CoBaTrICE-IT Competency Based Training in Intensive Care in Europe – Innovation Transfer

UK/07/LLP-LdV/TOI-003

http://www.adam-europe.eu/adam/project/view.htm?prj=4013

Information sur le projet

Titre: CoBaTrICE-IT Competency Based Training in Intensive Care in Europe – Innovation Transfer

Code Projet: UK/07/LLP-LdV/TOI-003

Année: 2007

Type de Projet: Projets de transfert d'innovation

Statut: Clôturé

Pays: UK-Royaume-Uni

Accroche marketing: Le but du projet de CoBaTrICE est de fournir un programme de formation basé international de compétence pour la médecine de soins intensifs en Europe et dans d'autres régions du monde.

Résumé: La collaboration de CoBaTrICE a été formée en 2003 pour définir des résultats de la formation médicale de spécialiste dans les soins intensifs, et pour développer un programme de formation international. Le projet est en partie financé par le Commission européen (programme de Leonardo) et soutenu par la société européenne de la médecine de soins intensifs. Le projet est divisé en quatre phases principales.
1) Un aperçu des programmes de formation en cours de médecine de soins intensifs à travers l'Europe et d'autres régions du monde
2) Le développement d'une compétence complète a basé le programme
3) Développement de directives d'évaluation
4) Reliez le programme basé par compétence à une ressource électronique e.g.e-portfolio.
Les 2 premières phases sont accomplies et nous travaillons actuellement sur la phase 3.

Description: Le principe fondamental de ce projet est qu'un docteur de soins intensifs qualifié dans un pays aura des capacités comparables avec un docteur de soins intensifs qualifié dans un autre pays. Ceci s'assurera qu'un niveau commun de la compétence clinique, la connaissance, des qualifications, les attitudes et le comportement à une norme identifiée sont réalisés.
CoBaTrICE a réalisé ceci par un processus mondial de consultation utilisant techniques de consensus. Les participants impliqués dans ce projet incluent des médecins de médecine de soins intensifs, des médecins juniors, des infirmières, des professionnels de la santé alliés, des patients et leurs familles. Des organismes nationaux et internationaux ont été également invités à participer.
La première étape était de créer une collaboration internationale. Le projet de CoBaTrICE a rassemblé plus de 80 spécialistes en médecine de soins intensifs à travers le monde, et beaucoup d'autres participants ont contribué aux groupes de travail à de diverses étapes dans le projet. Le succès de CoBaTrICE est dû à l'enthousiasme et à l'engagement de tous ce qui ont participé à cette recherche.

Thèmes:
*** Qualité
*** Développement durable
*** Formation tout au long de la vie
*** Enseignement supérieur
*** Validation, transparence, certification
*** Orientation professionnelle
*** Formation continue
** TIC
* Formation ouverte et à distance

Sectors: *** Santé Humaine et Action Sociale

Types de Produit:
Site Internet
Matériel d'apprentissage
Programme/curriculum
Enseignement à distance
Matériel pour l'enseignement
Méthodes de distribution

Information sur le projet

produit: développement de l'accréditation et des directives d'évaluation basées par lieu de travail pour se relier au programme et aux compétences du programme de formation. L'exécution finale sera une e-portfolio. Ceci définira les résultats du programme de formation de CoBaTrICE en vue de l'adoption par les pays européens intéressés et d'autres régions du monde.

Produit 'Translation of the CoBaTriCE programme into Spanish'

Titre:	Translation of the CoBaTriCE programme into Spanish
Type de Produit:	Matériel d'apprentissage
Texte marketing:	Programme CoBaTrICE (French syllabus translation)
Description:	Translated syllabus uploaded onto CoBaTrICE website, Since this activity we have also translated the website into French which is also in the process of being uploaded. This will impact on trainers and trainees whose first language is French or wish to learn the syllabus in French.
Cible:	Doctors and other healthcare professionals involved in the care of acutely and critically ill patients; healthcare educators & regulators; organisations with responsibility for continuing professional development and for e-learning; patients and their families with experience of critical illness with French as their first language.
Résultat:	Translation of the syllabus
Domaine d'application:	Website
Adresse du site Internet:	www.cobatrice.org
Langues de produit:	français

Produit 'Spanish Translation of the CoBaTrICE syllabus'

Titre:	Spanish Translation of the CoBaTrICE syllabus
Type de Produit:	Matériel d'apprentissage
Texte marketing:	Traducción Cobatrice Definitiva (Spanish translation)
Description:	Translated syllabus uploaded onto CoBaTrICE website, Since this activity we have also translated the website into Spanish which is also in the process of being uploaded. This will impact on trainers and trainees whose first language is Spanish, or for any parties wishing to learn the syllabus in Spanish
Cible:	Doctors and other healthcare professionals involved in the care of acutely and critically ill patients; healthcare educators & regulators; organisations with responsibility for continuing professional development and for e-learning; patients and their families with experience of critical illness with French as their first language.
Résultat:	Translation of syllabus and programme
Domaine d'application:	Website
Adresse du site Internet:	www.cobatrice.org
Langues de produit:	espagnol

Produit 'The educational environment for training in intensive care medicine: structures, processes, outcomes and challenges in the European region"'

Titre:	The educational environment for training in intensive care medicine: structures, processes, outcomes and challenges in the European region"
Type de Produit:	Autres
Texte marketing:	The Survey was published in Intensive Care Medicine "The educational environment for training in intensive care medicine: structures, processes, outcomes and challenges in the European region" (DOI: 10.1007/s00134-009-1514-4) Published 23/6/09
Description:	The result was to characterise the training environment in ICM across Europe, with a particular focus on factors influencing competency-based training. The process was achieved by surveying each of the 28 countries involved in the project using a web-based cross-sectional survey on a purposive sample.
Cible:	Doctors and other healthcare professionals involved in the care of acutely and critically ill patients; healthcare educators & regulators; organisations with responsibility for continuing professional development and for e-learning; patients and their families with experience of critical illness.
Résultat:	A publication in a peer reviewed journal providing insight to the current training environment in Intensive Care Medicine across Europe
Domaine d'application:	This publication has provided the information required for other work packages to build upon
Adresse du site Internet:	www.cobatrice.org
Langues de produit:	anglais

Produit 'Quality Assurance Standards for Programmes of Training in Intensive Care Medicine in Europe'

Titre:	Quality Assurance Standards for Programmes of Training in Intensive Care Medicine in Europe
Type de Produit:	Transparence et certification
Texte marketing:	The purpose of this work package was to develop internationally harmonised quality assurance (QA) standards for programmes of training in ICM.
Description:	The product is a set of standards which have been disseminated to each of the 28 countries involved in the project using a web based Delphi consensus technique, and several iterations were required.
Cible:	Doctors and other healthcare professionals involved in the care of acutely and critically ill patients; healthcare educators & regulators; organisations with responsibility for continuing professional development and for e-learning; patients and their families with experience of critical illness
Résultat:	A final set of 29 standards to monitor the training centre, training programmes, trainee selection and trainer profile have been established.
Domaine d'application:	Available to be used by National Training Organisations in Intensive Care Medicine.
Adresse du site Internet:	www.cobatrice.org
Langues de produit:	anglais

Produit 'Workplace Based Assessment Manuscript'

Titre:	Workplace Based Assessment Manuscript
Type de Produit:	Matériel d'apprentissage
Texte marketing:	A manuscript describing methods and approaches to the assessment and feedback of medical trainees
Description:	The product is a pedagogical strategy concerning workplace based assessment in ICM
Cible:	Doctors and other healthcare professionals involved in the care of acutely and critically ill patients; healthcare educators & regulators; organisations with responsibility for continuing professional development and for e-learning; patients and their families with experience of critical illness
Résultat:	Educational Material
Domaine d'application:	National Training Organisations, Specialists, TRainers and trainees in ICM
Adresse du site Internet:	www.cobatrice.org
Langues de produit:	anglais

Produit 'Workplace based assessment: how to use it in the ICU'

Titre:	Workplace based assessment: how to use it in the ICU
Type de Produit:	Autres
Texte marketing:	Publication of workplace based assessment strategies
Description:	Aim has been to provide trainers and trainees with narrative guidance and critical evaluation of techniques and processes for Workplace-Based Assessment (WPBA) of competence in intensive care medicine.
Cible:	Doctors and other healthcare professionals involved in the care of acutely and critically ill patients; healthcare educators & regulators; organisations with responsibility for continuing professional development and for e-learning; patients and their families with experience of critical illness
Résultat:	Peer reviewed publication of workplaced based assessment processes
Domaine d'application:	Medical Education
Adresse du site Internet:	www.cobatrice.org
Langues de produit:	anglais

Produit 'e-CoBaFolio'

Titre:	e-CoBaFolio
Type de Produit:	Enseignement à distance
Texte marketing:	The prototype version of the e-CoBaFolio has been successfully launched. We used participatory action research methodology consisting of several working group meetings and teleconferences to identify the needs of trainers and trainees in ICM across Europe.
Description:	The e-CoBaFolio is still evolving. As a result of modifying the budget towards the end of the project with approval from the National Agency we have been able to out source the syllabus to 5 ICM societies to translate the e-CoBaFolio into their language which will be completed by October 2010. The e-CoBaFolio will then be available in 8 languages.
Cible:	Doctors and other healthcare professionals involved in the care of acutely and critically ill patients; healthcare educators & regulators; organisations with responsibility for continuing professional development and for e-learning; patients and their families with experience of critical illness
Résultat:	An electronic learning portfolio designed to be used by National Training Organisations, trainers and trainees in Intensive Care.
Domaine d'application:	To be used as part of the CoBaTrICE training programme and part of Life Long Learning in Intensive Care Medicine across Europe and other world regions
Adresse du site Internet:	www.cobatrice.org
Langues de produit:	anglais
