Produkt 'Mainstreaming and accreditation of GREeT'

Titel: Mainstreaming and accreditation of GREeT

Produkttyp: Verbreitungsmethoden

Marketing Text: Establishment of the GREeT training course.

Beschreibung: GREET was developed as a preparatory course for trade union education tutors who want to develop their ability to deliver courses online. It may also be of interest to the wider VET community. As the materials are based
in an online environment, there is potential for them to be adapted and localised to suit the individual needs of a particular country where necessary. The TUC have developed a version of this course as part of its tutor training programme offered to trade union VETs. The course was piloted to a representative tutor cohort from the UK and is now established within the TUC's regular tutor training offer (URL to brochure). It is hoped that the ETUI will adopt GREET as the standard course for their own trade union online VETs and encourage its use within confederations and trade unions across Europe.
