Développement et test d'un système conforme à ECVET dans le domaine de la formation professionnelle

DE/09/LLP-LdV/TOI/147251

http://www.adam-europe.eu/adam/project/view.htm?prj=5191

Information sur le projet

Titre:	Développement et test d'un système conforme à ECVET dans le domaine de la formation professionnelle
Code Projet:	DE/09/LLP-LdV/TOI/147251
Année:	2009
Type de Projet:	Projets de transfert d'innovation
Statut:	Clôturé
Pays:	DE-Allemagne
Accroche marketing:	Ce projet de transfert d'innovation a pour objet le développement complémentaire d'une méthodologie développée dans le cadre du projet eyropéen ECVET pour l'évaluation des compétences à un niveau européen.Cette méthode rendit possible l'évaluation des compétences indépendamment de la façon dont on s'est formé. Elle rendit possible des prestations d'apprentissage tout au long de la vie dans un contexte formel et non formel.
Résumé:	This ITP dealt with a possibility to recognize informal and non-formal learning outcomes. This method was the only one that was currently actually applicable. Other methods or possibilities, such as external examinations at the chambers of commerce, had not achieved acceptance. The reason for this is the great complexity of the examinations and the barriers that result from it. The new system enables people who have gained a high level of competency in a certain profession, which they have not studied for or in which they do not have a degree, to have their learning outcomes recognized and thus being able to actually use them on the labor market.
Description:	M-ECVET-S contained elements of sectoral transfer, geographic transfer, and method transfer. In the M-ECVET-S project, there was a transfer of methods and results from the ESO-CERT project which was entitled "Using the method of standardized competence verification and certification in a credit point system for vocational training – an approach for the integration of the ECVET". This transfer project advanced and enhanced the ECVET-based method for the assessment of professional competencies that has been developed in the EU-project ESO-CERT in order to make this method applicable on a European-wide basis. It was not relevant how the competencies that are assessed have been acquired. This means that learning outcomes from formal, non-formal and informal learning are merged. The enhanced method intended to assess modular training units that should lead to complex action-oriented competencies. Since this kind of assessment also considered competencies that have been acquired at the work-place, it leads to a greater transparency concerning the acceptance of these competencies by the industry. This enhances the employees' company-wide mobility.
Thèmes:	*** Validation, transparence, certification *** Formation continue * Formation tout au long de la vie * Entreprise, TPE, PME
Sectors:	** Activités Spécialisées, Scientifiques Et Techniques * Activités de Services Administratifs et de Soutien * Autres Activités de Services * Enseignement
Types de Produit:	Modules Transparence et certification Site Internet Méthodes d'évaluation
Information sur le produit:	The project has the following results: • Methodology for an ECVET evaluation of modular further training systems in the field of professional further training, considering also informal and non-formal learning outcomes • Action-oriented description of learning outcomes/competencies for a modular

Information sur le projet

further training system for the field of commerce (10 selected commercial modules, each comprising 160 hours of training)
• Methodology/instructions for drafting action-oriented competence descriptions for modular systems in the field of professional further training
• Practical example of awarding credit points for action-oriented competences (field of commerce), considering also formal, informal, and non-formal learning
• Tested and ready-for-use online-based competence assessment process for commercial competencies in companies that can be applied in various areas, such as competence evaluation and awarding of credit points, tests to select the appropriate training measures, aptitude tests, training needs analysis, etc.

Produits

1 Action-oriented description of learning outcomes/competencies

2 Methodology for an ECVET evaluation of modular further training systems

3 Methodology/instructions for drafting action-oriented competence descriptions for modular

4 Practical example of awarding credit points for action-oriented commercial competences

5 online-based competence assessment process for commercial competencies

6 Analysis of the progress of the introduction and implementation of ECVET

Produit 'Action-oriented description of learning outcomes/competencies'

Titre:	Action-oriented description of learning outcomes/competencies
Type de Produit:	Matériel d'apprentissage
Texte marketing:	Action-oriented description of learning outcomes/competencies for a modular further training system(10 selected modules based on 160 hours per each module)
Description:	Based on the EU recommendations on the characterisation of learning outcomes and on the recommendations on the formulation of learning outcomes, the project M-ECVET-S has taken ten commercial modules and has described them in an outcome-oriented way. The 10 modules are: Module 1: Windows, Word, Excel – Basics (a business computing module) Module 2: MS Word, Excel – Advanced (a higher level of business computing module) Module 3: General English for Beginners – Level A1 (an introductory foreign language module) Module4: Business English Basics – Level A2 (an introduction to a foreign business language module) Module 5: Business English Basics – Level B2 (a higher level foreign business language module) Module 6: Economics & Business Studies, General legal requirements – Basics (an introduction economics, business and law module) Module 7: Bookkeeping/Financial Accounting – Basics (an introductory module) Module 8: Bookkeeping – Advanced (a higher level bookkeeping module) Module 9: Payroll Accounting – Basics (an introductory module) Module 10: Payroll Accounting/Construction industry wages (a higher level module)
Cible:	Actors of educational trainings
Résultat:	Action-oriented description of learning outcomes/competencies for a modular further training system(10 selected modules based on 160 hours per each module)
Domaine d'application:	Educational training

Événements

Sixth Meeting in Berlin between 24.10. - 25.10.11

Date	24.10.2011
Description	During the 6th Meeting the partners discussed und finalised the products of the project. Especially: - The methodology for allocating credit points in a modular system in the field of professional further training, considering also informal and non-formal learning outcomes - Action-oriented description of learning outcomes/competencies for a modular further training system for the field of commerce (10 selected commercial modules) - Methodology for drafting outcome-oriented competence descriptions for modular systems in the field of professional further training - Practical example of awarding credit points for action-oriented competences (field of commerce), considering also formal, informal, and non-formal learning - Tested and ready-for-use online-based competence assessment process for commercial competencies in companies that can be applied in various areas, such as competence evaluation and awarding of credit points, tests to select the appropriate training measures, aptitude tests, training needs analysis, etc. - Analysis of the progress of the introduction and implementation of ECVET in Europe in the field of vocational training, analysis of pilot projects that deal with ECVET The test phase of the project was extensively valuated and the results were evaluated by the partners. The state of work to disseminate the project products was analysed and stipulations were made for the final phase of the project work. The partners took note of the final report of the project evaluation.

Fifth Meeting in Stockholm between 24.08. - 26.08.11

Date	24.08.2011
Description	During the 5. Meeting the current status of each work package and the first final outcomes were presented. The status of further due outcomes has been presented by the work package leader and the deadline for the finalisation were scheduled at the end. Work package 6 - execution of the test phase - has been discussed by the partners in detail and a common approach were determined. IBS GmbH assisted the partners step-by-step through the CEMES- platform and relevant modules for the upcoming test phase. Finally, the dissemination plan, previous and upcoming activities has been discussed. The partners presented their intentions to the final conference in the partner countries. The current status of the website www.ecvet-modular.eu was presented and discussed. The consortium decided to organise an additional meeting in Berlin on the 24./25.10.11.

Événements

Fourth meeting in Ancona

Date	05.04.2011
Description	The fourth meeting focused on the discussion about methodologies for describing learning outcomes and on the discussion about credit points. The method for describing learning outcomes, which was developed by IBS GmbH, was discussed among the partners (certain units were used as examples) and it was accepted as a basis for future work. The University of Bedforshire presented a methodology for awarding credit points. The partners discussed how this methodology can be transferred to modular training system. The result was confirmed as a basis for future work. Tinta Education presented a concept for the transfer of results and for the test of the project results in three phases. The details concerning these things were defined for the last project phase. In addition to the practical work with the CEMES platform, the partners also discussed questions of valorisation and evaluation of the project results.

Date et lieu	5th and 6th April 2011 in Ancona

Événements

Third Meeting in Luton

Date	21.09.2010
Description	During the 3rd meeting the first topic of the agenda was the analysis of the evaluation of the situation to the European ECVET- Process. METGEM was in charge and the other partners were involved to collect the results in a brochure. On the base of selected units of the modular training system of IBS were exemplarily defined learning achievements for 10 units. The unit descriptions have an outcome-oriented approach. The descriptions are the basis for the next work-package to evaluate learning outcomes by credit points. The partners discussed the draft of the website "ECVET-modular" and now it is available for using. The consortium discussed and updated the concept of adaptation and development of the competence evaluating platform as well as the structured project evaluation plan and the valorisation plan.

Événements

Second meeting

Date	24.03.2010
Description	The second meeting was especially used for evaluating of the ECVET- status in each project country and the EU in general. The partners presented their analyses and compared the particular status. They agreed to abstract the analyses in a broshure. IBS was in charge of creating training modules and describing learning outcomes using the examples of the modular system of IBS. Their outcomes were agreed as guideline. The project partners gained first experience with using the competence evaluating platform and tested parts of the CEMES evaluation method. The partners discussed the first draft of the marketing concept to dissemination of project outcomes at a later date. The partners discussed the project evaluating concept and deduced practical conclusions for the further project work.

Kick-Off-Meeting in Berlin

Date	03.11.2009
Description	At first the kick-off meeting was an introduction of each project partner. They introduced themselves and their companies as well as their experiences and their projects regarding the European ECVET process. The outcomes of the projects ESO-CERT at the European Final Conference in Vienna and ESO-CRS at the National Final Conference were discussed. The partners got an overview of the web-based competence evaluating platform which was developed on the base of the Helsinki Award honored CEMES- method. The expected outcomes of this project and the work schedule were discussed in detail and confirmed as working basis. The partners agreed on the following meetings.
