Projektinformationen

Titel: SPURENSUCHE

Projektnummer: CZ/08/LLP-LdV/TOI/134025

Jahr: 2008

Projekttyp: Innovationstransfer

Status: laufend

Land: CZ-Tschechien

Marketing Text: SPURENSUCHER schauen genauer hin, fragen nach und halten fest. Wo ist eigentlich das alte Kino geblieben? Gab es diesen See schon immer? Wie sah es in unserem Kiez eigentlich vor 40 Jahren aus? SPURENSUCHER setzen sich intensiv mit den Veränderungen ihrer konkreten Lebenswelt auseinander. Mit Fotosequenzen, Texten, Hör- und Videobeiträgen dokumentieren sie diesen Wandel und erwerben und ermöglichen so ein tieferes Verständnis für historische Prozesse. Auf dem SPURENSUCHE Portal wird längst Vergangenes spannend und lebendig, es entsteht nach und nach und durch Alle, die mitmachen, eine Art digitales Gedächtnis.

Zusammenfassung: Beyond the School Project - Landscape Telling Stories
1) The objective is to extend an already verified and successful BTS project to Sweden, Lithuania and Latvia.
2) The target groups are - VET schools, students of VET schools, educational and school management staff.
3) The partnership involves partners with various experiences with the BTS project and its localization (CFME CZ as an creator, CFME DE as a localizator and ECOS as an user). It also involves receiving partners, who are well established in Sweden, Lithuania and Latvia.
The duration of the project is 24 months (10/2008 – 09/2010)
The project will support the development of several long-term competencies:

- Social & communications skills (presentation skills, the ability to deal with people, teamwork etc.)
- IT skills
- Information competency and literacy (gathering, processing, sorting and evaluating of information)
- Creation of long-term relationships involving local communities and the local landscape.

Beschreibung: More information about the Beyond the School project, its methodology and outcomes etc.can be found at www.beyondtheschool.org.uk or www.krajinazaskolou.cz/toi.

Projektinformationen

Produktinformation:

Methodology:
Localized and translated methodology of Beyond the School - this 60 pages methodology serves as a guide for teachers and students involved in the project. It describes each step of the project with plenty of hints and tips based on the practical ideas and proven practices of 200 schools that realize or have realized the project in the Czech republic and in UK, DE, PL, SK, HU and RO.

Elearning course:
Localized version of the elearning course Beyond the School - the elearning course contains 11 game-based lessons that guide students involved in the project through each step of the project. This course represents an effective and motivating way of student´s instruction.

Translated and localized version of content management system Beyond the School:
The system is web based and enables students and teachers to run the project online. It works with multimedia. Students upload photos, texts, videos, interviews, even music they record for the purpose of the project, and other information, presentational and education material. The system is user-friendly and highly intuitive to work with.

Project tested and run at 9 VET schools, another projects ready to start.

To support the project testing, evaluation, dissemination and exploitation:
We will run the project at 9 VET schools (3 in Latvia, 3 in Lithuania, 3 in Sweden).

Produkte

1 Beyond the School website

2 BTS Methodology

3 Elearning course Beyond the School

4 Final evaluation summary reports available from 9 schools

Produkt 'Beyond the School website'

Titel:	Beyond the School website
Produkttyp:	Homepage
Marketing Text:	It enables to form teams of students cooperating on one or more projects. The web site enables teachers to manage the project (nominate students, publish / unpublish project etc.). It also serves as a presentation and publicity platform. Currently in contains almost 5.000 photopairs from 7 EU countries. The photopairs are shown in a static or dynamic form (so called “morphing”). The platform is currently available in 7 languages. Students can run their projects in their local language or as bilingual. This helps schools to practice foreign languages, present their results internationally or even run cross-boarder projects.
Beschreibung:	The web site enables students and teachers to run the project online. It works with multimedia. Students upload photos, texts, videos, interviews, even music they record for the purpose of the project, and other information, presentational and education material. The system is user-friendly and highly intuitive to work with.
Zielgruppe:	Students and teachers, visitors of the web site
Resultat:	Project running online on the Beyond the school web site in Latvian, Lithuanian and Swedish
Anwendungsbereich:	For online managing of the project and presentation of to project to visitors of the web site.

Produkt 'Elearning course Beyond the School'

Titel: Elearning course Beyond the School

Produkttyp: Lehrmaterial

Marketing Text: the e-learning course contains 11 game-based lessons that guide students involved in the project through each step of the project. This course represents an effective and motivating way of student´s instruction.

Beschreibung: 1 – Introductory lesson. Why should you care about the cultural landscape and its stories? Introduction to the Beyond the School project and its methods. Examples of particular games in the course. Special memory pairs game with old and new picture.

2 – Introduction to main European architectural movements: gothic, renaissance, baroque, classicism, functionalism, modern and post-modern architecture. Visiting historical towns.

3 – Time line: cars, castles, churches, doors, cupboards, weapons, and paintings. Co-existence of old and modern buildings. Architect's opinion. Game – treasure hunt.

4 – Game - Dress 8 typical people from 19th, 20th and 21st century.

5 – In this chapter students can try to build a model village from the end of 19th century or town from the beginning of 20th century. They can use more than 40 objects to build their own place.

6 – It teaches students how to carry out an interview with a collector. From a phone call they will go to a personal visit and photo scanning. They will practice how to introduce the project and encourage collectors to cooperate. All interview simulations are prepared in an interactive way with series of tasks.

7 – Introduction of digital cameras. Exposure and composition of the picture. Most common mistakes. How to scan correctly? Finding the right angle for taking photo pairs.

8 – How to write a good text about a photo pair? Examples of suitable and unsuitable texts. Puzzle game consisting of photo pairs.

9 – Orienteering – work with a map and a compass outdoors. Finding a place where the historical photo was taken. Finding North. Using a historical photo and a map.

10 – Choosing the best time of day for taking photos, determining trace of the photo trip according to the historical photos.

11 – Recognizing right comments for historical photos. Determining the age of a photograph. Recognizing old occupations. Presentation of the project for the public. End of the course.

Zielgruppe: students, teachers

Resultat: Localized versions of elearning course Beyond the School in Latvia, Lithuania and Sweden

Anwendungsbereich: Each student (and most teachers) shall go through this course as it creates a very positive motivation for the project realization stage.
