Development of European Modular Training Programs for Decorator/Painter and their Adjustment in Lithuanian and European VET Institutions

LLP-LdV-TOI-2008-LT-0012

http://www.adam-europe.eu/adam/project/view.htm?prj=3756

Projektinformationen

Titel:	Development of European Modular Training Programs for Decorator/Painter and their Adjustment in Lithuanian and European VET Institutions
Projektnummer:	LLP-LdV-TOI-2008-LT-0012
Jahr:	2008
Projekttyp:	Innovationstransfer
Status:	abgeschlossen
Land:	LT-Litauen
Marketing Text:	The aim of the project is to transfer the best practice of using modular training programs for the profession of a decorator/painter in Scottish VET institutions, to use the experience of other project partners (from Finland, Romania, Greece) and to develop European modular training programs for the profession of a decorator/painter, a corresponding credit system and examples of methodological material, and adjust this newly developed curriculum in VET institutions of Lithuania and other participant countries. Through this new curriculum, vocational schools and colleges will be able to provide more suitable courses leading to qualifications for all students. A wide range of subjects at different levels will ensure that study programme is available to suit everyone. The training modules/units are intended to be modern and up-to-date with a good balance between gaining knowledge and applying it in practical situation.
Zusammenfassung:	the project partners fulfilled the following: - transfer of the best practice of using modular training programs for the profession of a decorator/builder in Scottish VET institutions, use of the experience of other project partners and development of European modular training program for the profession of a decorator/builder, a corresponding credit system and examples of methodological material, and adjust this newly developed curriculum in VET institutions of Lithuania and other participant countries. These training modules are based on the knowledge, skills and competences recognized by European VET institutions.
Beschreibung:	Project partnership was made up from VET institutions of Lithuania, Scotland, Greece, Romania, Germany, Finland, and Spain. The partnership consisted of 11 partners - Vilnius Builders Training Centre, Alytus Vocational Training Centre, Siauliai Vocational Training Centre, Vilnius College for Construction and Design, Dundee College, Hellenic Regional Development Centre, German Romanian Foudation Centre for Preparing and Perfecting in Domain of Construction, ITF, Jugendforderverein Parchim, WinNova (Pori College), DECROLY. Each partner brought their own expertise and experience to the partnership, with each contributing equally to the success of the project. The Project has produced a completely finished product and has met its objectives: best practice of using a modular training program was shared and transferred, and a modular training program was developed with the input from all international partners. The draft of the developed Program was tested at partners' institutions and evaluated by the internal and external experts. The final product was improved with regard to the received comments and proposals. Thus, a flexible and individualized training Program was developed which creates better conditions of proceeding to professional activities and further education and supports development of labour force skills within the labour market. The developed modules are feasible and applicable to the VET institutions of the partner countries. The project achievements have a clear application and continuity on both national and international levels. While the long-term impact on the VET institutions involved in the program and beyond will only be evident after a period of time and possibly with follow-up evaluation, there are clear indications that the Modular program will improve VET institutions' ability to deliver enhanced Building courses which, in turn, should have a positive impact on the vocational and life opportunities of their learners. The quality of the Modular program and efforts of the project partners to promote the project mean that the impact of the project will extend far beyond the partner institutions. The developed Modular program aims to ensure the quality of training as well as allows the future specialist to successfully function in the labour

market, thus fulfilling the social needs realated to labour mobility within European construction sector.

Themen:
*** Anerkennung, Transparenz, Zertifizierung
*** Berufsorientierung und -beratung
*** Weiterbildung
*** Erstausbildung
* Arbeitsmarkt
* Unternehmen, KMU

Sektoren:
*** Baugewerbe/Bau
*** Erbringung von Freiberuflichen, Wissenschaftlichen und Technischen Dienstleistungen
*** Erziehung und Unterricht

Produkt Typen:
Programme/Curricula
Module
CD-ROM

Produktinformation:
The products of the project:
- Study of Needs Analysis in regard to adaptation of European modular training programs for the profession of a decorator/builder and a corresponding credit system in Lithuanian and European VET institutions (in EN, LT);
- European modular training program for the profession of a decorator/builder and a corresponding credit system (in DE, EN, ES, FI, GR, LT, RO).
- Methodological teaching material for adaptation in European VET institutions (in EN, LT);
- Examples of methodological teaching material (in EN, LT),

are available at www.demop.eu and were also published in a CD.

Produkte

1 Modular training program for decorator (builder)

Produkt 'Modular training program for decorator (builder)'

Titel: Modular training program for decorator (builder)

Produkttyp: Module

Marketing Text: Modular training program for decorator (builder)
Methodological material for implementation of the program
Example of teaching/learning material provided by the partners from Dundee College, Scotland
CONTENT OF PROGRAM
Obligatory modules:
Introduction into profession of decorator (builder)
Manual plastering
Mechanized plastering
Tiling of vertical and horizontal surfaces
Wallpaper hanging
Painting of buildings
Insertion into labour market
Optional modules:
Thermal Insulation of the Walls
Mounting decorative panels and linear elements
Mounting of plasterboard panels.

The following methodological material is available for each learning task:

1. Tests, questionnaires(20 or more questions for each practical training task)

2. Technological cards (illustrated description of a technological process)

Beschreibung: The program is recommended for VET institutions with various professional training traditions, standards and requirements, also the same program can be delivered to age students of different age who have different general education, life and work experience; therefore the duration of learning is also different.
The authors of the program agreed to define the scope of training in terms of credits.
A credit corresponds to 25-30 arbitrary learning hours.
The scope of the program is 120 credits.

Zielgruppe: VET professionals and VET trainees

Resultat:

Anwendungsbereich: the Modular program can be applied in vocational schools and training centres delivering initial or continuous training courses for decorators/builders.
