Crisis Management System

LLP-LdV-ToI-2008/808

http://www.adam-europe.eu/adam/project/view.htm?prj=4265

Information sur le projet

Titre:	Crisis Management System
Code Projet:	LLP-LdV-ToI-2008/808
Année:	2008
Type de Projet:	Projets de transfert d'innovation
Statut:	Accordé
Pays:	DK-Danemark
Accroche marketing:	Each time an oil spill occurs, it has a significant impact on the maritime environment and on the nearby coastlines. The marine and coastal ecosystems are detrimentally affected, and economic consequences are enormous.
Résumé:	The challenge has been to develop new tools and facilities in the process of improving local and international capability in responding to oil spills in marine environments. This tool was found in the former CMS 2 project result, where an interactive web Home Pages training course was developed. CMS will fully implement and disseminate these former results into a full web Home Page based marine rescue training system including e-learning modules for those who usually participate de facto in responding to incidents of oil spill at sea.
Description:	CMS offers an innovative ICT-based web Home Pages learning system on a high pedagogical level.
Thèmes:	*** Formation ouverte et à distance ** Utilisation et diffusion de résultats ** Développement durable ** Formation tout au long de la vie * TIC
Sectors:	** Activités Spécialisées, Scientifiques Et Techniques ** Autres Activités de Services
Types de Produit:	Site Internet
Information sur le produit:	Involved personals “at home” will find: • Full interactive, modern correspondence and response training on oil spill disasters scenarios. Training work place is own PC placed world wide and corresponding through internet browser. • Fully e-learning modules, where selected training scenarios are disposed on personals own PC world wide. The e-learning modules are fully integrated in the web based rescue training system and offers technical training materials, technical tests, film clips and open Weblogs on training results.
