Project Information

Title:	Mobility of Young Electrotechnicians in the EU
Project Number:	SK/08/LDV/IVT/01-83210100
Year:	2008
Project Type:	Mobility - initial vocational training IVT
Country:	SK-Slovakia
Status:	running
Individual Participation:	Not possible
Marketing Text:	The aim of this project is to allow our students to work in enterprises and companies where they would be able to obtain new skills and to work with new technologies in the given branch using ICT.
Summary:	The project will be participated by ten students from the second and the third from of our school and two accompanying teachers. These students will be able to attend three weeks specialized training and also will develop their abilities and skills obtained at school. Our school has been specialized in Electrotechnics so that is why this project is aimed to discipline such as Electrotechnics, Automation, Informatics and Telecommunication Technologies. This project allows them to compare the conditions in our country with the countries of other partners in the EU. Young people with good language knowledge, creative, flexible and competent, have better chance of finding a job to their future employees satisfaction. This placement will last three weeks in Netherlands and Poland.
Themes:	*** ICT *** Language training *** Initial training * Intercultural learning
Sectors:	*** Professional, Scientific and Technical Activities *** Information and Communication
