TRACK & PreMo conference : Bringing the results together

Final Conference in Trento

The TRACK project is coming to an end this year. However, the collaboration between the mobility operators and the synergies between TRACK and PreMo will remain.

Besides closing the projects and promoting the results, it will be an event in which the continuation of the collaboration between the partners will be celebrated and formalized. A signing session will take place in which the PreMo and TRACK mobility operators will sign the collaboration agreement.

The final conference of the PreMo and TRACK project will take place during the yearly Mobility event in Trento, organized by the Autonomous Province of Trento.

PREPARING MOBILITY! PREPARA LA MOBILITÀ!

On the 13rd and 14th of November, the final conference of both initiatives (PreMo and TRACK) will take place in Trento during the yearly Mobility Event.

The entire events is centered around the promotion of mobility for learners, jobseekers, workers and educational professionals. Participants will be triggered to see mobility as a valuable option to improve their skills and career. People have to become aware that vocational education (with mobility !) is an attractive and relevant way to enter the labour market and/or to improve their career opportunities. Stakeholders from the world of work and education will be brought together to reflect on these topics from their point of view.

Highlights of the conference and workshops will be included in the newsletter of November 2014.

TRACK partners

The PreMo Vortal: Getting in contact with other mobility operators

In the previous newsletter, the PreMo Vortal is introduced as being a common platform, bringing together services in mobility from all over Europe. Both mobility operators as beneficiaries of mobility can use this Vortal for their mobility activities. Especially for mobility operators, this platform offers more than information and tools: it is a “meeting place” to get in contact with each other in order to facilitate and improve own mobility practices. This meeting place is a restricted area within the Vortal for the mobility operators who are member of the PreMo network. It offers an environment for exchange of tools, instruments and experiences. This closed community is also the place where mobility operators can get in contact with other mobility operators for requests for incoming and outgoing mobility.

Enter the PreMo Vortal via the [PreMo website](#).

TBase: Promoting the use of the Europass mobility.

A TBase flyer is available via the TRACK website in [English](#), [Spanish](#) and [Italian](#). The Polish version will be available soon as well.

<http://www.evta.net/track/index.html>

TBase is developed to support mobility operators in the preparation, organization, monitoring and assessment of internships of learners. TBase is an online application to produce, maintain and print training programs, learning agreements and observation checklists. Besides the fact that the tools will be generated in the format of

the Europass Mobility Tools, they will be generated in Word format. This means that it allows the user to edit, adapt and modify the content to their specific contexts and needs. This is an important added value as many countries are dealing with different validation/certification habits in use in the various countries/regions. Try TBase on www.tbases.eu and login with guest/guest to try Tbase for your context!
