Accroche marketing:	The aim of this European Leonardo Da Vinci project is to improve the quality of workplace training in industries in Europe. The i2i project – Internship to Industry was initiated to address the lack of skilled young workers in technical professions within the industrial branch in Europe. European mobility is one possibility to increase the competitiveness of enterprises. Foreign work placements are especially well suited to gain international experience and to improve vocational, linguistic and intercultural competences. At the same time, work placements improve the quality of education and the industrial location.
Résumé:	The aim of this European Leonardo Da Vinci project is to improve the quality of work placements in enterprises within the technical industry branch in Europe. Therefore, within the i2i project useful manuals were developed to secure the whole process of work placement from the preparation to the point of admission of internship. The manuals support schools, companies, exchange organisations, as well as participants.
