far available results are to be presented.
Furthermore the concerned organizations and institutions are to be persuaded of quality and reliability of the model learning, so that persons who have acquired a job qualification per On-line, find easier access to the labour market.
The projekt handbook contains all features of training materials and methods which are going to be developed during the project. It is also the collection of all documents from and for all partners during the project.
