Summary:	The mission of this project is to favour the sociolabour insertion, promoting the contracting of inmates in a third grade situation. So, it does not only pretend to develop a cooperative process, through the social interlocutors and the local authorities, between the training organizations and the enterprises, but also -having in mind achieving this cooperation- to develop a project to cover the specific needs which have been noticed between those people with an exclusion risk in the labour market. To achieve this aim, the R.O.L. project will create: - An evaluating telematic tool about the professional and occupational profile of the inmate - An evaluating telematic tool to determine the employers\' attitudes about contracting inmates - A database - An occupational resource manual related to a training programme of trainers for the technicians who will be in charge of the created guide - A sensitivization strategy for the companies - A manual of results about the final project - A website displaying the created tools and their results
