Project Information

Title: WINDAIR: Transfer of Training Modules on the quality of Production (Hygien/Treacibility/sanitary) in Food SMEs in Hungaria and Romania

Project Number: 2008-1-FR-LEO05-01437

Year: 2008

Project Type: Transfer of Innovation

Status: granted

Country: FR-France

Marketing Text: CONTEXT
The food companies are brought to take into account the requirements for Quality/Hygiène of their customers very sensitized by the subject. (Food Crisis, Pack Hygiene). The economic situation of today is such, that the markets exist only if the customer is persuaded of the QUALITY of his supplier. To answer it, the food companies apply the Standards or are certified.
But there is an important disparity between European countries.
The need is really there and only one solution: To know to apply step HACCP everywhere.
The interest of a consortium of the formation type/Foundation SME/Research/ the Chamber of Commerce is to create a tool for formation adapted perfectly thanks to the intervention of very qualified people on all the axes of the project: bases of Quality, techniques of formation for adults, technological projections in food safety and also future users.

Summary: OBJECTIVES
The objective of this project is to create strong European agroalimentary dies by sharing good practices.
Thanks to this project, the tool is now accessible to 7 European countries. This project made work 3 countries together, on the basis of SECUPROD, conceived by the same promoter and coordinator with the assistance of European competences (Belgium, Portugal, Poland, Tchèquie).
This tool, completely adapted to all the small food producers makes it possible to make comprehensible the impact on their level of STANDARDIZATION, of organization, control of the RISKS. Later on, the Small Structures will be competitive, economically viable against large companies. They will ensure the RURAL DEVELOPMENT and in a word, it will be a pride to work in SME.

Description: RESULTS and IMPACT
WINDAIR is a TOOL for training, with the Practice of Step Quality /HACCP in the Small food Companies (Romanian booklets and CD). Its goal: to transmit the METHOD with practical cases through 2 Modules
1. Methodological module: understand a quality system, its interest and its lawful context.
2. Practical module: Essential part of our tool developing 2 examples of application towards a Quality system within wine and cheese-making exploitations
Our project transfered the result from SECUPROD and used in major part of the financial resources to go towards an appropriation of the tool in these countries.
Consequently, the fixed results as objective are to make benefit from demonstrations a great number of targeted people, and also to use the networks and competences of the partners to gear down the diffusions.

Themes: *** Quality
*** Lifelong learning
*** Open and distance learning
*** Enterprise, SME

Sectors: *** Education
*** Agriculture, Forestry and Fishing
** Manufacturing

Product 'Site internet /CD Rom Training on HACCP www.Windair.org'

Title: Site internet /CD Rom Training on HACCP www.Windair.org

Product Type: website

Marketing Text: Windair is a website dealing with the technical implementation of the HACCP in food production companies, and in order to be very useful in the labour situation, two practical cases are studied and explained : Wine and Cheese. Its originality is that this tool had been created with the collaboration of several countries, and competences , like Technical people; reserach personnalities, and teachers. Thus, the tool is unique and with a short explanation of a trainer, you can then use it by your own , when you want, trying to find an answer of the question you need at that time, and so WINDAIR is a friendly tool for affording you to succeed to implement the regulation of the FOOD LAW (Pack Hygiène).

Description: You can access to the web pages free, and then, if you want to get more ionformation, just contact the partner of your country. You have all the mails in the page Partners of the windair.org . We'll be very happy to share the tool with you.

Target group: If you are a food industry manager, or responsible of the manufacturing department, or the quality insurance department, Then, WINDAIR can help you! If you are a trainer of a branch federation, Then, WINDAIR can be a real source of knowledge completed with practical information, you can need personnally or you will be interested to disseminate around your network! You are student in food technology, Food safety, Food manufacturing, then, WINDAIR will complete the Safety courses!

Result: The results WINDAIR are the website, www.windair.org , and the CD Rom, you can get joining the partners of your country. The partners will tell you the different tools created in each country, like Books in Romania, Hungaria, and France!
