

CHILDHOOD LINKS (Liens d'enfance) - Method to maintain links between fostered children and their families

2011-1-FR1-LEO05-24432

<http://www.adam-europe.eu/adam/project/view.htm?prj=10156>

Project Information

- Title: CHILDHOOD LINKS (Liens d'enfance) - Method to maintain links between fostered children and their families
- Project Number: 2011-1-FR1-LEO05-24432
- Year: 2011
- Project Type: Transfer of Innovation
- Status: granted
- Country: FR-France
- Marketing Text: Stockholm (2003) : The European Commission declares that fostered children must keep a link with their families. Professional carers need thus methods and tools enabling them to maintain an adjusted link. R. MICHIT (Fr) has developed an adequate method to enable the pedagogical teams both to improve their educative strategies and to better adjust their decision-making process in an objective and non-dogmatic way. This method helps the social workers to keep the right distance to analyze and adapt their decisions and educative. The intervention is individualized and tailor-made. In addition to this, it enables to provide a complete and objective follow-up to the administrative and legal teams. The process is strengthened thanks to a dedicated software TRIADES to draw the actual maps of the relationships during complex educative situations and to assess the integration of the method. CHILDHOOD LINKS aims to transfer the MICHIT method and training.
- Summary: Stockholm (2003) : The European Commission declares that fostered children must keep a link with their families. Professional carers need thus methods and tools enabling them to maintain an adjusted link. R. MICHIT (Fr) has developed an adequate method to enable the pedagogical teams both to improve their educative strategies and to better adjust their decision-making process in an objective and non-dogmatic way. This method helps the social workers to keep the right distance to analyze and adapt their decisions and educative. The intervention is individualized and tailor-made and an objective follow-up during part-time hosting can be shared with the administrative and legal teams. The process is strengthened by a dedicated software TRIADES enabling to draw the actual maps of the relationships during complex educative situations and to assess the integration of the method. The project consortium has been set up in each countries (FR, CZ, SP, IT) with hosting institutions for fostered children, social workers and managers, training centers and universities. Partners will adapt, test and assess the training contents about the MICHIT method. The present results in terms of better motivation of professionals and concrete satisfaction of families enable the consortium to valorize significant effectiveness of the method for the final beneficiaries: children and their families.
- Description: Targeted professionals (social workers mainly) have been involved in each countries (FR, CZ, SP, IT, SK) with hosting institutions for fostered children, educative teams (social workers and managers), training centers and universities. The testing phase has been implemented with social workers and educators, animators, psychologists, trainers and institutions dealing with fostered children and families. Obvious results have been assessed relative to the improvement of professional practices, better link with families, better personal and professional development and supervision tool especially in complex educative situations. They all confirmed that longer training and follow up were requested. This is the guarantee of a deep change in the expertise and attitude of professionals in their educative strategies and actions. Two specific common complex case-studies have been selected in order to test the software dedicated to part-time hosting and to the link with families. Objectives are satisfied : to provide practical and theoretical means but also a better comfort in their daily professional practices to the professionals and thus reduce the risk of burn-out. The present results in terms of better motivation of professionals and concrete satisfaction of families enable the consortium to valorize significant effectiveness of the method. As a holistic approach between social, legal and administrative teams during part-time hosting will provide useful results for the final beneficiaries (children and their families) the legal teams have been involved and have confirmed the interest of the

Project Information

method and conclusions of the project during the final colloque held in Paris on the 20-09-2013.

Themes: *** Lifelong learning
** Vocational guidance
** Equal opportunities
** Continuous training
* Open and distance learning

Sectors: *** Human Health and Social Work Activities

Product Types: program or curricula
open and distance learning
modules
material for open learning
evaluation methods

Product information: The training kit has been set up to begin the testing phase in english and will be finalized in each partner language after the pilots (FR – EN – CZ – SP – IT):

- documentary resources including common terminology (lexique)
- method to implement the MICHIT method (Analyze of decision-making process into 4 steps – tutorial for the software – 2 common case studies)
- a training guide addressing the trainers and describing the required process to teach the method and also recommendations on topics and steps where carefulness is required
- evaluation grids for the assessment of expected competences (both during the transfer process for the referent of the method in each country but also for the testing phase)
- requirements of use for the TRIADES software especially adapted to the mapping of relationships during educative accompaniment of fostered children and their families during part-time hosting (case-studies and self-assessment exercises)

Right after the testing phase (expected in april 2013) the final methodology of the transfer process and specific recommendations about distance training of trainers will be finalized and translated (including the data and results of the testing phase)

Projecthomepage: No specific website. A common web page will be published on the websites of the partners at the end of the testing phase. une commune sera publiée sur les sites des partenaires on the partners websites

Products

- 1 Trainer's guide

Product 'Trainer's guide'

Title: Trainer's guide

Product Type: teaching material

Marketing Text: In order to implement the testing phase relative to the acquirement of CLAIR LOGIS method based on Robert MICHIT method, a set of evaluation has been defined.

Description: Guide to implement the method (4 steps)
Grid for the assessment of the expected competencies
Guide for the evaluation of expected competencies
Competence guide

Target group: Trainees of the testing phase
Referent persons who has been trained by CLAIR LOGIS (transfer level 1), people trained by referents (transfer level 2) and supervisors (Yves MASSON CLAIR LOGIS and Robert MICHIT CEFERH)
Consortium

Result: Training kit
(this training kit will be translated into each partner language after the testing phase as final version)

Area of application: Social work
