# VESTA-GIS - Netzwerk für berufsbegleitende Aus- und Weiterbildung zu GIS und GI-Anwendungsdomänen

134557-LLP-2007-IT-LEONARDO-LNW

http://www.adam-europe.eu/adam/project/view.htm?prj=3712

## Projektinformation

Titel: VESTA-GIS - Netzwerk für berufsbegleitende Aus- und Weiterbildung zu GIS und GI-Anwendungsdomänen

Projektnummer: 134557-LLP-2007-IT-LEONARDO-LNW

Jahr: 2007

Projekttyp: Netzwerke

Status: bewilligt

Land: EU-Zentralisierte Projekte

Marketing Text: VESTA-GIS (www.vesta-gis.eu) hat sich als LLP-Leonardo da Vinci Vernetzungs-Projekt zum Ziel gesetzt geeignete Rahmenbedingungen zu schaffen um umsetzungsorientierte GI-Kenntnisse und Fertigkeiten - vor allem in Bezug auf die europäische Dimension von GI - in einem sich ständig wandelnden Arbeitsmarkt zu verbessern. Dies soll durch ein umfassendes Werkzeug zur Weiterbildung in den Bereichen GIS-Technologie, GI-Anwendungen und damit assoziierter Wissenschaftsfelder erreicht werden. Gleichzeitig soll die Mobilität von Personen gefördert werden.

Das Hauptziel von VESTA-GIS besteht darin ein Netzwerk auf Basis einer Clearingstelle zu etablieren, die den Zugang zu Trainingskursen (meist über Fernlehre) erleichtert und mit Möglichkeiten zur berufsbezogenen Mobilität kombiniert. Innerhalb des Projektes werden dabei zwei parallele Entwicklungslinien verfolgt: Zum einen der Bereich "Weiterbildung und Training" und zum anderen der Bereich "Mobilität". Die Entwicklungslinie "Weiterbildung und Training", zielt darauf ab Lehrmaterialien und Kursangebote zur berufsbegleitenden GI-Weiterbildung zu sammeln, zu organisieren und zu verbreiten, wobei sich "GI-Weiterbildung" hier sowohl auf GIS Technologie und Werkzeuge im engeren Sinn, als auch auf fachspezifische Anwendungsbereiche von GI bezieht. Weiterbildungsinteressierte sollen die im Lauf des Projektes entwickelten Werkzeuge dazu nutzen können das eigene Wissen zu testen und auf Basis dieses Tests sowie unter Angabe individueller Weiterbildungserfordernisse einen adäquaten Lernpfad vorgeschlagen zu bekommen. Dies soll unter anderem durch die Einrichtung eines Weiterbildungs-Kataloges, einer verteilten e-Learning Plattform, welche relevante Kursangebote bzw. Lehrmaterialien der Netzwerkpartner enthält und eines "Course builders" erreicht werden. Letzterer ist dazu gedacht, Weiterbildungsinteressierten eine Hilfestellung bei der Wahl des geeignetsten Lernpfades im Sinne einer optimalen Kombination von Lernmaterialien und Kursen anzubieten und soll so implementiert sein, daß auch informelle Lernakte Berücksichtigung finden. Zur Sicherung von Qualität und Konsistenz werden die über die VESTA-GIS Plattform angebotenen Weiterbildungsmöglichkeiten anhand der Ergebnisse einer Bedarfs- und Angebotsanalyse des europäischen GI-Weiterbildungsmarktes ausgewählt.
Der zweite große Projektteil "Mobilität" soll geeignete Rahmenbedingungen schaffen um die Mobilität von Personen zwischen den am Netzwerk partizipierenden Organisationen zu fördern. Zu diesem Zweck sollen vordefinierte Abläufe eingeführt werden, die eine derartige Mobilität unterstützen. Die Kosten für die Mobilität werden nicht von VESTA-GIS übernommen, sondern sollen von den beteiligten Organisationen in Form von ad hoc Vereinbarungen getragen werden. Informationen zu Möglichkeiten einer diesbezüglichen Finanzierung werden jedoch von VESTA-GIS bereitgestellt. Darüber hinaus wird über die Projektwebseite ein Zugang zu einer online-Datenbank eingerichtet, die eine Sammlung an verfügbaren Plätzen in Zielinstitutionen sowie Mobilitätsanfragen enthält. Weitere Details entnehmen Sie bitte der Projektwebsite unter www.vesta-gis.eu

Zusammenfassung: The overall aim of VESTA-GIS is to pool knowledge in the GIS domain (technology, applications), to share experience and foster innovation (new approaches) in vocational training by bringing together experts, organisations and users of GI and its application domains, as well as to identify the trends and skills requirements in this area and to improve the anticipated benefit of vocational training initiatives.
The following main activities are foreseen:
- Network Building and sharing knowledge;

## Projektinformation

- Analysis of training course offer and demand;
- Implementation of the Network training framework and of an e-learning platform hosting the partners' contributions;
- Training course catalogue building. This action will include the definition of pre-requisites of courses, such as a modular structure and selected quality criteria;
- Promotion of people mobility;
- Exploitation and dissemination action, including workshop organisation and support to competence validation and certification;

The network is developed with particular emphasis to the involvement of the GI users; in this perspective the network is addressed, other than on the GI technologies, including the cutting edge ones (interoperability, web-gis, standards, etc.) to the application domains, starting initially with:
- Water Resource Management
- Natural Environment Protection
- Coastal Management and Landscape

The network is developed in the favourable framework of the new European Directives for environment and territory, which are dealing with problems that have reached a new European dimension (such as the INSPIRE Directive approved by the European Parliament).

For major details, please visit the project web site at www.vesta-gis.eu

Beschreibung: The overall aim of VESTA-GIS is to pool knowledge in the GIS domain (technology, applications), to share experience and foster innovation (new approaches) in vocational training, by bringing together experts, organisations and users of GI and its application domains, as well as to identify the trend and skills requirements in this area and to improve the anticipated benefit of vocational training initiatives.
The following main activities are foreseen:
- network building and sharing knowledge
- analysis of training course offer and demand
- implementation of the network training framework and of an e-learning platform hosting the partners' contributions
- training course catalogue building. This action will include the definition of pre-requisites of courses, such as a modular structure and selected quality criteria
- promotion of people mobility
- exploitation and dissemination, including workshop organisation and support to competence validation and certification

The Network has been set up according to different levels of partnership to meet the need for a large participation, guaranteeing an effective management of the project and of resource allocation at the same time.

The partnership categories are:
- the Coordinator and the Core members - to take the responsibility of the project development and tasks, according to their expertise, and to satisfy specific requirements of the project
- the Associated members – to contribute to the networking training activity as regards transfer of skills, methodology and tools, in a wide trans-national context and according to their specific interest.

The full list of the VESTA-GIS members is available at www.vesta-gis.eu

Themen: *** Arbeitsmarkt
*** Lebenslanges Lernen
*** Berufsorientierung und -beratung
*** Ökologie
*** Weiterbildung
** IKT
** Sonstiges
** Fernlehre
** Unternehmen, KMU

## Projektinformation

Sektoren: *** Erbringung von Freiberuflichen, Wissenschaftlichen und Technischen Dienstleistungen
*** Information und Kommunikation

Produkt Typen: Verfahren zur Analyse und Prognose des Berufsbildungsbedarfes
andere
Fernlehre
Unterlagen für offenen Unterricht
Homepage
Programme/Curricula

Produktinformation: The main foreseen VESTA-GIS products are:

VESTA-GIS training demand and supply analysis
It is the analysis of GI training demand and supply material, interpreted to give operational indications for the implementation of the Vesta Network. It is supported by a questionnaire that is the document to collect data, individuating: what are the requested professional profiles and the working context in which they are daily working; the needs in terms of knowledge and specific technical skills connected to the assigned tasks; as well as what are, in case, the training materials that could be available at the interviewees and shared within the Vesta network.

Metadata for training material
It is the metadata, produced according to current standards and profiled on the target groups, for the description of the training content to be uploaded on the Vesta framework, useful for a reasoned selection of material, for the check of pre-defined quality criteria for validation, finally for defining the proper structure of a training catalogue able to guide the possible learners (both to understand properly the items of training content and to be led in a personal customisation of a learning path.

The Training Framework is the main output of the project in addition to the network itself, it is the kernel on which to operate the network and it is meant for an intelligent action to broke GIS training content made available at this purpose. It is also supported by an embedded e-learning platform able to deliver directly to the trainee many kinds of training materials.
At this purpose, particular attention will be paid to get SCORM/IMS compliant training contents, in order to ensure their interoperability and shareability with other platforms.

The VESTA-GIS catalogue
The catalogue is the entry point of the Training Framework: thanks to the creation of a guided and “annotated” catalogue the VESTA framework widens the outreach of such content. According to the procedures followed for the uploading of the metadata into the catalogue, it ensures users about the quality of the released content.

Access to training material
Together with the network and the Framework this is the main outcome of the project, involving many partners of the network and hopefully other organisations that will join the network during the project. It is the result of project tasks which aim at collecting, cataloguing, organising and validating the training material that the members of the network will share, according to their accession and copyrights policy and roles, within the network. A list of training courses that the Members already declared to include in the catalogue is already available. They already create a critical mass of courses able to guarantee the success of the network.

On-line database of placement offer/demand, accessible through registration (UID and Password), in compliance with privacy laws, where candidates and organisations wishing to host people can upload their CVs/profiles as well as a description of the job envisaged and/or position offered (work programme, tentative period and duration, conditions of the offer, etc.).

## Projektinformation

The VESTA-GIS web site and promotional material
A project Web site has been established at the beginning of the project (www.vesta-gis.eu) with information about the network procedures for registering in and information about project events, the members of the network and their profile and info about the project outcome, that will be made accessible by registration to the network. It will allow the link to the Training Framework and catalogue other than to the Mobility on line database. Along the development of the project, the web-site will host on-line the life of the network.

Promotional material about the network and its activity is also produced as well as VESTA-GIS Newsletter (every fourth month).

Dissemination Material
It consists of brochures, papers, presentations and dedicated web pages dealing with the VESTA-GIS results. In particular:
VESTA-GIS brochure should contain a detailed and technical description of the VESTA-GIS tools (course catalogue, course builder, certification of competences) and network and related thematic applications.
Dedicated web pages will be included in the project web site where it is possible to consult the course catalogue
Papers, presentations and posters: prepared on the occasion of seminars and conferences, they report about progress and project results.

VESTA-GIS Mobility Best Practices
They are issued upon the collection of the final reports on achieved results from people on mobility. Some examples will be selected as best practices, to be distributed for further promotion and dissemination of the project mobility scheme.

## Produkte

1 Course Catalogue

2 Survey on vocational training needs and offers in GI

3 Standard Metadata Template

4 VESTA-GIS eLearning Platform

5 VESTA-GIS Mobility Framework

6 VESTA-GIS Web site

7 VESTA-GIS Newsletters

8 VESTA-GIS promotional material

9 VESTA-GIS Progress Report Evaluation

10 VESTA-GIS Progress Report

11 Learning Paths Catalogue

12 Training Guide

13 VESTA-GIS Endorsement

14 VESTA-GIS Final Report

# Produkt 'Course Catalogue'

| | |
|---|---|
| Titel: | Course Catalogue |
| Produkttyp: | Homepage |
| Marketing Text: | |
| Beschreibung: | It consists in an online catalogue, where information and references about courses or training materials are stored and organised. The themes of such training units are mainly those of the VESTA-GIS project:<br>• GI Technologies<br>• Water Resource Management<br>• Natural Environment Protection<br>• Coastal Management and Landscape<br>but also other Geographical Information related subjects can be hosted. |
| Zielgruppe: | The catalogue addresses two target groups:<br>1. training providers in GI and related application fields(i.e. Universities, companies, etc.), who have an opportunity to advertise their training offer in a European wide environment<br>2. people wishing to improve their knowledge and skills in such areas, as well as organisations or companies who need some specilised training opportunities for their employees |
| Resultat: | A panorama of the opportunities of training in the VESTA-GIS fields |
| Anwendungsbereich: | Professional training |
| Homepage: | http://www.vesta-gis.eu |
| Produktsprachen: | Schwedisch<br>Italienisch<br>Englisch |

# Produkt 'Survey on vocational training needs and offers in GI'

| | |
|---|---|
| Titel: | Survey on vocational training needs and offers in GI |
| Produkttyp: | Verfahren zur Analyse und Prognose des Berufsbildungsbedarfes |
| Marketing Text: | |
| Beschreibung: | By means of two on-line questionnaires and some qualitative interviews, a survey was conducted between April and July 2008 addressing the demand and the supply side of the GI -training and education market, with the objective to have a picture of the present situation in the field |
| Zielgruppe: | VESTA-GIS Partners |
| Resultat: | “Report on vocational training needs and offers in GI”, dealing with:<br>• Attitudes towards vocational training<br>• Course types<br>• Support and constraints to lifelong vocational training<br>• Training benefits<br>• Training costs<br>• Training delivery methods<br>• Contents for training in GI<br>The report summarising the results of the survey is accessible to project partners within the restricted area of the VESTA-GIS web site (www.vesta-gis.eu), being not a public deliverable. |
| Anwendungsbereich: | Training needs and offer analysis |
| Homepage: | |
| Produktsprachen: | Englisch |

# Produkt 'Standard Metadata Template'

| | |
|---|---|
| Titel: | Standard Metadata Template |
| Produkttyp: | andere |
| Marketing Text: | |
| Beschreibung: | The metadata needed to describe the courses to be included in the catalogue have been selected and a common template has been drafted able, on the one hand, to give final users an exhausting overview about the training units available within the VESTA-GIS network and to ensure them the possibility to directly take arrangements with training providers; on the other<br>hand, to supply a good advertising to training providers, saving at the same time their property rights on the materials.<br>The templates for metadata are available for distribution by project partners within the restricted area of the VESTA-GIS web site (www.vesta-gis.eu) and from the course catalogue for free download by all interested subjects. |
| Zielgruppe: | VESTA-GIS Partners, training providers |
| Resultat: | A standard form to be filled with the metadata of the training courses and materials that is displayed in and downloadable from the Course Catalogue. The form is available in Italian, English, French, Dutch, German, Swedish, Portuguese. |
| Anwendungsbereich: | Training offer in GI and related application field |
| Homepage: | http://www.vesta-gis.eu |

# Produkt 'VESTA-GIS eLearning Platform'

| | |
|---|---|
| Titel: | VESTA-GIS eLearning Platform |
| Produkttyp: | Fernlehre |
| Marketing Text: | It is a Dokeos LMS based platform (GISIG platform) where training providers can upload course and modules for training provision. Moreover, the Training Framework architecture allows the connection with other eLearning platforms (i.e. belonging to VESTA-GIS members or other connected networks)according to the concept of VESTA-GIS federated platforms. |
| Beschreibung: | Through the VESTA-GIE eLearning Platform the Consortium allows those providers not having direct access to an LMS or unable to directly install and maintain one (for instance, for economic reasons) to profit of the availability of VESTA-GIS federated platforms. Some training courses have been uploaded and are available on the platforms, whose main aim is to host own and/or national courses or other courses related to the specific fields of interest of the partners involved and/or related to the three thematic streamlines of VESTA-GIS (nature protection, water resources, coast and landscape).Course hosted in the platform are detailed in the Course Catalogue where also instructions and contacts to be enabled to access the course in the VESTA-GIS e-learning platform are reported. A link to the Course Catalogue for the platform is also available.<br>The access to the training material in the VESTA-GIS platform is only by login. Some of the courses hosted within the platform are also connected to a GeoPortal for practical exercises with actual geo-data and the development of test-cases. |
| Zielgruppe: | VESTA-GIS partners, training providers, trainees |
| Resultat: | A portal linking to different learning contents and tools of the VESTA-GIS Training Framework |
| Anwendungsbereich: | eLearning |
| Homepage: | http://www.gisig.it/platform |
| Produktsprachen: | Englisch |

# Produkt 'VESTA-GIS Mobility Framework'

| | |
|---|---|
| Titel: | VESTA-GIS Mobility Framework |
| Produkttyp: | Homepage |
| Marketing Text: | A Web-based tool to promote the assignment of grants to university students/graduates/researchers to complete a period of practical training abroad |
| Beschreibung: | Through the VESTA-GIS Mobility Framework, the Consortium intends to promote the assignment of grants to university students/graduates/researchers applying individually, or through an institution of higher education, to complete a period of practical training in a company abroad normally lasting between 3 and 12 months.<br><br>All placements organised within the VESTA-GIS mobility framework should be:<br>• Inter-sectoral (mobility flow from Academia to Industry and viceversa)<br>• transnational (from one country to another)<br><br>The main feature of this tool is the on-line mobility database, collecting and allowing the search of placement offers, placement requesta and candidates' CVs. It is organised in two levels:<br>• Public “candidate” level, where potential candidates can have a look at the offers of placements posted by the project partners and apply for the available position and/or send their curriculum to submit their candidature.<br>• Registered “hosts” level, only available to VESTA-GIS Core and Associated Partners, where the project partners can post their offers of placements and have a look at the available candidatures. |
| Zielgruppe: | 1. Hosts: Universities, companies, and other organisation offering placement opportunities<br>2. Candidates: people with different skills and knowledege interested in a period of practical training (3 - 12 months) abroad, in a company or organisation operating in the VESTA-GIS fields<br>The access to this tool is public for individual candidates, while hosts will be allowed to check the database and post placement offers only if they are VESTA-GIS Associated Partners. The VESTA-GIS Mobility Framework is based on a continuous process, with no fixed deadlines. All candidates and host organisations can submit their requests/offers at any time they need |
| Resultat: | An on-line database collecting offer/demand of placements, that is implemented and constantly up-dated with offers/requests of placements |
| Anwendungsbereich: | Transnational mobility, practical training |
| Homepage: | http://www.vesta-gis.eu/ |
| Produktsprachen: | Englisch |

# Produkt 'VESTA-GIS Web site'

| | |
|---|---|
| Titel: | VESTA-GIS Web site |
| Produkttyp: | Homepage |
| Marketing Text: | A web site to allow people to find out what VESTA-GIS is about and to access the services it provides |
| Beschreibung: | The project web site was developed in the first months of the project, with the aim to raise awareness on the project objectives and activities as well as, in general, on the potentialities of the VESTA-GIS network.<br>The web-site is being running along the project and beyond, being maintained as follow-up tool at the end of the contractual period, to act as awareness and dissemination channel and to ensure integration among the project partners and the larger audience of stakeholders. The technical information, the workshop/seminars' proceedings, the newsletters, altogether with the background material provided by the partners is the basis for the web-site contents. Moreover, the VESTA-GIS web site will also allow the access to the Course and Learning Paths Catalogues and to the Mobility Framework with its on-line database on placements offers and demands.<br>VESTA-GIS web site includes also a Restricted Area/Document Server, representing a useful tool to improve the communication among the Consortium and exchange of updated information. |
| Zielgruppe: | VESTA-GIS Partners, all interested people |
| Resultat: | Information about the project and its development, sharing of project documents among the partners, access to the VESTA-GIS Training framework and Mobility Framework |
| Anwendungsbereich: | Project communication and dissemination, access to the project outcomes |
| Homepage: | http://www.vesta-gis.eu |
| Produktsprachen: | Englisch |

# Produkt 'VESTA-GIS Newsletters'

| | |
|---|---|
| Titel: | VESTA-GIS Newsletters |
| Produkttyp: | andere |
| Marketing Text: | Another tool to communicate VESTA-GIS results, news and achievements |
| Beschreibung: | The VESTA-GIS Newsletters (8 issues in total) is conceived to widely and actively spread information on the project. It is composed of short and easy to read publications and flash news on project activities, events and results, addressed to the wide target audience of the project.<br>In the last two issues of the Newsletter, a more comprehensive report on the activities developed was proposed, both as regards the dissemination events organizes and the different tools and functionalities of the Training and Mobility Frameworks. According to this, the last Newsletter n. 8 (which also been printed for exploitation in forthcoming GI events) can be also considered as a guide to VESTA-GIS tools, taking part as such in the “VESTA-GIS Training Guide”.<br>The newsletters are downloadable from the public area of the project web site at www.vesta-gis.eu (following the link “Promotional material”) and sent to relevant mailing lists. The core and associated partners are invited to circulate the newsletters to all people that may be interested in receiving it and in case to join the network. |
| Zielgruppe: | All |
| Resultat: | This communication tool has proven to have positive effects on the dissemination since it maintains the interest of the VESTA-GIS community in project results and enhances the level of awareness about the project activities. |
| Anwendungsbereich: | Project communication and dissemination |
| Homepage: | http://www.vesta-gis.eu |
| Produktsprachen: | Englisch |

# Produkt 'VESTA-GIS promotional material'

Titel: VESTA-GIS promotional material

Produkttyp: andere

Marketing Text: Project leaflet, project poster, booklet "Mobility Best Practice"

Beschreibung: A project leaflet was designed in order to provide a brief presentation of the project's objectives and activities, as well as the contacts for joining the network.
Translations of the leaflet were produced in English Italian, German, Dutch, French and German for a more effective dissemination also at a national/local level. All versions of the leaflet are available for free download on the project web site under "Promotional material".
Moreover, a poster to introduce the project has been produced and used for promotional purposes on the occasion of some sectoral international events in which the VESTA-GIS Core Partners participated, also presenting papers on VESTA-GIS. Also the poster is available for free download on the project web site under "Promotional material". A French and an Italian translations of the poster are also available.
Finally, the booklet "Mobility Best Practice" has been produced reporting the results of the best placements organized within the Mobility Framework. This is intended to be a tool for promoting further mobility activities within the VESTA-GIS Network according to specific procedures and quality criteria agreed on by the project partners. The booklet has been printed as a kind of promotional material, in any case its digital version is available for free download from the project web site following the link "Mobility Framework".

Zielgruppe: All

Resultat: A significant number of leaflets was printed in time to distribute them on the occasion of main sectoral events in which the project partners are participating since the project beginning, while additional copies will be printed and distributed in the events foreseen for forthcoming months.

Anwendungsbereich: Project awareness actions,dissemination and exploitation of results.

# Produkt 'Learning Paths Catalogue'

Titel: Learning Paths Catalogue

Produkttyp: Fernlehre

Marketing Text:

Beschreibung: The Learning Paths Catalogue is an additional element of the VESTA-GIS Training Framework developed to better exploit and rationalise the VESTA-GIS training offer. This also in accordance with the idea, developed along the project life, to propose VESTA-GIS Curricula bringing to get the VESTA-GIS endorsement.
Different learning paths, aimed at acquiring specific skills on GIS/SDI application and policies, are proposed to the VESTA-GIS Network members, made accessible from the VESTA-GIS Training Framework.
Each VESTA-GIS learning path is detailed through a template giving a general overview of the objectives, the target audience and the courses taken into consideration for the training. Courses proposed and forming the learning paths are all from the VESTA-GIS catalogue. Hyperlinks from the learning path to the course catalogue allows the user to consult the full metadata for each course considered in the learning path.
Before having access to the catalogue, a skill competence tests is proposed to the user, to verify the prerequisites of simulated learning paths throughout the Course Catalogue, before starting them.
The VESTA-GIS Training Framework offers also a methodology (Learning Path Builder) to allow the definition of customized “learning paths”. That is an additional options for the users of the VESTA-GIS Training Framework, in particular for those people who will act as tutors for possible training actions.

Zielgruppe: The catalogue mainly addresses two target groups:
1. people acting as tutors in training actions on GI and related application fields(i.e. Universities, companies, etc.), who have an opportunity to advertise their training offer in a European wide environment
2. people wishing to improve their knowledge and skills in such areas, as well as organisations or companies who need some specilised training opportunities for their employees

Resultat: A tool to test different learning paths, aimed at acquiring specific skills on GIS/SDI application and policies, a self-assessment test to assess prerequisites before acceeding the training material, a methodology to define customised learning paths.

Anwendungsbereich: Professional training

# Produkt 'Training Guide'

| | |
|---|---|
| Titel: | Training Guide |
| Produkttyp: | andere |
| Marketing Text: | |
| Beschreibung: | The Training Guide is intended as a tool describing the Training and Mobility Framework architecture, the functionalities of the Training Courses and Learning Paths Catalogues, the e-Learning platform and the GeoPortal, the on-line database on placement offer/demand, as well as the rules for accessing and use them, both for the organisations providing courses/training material and for the trainees. It is constituted by two elements:<br>• The Newsletter n. 8, which is conceived as a guide to whom is approaching VESTA-GIS for the first time and wants to easily exploit the outcomes for own training purposes. It is published on the public area of the project web site at http://www.vesta-gis.eu/ (following the link “Promotional material”).<br>• The Demo version of the VESTA-GIS Framework, a video accessible from the VESTA-GIS homepage acting as advertisement to potential users of VESTA-GIS opportunities, contents and functionalities. |
| Zielgruppe: | VESTA-GIS partners, training providers, trainees and, in general,all possible stakeholders |
| Resultat: | Dissemination and exploitation of project outcomes, guide to access to the VESTA-GIS Training Framework and Mobility Framework (access to project tools and functionalities) |
| Anwendungsbereich: | Professional training, eLearning, project dissemination and exploitation |
| Homepage: | http://www.vesta-gis.eu/ |
| Produktsprachen: | Englisch |

# Produkt 'VESTA-GIS Endorsement'

| | |
|---|---|
| Titel: | VESTA-GIS Endorsement |
| Produkttyp: | |
| Marketing Text: | |
| Beschreibung: | The “VESTA-GIS Endorsement” is the validation document of a learning path through a process of confirming that principles defined by VESTA-GIS framework has been applied towards the acquisition of a qualification. The endorsement is referred to a certified path built on quality criteriaThe process of the VESTA-GIS Endorsement includes two official documents related to two different steps:<br><br>• The Learning Path VESTA-GIS Endorsement<br>• The Certification of attendance to a VESTA-GIS endorsed learning path<br><br>It is developed in close correlation with the mentioned principles of ECVET system. |
| Zielgruppe: | VESTA-GIS partners, training providers, trainees |
| Resultat: | A tool to have training results recognized at a professional, if not yet official, level and therefore attract more target users to take part in training and mobility actions promoted within the VESTA-GIS Network |
| Anwendungsbereich: | Professional training |
| Homepage: | |
| Produktsprachen: | Englisch |

| Kontaktinformation | gisig@gisig.it |
| Zeitpunkt und Ort | 6th November 2008<br>IRIDE COngress Centre, Genova (IT) |

# Veranstaltungen

## Workshop: Training on Geographical Information, a challenge in a new European context

| | |
|---|---|
| Datum | 01.07.2008 |
| Beschreibung | The Workshop aims at offering an overview of VESTA-GIS project and discussion issues about the state-of-the-art of EU training initiatives on GIS and SDI addressed to professional operators of Geographical Information and compliant to the current environment and data policies. |
| Zielgruppe | GI professionals, Public Administrations, researchers |
| Öffentlich | Öffentliche Veranstaltung |
| Kontaktinformation | gisig@gisig.it |
| Zeitpunkt und Ort | 1st July 2008<br>within the GI-FORUM 2008<br>Salzburg (AT) |

## Workshop: The VESTA-GIS Training Framework

| | |
|---|---|
| Datum | 21.11.2007 |
| Beschreibung | The workshop is intended to introduce the project and the partnership, together with the basic concepts for the VESTA-GIS Training catalogue, the pillar of the Training Framework, the major component of VESTA-GIS. It also addresses the thematic application streams of the project with two presentations on "Coastal management and landscape" and "Water Management".<br><br>The VESTA-GIS kick-off workshop was organised as a session of the final Conference of the ECO-IMAGINE (Marie Curie) project, www.gisig.it/eco-imagine, to create the training follow-up for the community of researchers in coastal area management. |
| Zielgruppe | Researchers, operators in the field of Coastal management, Water management and GI, Public Administrations, etc. |
| Öffentlich | Öffentliche Veranstaltung |
| Kontaktinformation | gisig@gisig.it |
| Zeitpunkt und Ort | 21st November 2007<br>IRIDE Congress Centre, Genova (IT) |
