Project Information

Title: TRAINING PLACEMENTS IN FOREIGN ENTERPRISES FOR VOCATIONAL TRAINING STUDENTS:AN EUROPEAN APPROACH FOR QUALITTY

Project Number: ES/08/LLP-LdV/TOI/149008

Year: 2008

Project Type: Transfer of Innovation

Status: running

Country: ES-Spain

Marketing Text: In most European countries there is the possibility of experiencing in company placement for vocational training students at a national scope. For that purpose there are several guidelines and materials for ensuring the quality of the internship. When this in company placement is a cross border mobility experience, there are more constraints and more variables to be taken into account in order make it successful. The different stakeholders taking part in internships for vocational training students must face difficulties that restrain the participation of students and graduates in mobility programmes. (for instance: SMEs that think it will be very difficult to host foreign students, teachers that would like to encourage their students to take part in in company placements abroad but they don't know how to find companies for them, students that do not take the risk of an internship abroad as they are not sure if the experience will be successful, etc.).
The project's goal is to facilitate the procedures of in company transnational mobility to teachers, intermediary organizations, students and companies through an easy handbook translated into each national language. Through this handbook, companies, students and teachers will find easier to take part in existing mobility programmes.

Summary: The project aims at developing different materials and guidelines already published and used for national internships in order to create a handbook adapted to transnational internships. This handbook will be disseminated with an European scope in order to prevent unsuccesful mobility experiences, make clear the role of each actor in cross-border internships, facilitating the quality procedures of the whole mobility experience and standarizing them both for old EU and new EU members taking into account common and local needs.
The main objective of the project is to ensure the quality of the cross border mobility experience for a wide range of vocational training student regardless of company sector, country, and field of vocational training.

Description: The main objective of the project is to ensure the quality of the cross border mobility experience for a wide range of vocational training student regardless of company sector, country, and field on vocational training.
The consortium is composed by entrepreneurs support organizations, Chambers of Commerce and Vocational training organizations with a long experience in in company placements for vocational training students, and excellent relationship both with companies and Vocational Training Centers. A rather wide geographical coverage is sought, so that the transfer from Western to Eastern European countries is achieved.
There will be a local gathering of information consisting on a survey and specialised local workshops. There will be a final report on local information.
As a direct result of this project there will be outputs (a handbook) that will facilitate the role that different actors involved in internships for vocational training students are playing. A methodology and follow up procedures that can ensure the quality of the whole mobility experience will be set.
There will be an aware rising campaign to widespread the results and promoting the benefits of this kind of mobility experience for the different actors involved in vocational training and students internships.

Themes:
* Utilization and distribution of results
* Labor market
* Quality
* Lifelong learning
* Higher education

Project Information

* Enterprise, SME
* Equal opportunities
* Initial training

Sectors:
* Accommodation and Food Service Activities
* Professional, Scientific and Technical Activities
* Human Health and Social Work Activities
* Other Service Activities
* Information and Communication
* Education
* Arts, Entertainment and Recreation
