Projektinformationen

Titel:	E-DryClean
Projektnummer:	NL/08/LLP-LdV/TOI/123016
Jahr:	2008
Projekttyp:	Innovationstransfer
Status:	bewilligt
Land:	NL-Niederlande
Marketing Text:	A Europe-wide and shared blended and e-learning project on sustainability in dry cleaning processes.
Zusammenfassung:	At the present time there is no comparable educational level and no transfer of knowledge between countries and/or transfer of innovation. In order to guarantee the sustainability of environmentally friendly processes in de dry cleaning sector, training modules will be developed to improve the level of knowledge of the dry cleaning staff and dry cleaning service enterprises within the European Union and acknowledging the EC directive 1999/13/EC on the emission of Perc, HC solvents and Siloxane D5.
Beschreibung:	At present, textile cleaning with Perc (perchlororethylene) is in Europe the most common technology. However this is a chemical that has the tendency to evaporate under ambient conditions. An EC directive was drawn up, because solvent emissions could have harmful effects on the environment. Ensuring the safe usage of Perc within the dry cleaning industry is therefore most important.
Themen:	*** Nutzung und Verbreitung von Ergebnissen *** Arbeitsmarkt *** Qualität *** Interkulturelles Lernen *** Nachhaltigkeit *** Lebenslanges Lernen *** Anerkennung, Transparenz, Zertifizierung *** Fernlehre
Sektoren:	*** Erbringung von Sonstigen Dienstleistungen *** Erziehung und Unterricht
Produkt Typen:	Module Fernlehre Transparenz und Zertifizierung Programme/Curricula Homepage
Produktinformation:	The dry cleaning staff and dry cleaning service enterprises will be provided with a new opportunity of informal learning. These basic and advanced training modules can be utilised in the entire EU in order to improve the educational level of employees (priority: skills development of adults in the labour market). The possibility of self-instruction is given to the employees, by e-learning and/or blended learning. In the different countries within the European Union different levels of education are present.
