

PreMo Newsflash

In this edition:

The launch of the PreMo website

An interview with the project leader

The PreMo guidelines, to prepare yourself in the best way for mobility

The latest activities of the project team.

"It is all about European collaboration to find solutions for common regional challenges in mobility"

You have to open your mind for a new adventure and experience..."

"It is good to look over the borders and to develop yourself in a personal and professional way..."

What happened in PreMo?

Partner meetings & training sessions

In the spirit of the Transfer of Innovation projects, the German, French and Spanish partners have contributed to a training session focusing on their experiences and practices in mobility. The session has taken place on the 28-29 of October in Trieste (IT)

The PreMo project website:

The website of the PreMo project: <http://www.preparingmobility.eu> is launched! All the project outputs will be published on this website. Check out also [testimonials](#) of young people during their study to work and to learn.

The PreMo guidelines

Do you need some support in the organisation, planning and preparation of the mobility?

The "[preparing mobility guidelines](#)" are available now! A "hands-on" tool to help you in preparing mobility.

The PreMo Vortal

PreMo works on the design and architecture of a VORTAL, a "vertical portal" which brings together and links all relevant resources and websites in the field of preparing and managing mobility.

The PreMo model and the tools can be used by mobility coordinators, but however, it should be underlined that tools and a structure might not be enough. It is also important to define a professional mobility operator profile and a training course to make the transfer."

"Face to face" with the project leader: The Autonomous Province of Trento

What was the main reason to initiate this project?

"We see that the ET 2020 strategic framework highlighted the need to support mobility in vocational training. Despite the positive effects of mobility, it seems that the participation rate in mobility is still rather low.

This argues for an approach which focuses especially on one of its most important features: the fulfillment of practical experiences in connection with the enterprise sector. There is a strong need at the local level to guarantee the quality of the traineeship and to help identify local partners and work placement companies."

How can PREMO help in this context?

"Prepara la Mobilità fits in this context perfectly since it aims to adopt and transfer approaches and tools to favour youth mobility in vocational training, especially as regards the preparatory phase of the traineeship."

What is your best experience with mobility?

"Over the last years the European Affairs Division of the Autonomous Province of Trento has promoted

a wide range of mobility projects that were first experimented through the *LifeLong Learning Programme* and later with support from the European Social Fund.

How could other actors benefit from PREMO?

"From an operational point of view, for those who manage incoming and outgoing mobility the model for support for planning and managing mobility can be of high interest. This is one of the concrete outcomes of the project, as well as quality-based tools and approaches.

Besides, local territories can make use of the "cooperation network for mobility" that will become formal at the end of the project in respect of a shared charter of services.

Finally, a vertical portal (the vortal) will be created as an access point not only to the mobility events but also to the tools and methods to prepare and organise them. This opportunity is offered both to operators and territories.

"There is a strong need at the local level to guarantee the quality of the traineeship and to help identify local partners and work placement companies"
