Sichere Landwirtschaft für Arbeiter in Landwirtschaft

2008-1-TR1-LEO05-03202

http://www.adam-europe.eu/adam/project/view.htm?prj=5797

Projektinformationen

Titel:	Sichere Landwirtschaft für Arbeiter in Landwirtschaft
Projektnummer:	2008-1-TR1-LEO05-03202
Jahr:	2008
Projekttyp:	Innovationstransfer
Status:	laufend
Land:	TR-Türkei
Marketing Text:	Das Projekt SAFER über Sicherheit in der Landwirtschaft wird die Kenntnisse, Fachkentnisse und Qualifikationen der Zielgruppe verbessern. Die Zielgruppe besteht aus Herstellern landwirtschaftlicher Maschinen und aus Endbenutzern, naemlich Bauern, deren Familien, besonders Frauen und saisonale Landarbeiter. Eine Zusammenarbeit wurde zwischen Organisationen auf nationaler und europaeischer Ebene entwickelt, um dieses Hauptziel zu erreichen.
Zusammenfassung:	Landwirtschaft ist in vielen Staaten eines der am meisten gefaehrdeten Sektoren. n der Regel, legen Sicherheitesangstellte und Experten viel Wert auf zwei Punkte für Sicherheitszwecke. Der erste Punkt ist das zuverlaessige Design von Produkt/Material/Konfektion und das zweite ist sichere Ausbildung/Training. Das Hauptziel des SAFER Projektes ist innovatives Trainingmaterial von erfolgreich abgeschlossenen Projekten zu transferieren, diese an nationale und sektorelle Bedürfnisse anzupassen und für im landwitschaftlichen Sektor Angestellte zwecks sicherer Arbeitsbedingungen innovative Traingsmodule zu entwickeln. Die Zielgruppen des SAFER-Projektes sind in zwei Gruppen aufzuteilen: Hersteller von landwirtschaftlichen Maschinen und die Nutzer, welche selbstaendige Personen, professionelle Landwirte, Angehörige von Bauernfamilien – besonders Frauen – und saisonelle Bauernhofarbeiter sind. Diese Projektmitbeteiligung wird am Anfang die Trainingsbedürfnisse der in diesem Sektor beschaeftigten Personen erarbeiten, zusammenstellen und analysieren. Zweitens, die Projektpartner des SAFER-projektes werden basieredn auf die Ergebnisse der Analysen und auf früheren Erfahrungen Trainingsmodule entwickeln. m letzten Abschnitte werdem Probetrainingaktivitaeten organisiert. Um eine gute Kommunikationstechnologie mittels Computer zu gewaehrleisten wird eine Webseite entwickelt werden und dadurch eine kontinuierliche Ausbildung angeboten. Solche Webseiten sind in entwickelten Laendern sehr oft anzutreffen. Ausserdem, einige visuelle Materialien und Leaflets werden angefertigt werden um Sicherheitstrainingsaktivitaeten zu unterstützen. Um diese Dokumente und Arbeitsmittel anzufertigen, werden frühere Projektergebnisse benutzt werden nachdem sie an regionale Bedürfnisse angepasst werden mittels durcharbeiten von erfahrenen Projektpartnern. Über diesen Weg transferrierte Ergebnisse werden auf Zielgruppen durch Probestudien getestet werden. Ein Workshop wird am Ende des ersten Jahres und eine Konferenz über die Sicherheit in der Landwirtschaft in der Türkei am Ende des SAFER-Projektes veranstaltet werden. Wir erwarten das waehrend und am Ende des SAFER-Projektes der Wissensstand, Bewusstheit und Erkentnisse der Zielgruppen hinsichtlich Sicherheit erhöht werden. Auf diesem Weg wird bezweckt das sicherere Arbeitsbedingungen im landwirtschaftlichen Arbeitsbereich, auf dem Land für Beschaeftigte, erreicht werden. Um die Bedeutung der Zielgruppen im SAFER-Projekt zu erhöhen, Probegebiete werden ausgesucht und ausgewaehlte Bechaeftigte werden ausgebildet werden. Langfristig werden ausgebildete Beschaeftigte ihr Wissen mit alltaeglich landwirtschaftlich Beschaeftigten und anderen Personen die auf dem Land arbeiten teilen/transferieren. Der gleiche Weg wird für Hersteller von landwirtschaftlichen Maschinen benutzt werden. Eine Webseite und TV-Programme werden den Kaskadeeffekt des SAFER-Projektes unterstützen.
Beschreibung:	The main aim of SAFER project is to transfer of innovative training materials from successfully completed projects and adapt them to the national and sectoral requirements and improving innovative training modules for safer working conditions of employees in agricultural sector. Target groups in SAFER project are composed of two main sections: agricultural machinery manufacturers and end users that are self employed people, professional farmers, farmers' family member especially women, seasonal farm workers. Project partnership will initially collect,

Projektinformationen

	compile and analyse the training needs of stakeholders in the sector. Secondly, SAFER project partners will develop training modules and tools according to analysis result and previous experiences. Pilot training activities will organise in last step.

Produkt 'Leaflet, brochures, poster'

Titel: Leaflet, brochures, poster

Produkttyp: Fernlehre

Marketing Text: These leaflets, brochures and posters are one of the outputs of SAFER project. It contains safety training packages. It is an important source of information for people who are interested in safety.

Beschreibung: Access is provided on the project web page http://safer-omu.net. Any interested trainee can use this platform free.

Zielgruppe: 1.Leaflets: SAFER project has formed 77 practical sheets in a loose-leaf file for 16 different machine or working environment, totally 1000 pieces of hard file copies and electronic copies on web site. This training method with practical sheets has been used in FORMAAGRI project, too. The reasons of producing like these training materials are agricultural workers education level, their habits and practical situations in agricultural works. These people are not familiar to internet using in generally. Also, type of work in agriculture is generally in open area. So, we published the training modules on internet and also printed them on special plastic sheets that are not affected by water and sun shine. They are produced also against to be torn for protecting them on agricultural working conditions for a long time. This method is very good opportunity to use them on agricultural sector. They can easily access these practical sheets in working area or with the machine. In these practical sheets, end users, agricultural machinery manufacturers and trainers can find most important and summarized information about the machine or working environment. These training tools can support the safe working in agriculture. These training materials prepared easy to understand and focused on safe using of agricultural machines or working conditions. We pressed 1000 pieces of hard copies of loose-leaf files and electronic copy on web site in Turkish.
2. Brochures: This brochure pressed to take attention of all stakeholders as public and private sectors (ministries, bodies etc), civil unions, agricultural workers, trainers, manufacturers etc that are related to agricultural area. This brochure is covered main idea and the structure of SAFER project and gives information about project web site. We pressed 500 pieces of hard copies and electronic copy on web site in Turkish.
3. Posters: We published 3 kinds of posters to announce the project events in different project step (Opening meeting, workshop and closing conference). In 50x70 cm format, for the opening announcement 300 copies, for the workshop 20 copies, for the closing conference 75 copies posters are printed in Turkish and distribute the related bodies and places. These products helped us also take attention of public to SAFER project and point the project web site.

Resultat: After workshop in Safety in Agriculture, all invited experts and participants found our project results very successful. They advice us to produce more audio-visual materials Because experts believe that this kind of materials are easy to understand and remember for warnings people about working in agriculture. According to these lessons, SAFER project team decided and worked about producing audio-visual materials as possible as can be with the project budget.
Manufacturer and farmers' evaluation and test results show that project practical sheets are satisfied for the improvement the safety level in agriculture.

Anwendungsbereich: Agriculturer manufacturers and users.

Produkt 'TV Programme'

Titel:	TV Programme
Produkttyp:	Fernlehre
Marketing Text:	SAFER project introducing TV programme. Farmers pilot training activities are in this TV programme.
Beschreibung:	TV Programmes contains pilot training activities.
Zielgruppe:	SAFER project has been produced two TV programme with two different channel. First channel is the unique agriculture channel in Turkey and broadcasting to all country: BEREKET (TOPRAK) TV. This channel is very popular in agricultural sector, farmers etc. We made two chapters with this TV producer for introducing our pilot training activities with end users. Also we introduced our project results, project information etc. We made also a contract with this TV channel to broadcast our project results periodically in their channels to the agricultural farmers and sector. Second TV programme made by TRT (TRTGAP-Bu Topran Sesi) is about the introducing the SAFER project in all aspects. TRT is the state channel in Turkey and this programme is very popular in farmers and agricultural sector. Project coordinator and the other 3 partners from Turkey, Spain and Italy participated to this TV programme. Spain and Italy partners participated to this TV programme by live phone connections. These TV programmes are very attractive for target group to introduce and share the project results with them.
Resultat:	Pilot training activities and project results from TV gave us opportunity to use our project outputs on target group and trained them with TV programme.
Anwendungsbereich:	Agriculturer manufacturers and users.

Produkt 'Training modules'

Titel:	Training modules
Produkttyp:	Fernlehre
Marketing Text:	These training modules are contains safety training packages. It is an important source of information for people who are interested in safety.
Beschreibung:	Evaluation of the training modules has been made in Safety in Agriculture workshop with the experts and participants from different bodies, universities and individual persons and reported with workshop minutes in Ankara on 19th of February 2010. You can find the evaluations in workshop minutes.
Zielgruppe:	This book consists of 24 developed training modules for 16 different machine or working environments. These machines or working environments are very important for establishing safety conditions in agriculture. The machineries are very common in all kind of farmers. And also most of them has been manufacturing in Turkey. After developed these training modules SAFER project produced practical sheets and the other audio-visual training tools. This book is the main sources of the all type training materials in SAFER project. We can say that these training modules contain very important point and summarize the safety conditions on agricultural works and very good source for learning and teaching. This book contains can be used also by trainer as a source of theirs lectures about safety issue in agriculture. We pressed 1000 pieces of hard copies, 1000 copies of mini CD format and electronic copy on web site. Partners are using these materials as a project outputs in their workshop and training activities. We are sending this book to all stakeholders for using in same purpose.
Resultat:	After workshop in Safety in Agriculture, all invited experts and participants found our project results very successful. They advice us to produce more audio-visual materials Because experts believe that this kind of materials are easy to understand and remember for warnings people about working in agriculture. According to these lessons, SAFER project team decided and worked about producing audio-visual materials as possible as can be with the project budget.
Anwendungsbereich:	Agriculturer manufacturers and users.
Homepage:	http://safer-omu.net
Produktsprachen:	Türkisch

Produkt 'Web Page'

Titel:	Web Page
Produkttyp:	Fernlehre
Marketing Text:	Web Page is an important source of information for people who are interested in safety.
Beschreibung:	All information and project details are accessable is provided on the project web page http://safer-omu.net.
Zielgruppe:	Special web page designed and broadcasting from beginning of the project duration. In first part of the project broadcasting was made by OMU web infrastructure and address was http://safer.omu.edu.tr. All information, project details, announcements, events, partner information, minutes and all project results exist in this web page to learn much more about SAFER project. This web page is open all users without any password. Target group members, trainers, public and private bodies can reach this information from web site and contact with us after project end. SAFER project also open to all kind of remarks. Project web site address is: http://safer-omu.net.
Resultat:	Manufacturer, farmers and all partners are learning much more about SAFER project in this web page.
Anwendungsbereich:	Agriculturer manufacturers and users.
Homepage:	http://safer-omu.net
Produktsprachen:	Türkisch

Produkt 'Videos and animations'

Titel:	Videos and animations
Produkttyp:	Fernlehre
Marketing Text:	These videos and animations are one of the outputs of SAFER project. It contains safety training for people who are interested in safety.
Beschreibung:	These videos and animations easy to understand and remember to do.
Zielgruppe:	SAFER project produced 6 training videos and 36 animations. Some parts of the videos and animations have transferred from foreign partners and some of them have produced in the scope of project. These training methods and tools are very attractive on target groups. These methods approved by experts that they are easy to understand and remember to do, take attention to the safety issue. SAFER project produced 1000 copies of DVD that are including all videos and animations. You can that in SAFER project web site: http://safer-omu.net
Resultat:	Manufacturer and farmers test results show that project videos and animations are satisfied for the improve the safety level in agriculture.
Anwendungsbereich:	Agriculturer manufacturers and users.
Homepage:	http://safer-omu.net

Closing Conference and Closing Meeting

Datum	08.12.2010
Beschreibung	Safety of Agricultural Machinery Conference is the important dissemination activity for the project.To give information to all related persons and institutions about the SAFER, Share project results with shareholders, to introduce project outputs as dissemination activities using and contents. Second part purpose is the last meeting for the consortium, general evaluations, expectations, results, other collaboration opportunities and administrative and financial issues.
Zielgruppe	Project details, targets and results presented by coordinator and all the attendees to conferences are given information about the SAFER. Aim of the conference, method and expected outputs of the conference are briefed. Project SAFER outputs; training modules, practical sheets, videos and animations are shown. Got feedbacks from participants; thanks and training supports for farmers and manufacturers spoken. Most of them are satisfactory and talking about pleasure. Also a feedback got via questionnaire too. Training module format and dispositions are discussed and introduced all the training tools. The whole day conference has widely participating and very good level dissemination achieved. More than 120 people participated, all the main outputs watched and inspected by them. National wide broadcasting TV channel recorded the conference. Second day was closing meeting for the consortium. Beginnings of the project all the participants told the thoughts, successful and can developing sides of the project are noticed. Financial and administrative issues repeated. Date and contents are given by coordinator for the final reports. Copy right and transfer opportunities discussed. Dissemination activities are held by the all partners. Next steps and next projects are last words.

Workshop at AÜ/Safe Agricultural Machinery

Datum	19.02.2010
Beschreibung	Workshop organization aimed to disseminate the project to the professionals related to safety and to get their opinion about project outputs and targets. Also aimed to share results with stake holders and discuss material and methods. Widely spread the project aims and to get opinions, experiences and good practices.
Zielgruppe	1. Project details and targets presented by coordinator and all the attendees to workshop are given information about the SAFER. Aim of the workshop, method and expected outputs of the workshop are briefed. 2. Training module format and dispositions are discussed and method is determined: wrong and true, color separation, internet restrictions. A participant from PANKOBIRLIK suggested help and explained their studies for the members.

Rome Meeting/Working Group

Datum	27.10.2009
Beschreibung	Evaluation of the SAFER project with the all partners and Advisory Board Meeting. Main target is A first analysis of the questionnaires collected, tuning of the questionnaires according the findings of the FORMAAGRI Project
Zielgruppe	1. Main achievements in the project, 2. Which are the main training needs highlighted by the questionnaires collected by OMU and the other Turkish partners, 3. ENAMA activities on safety issues, the implementation of the European directives in to the Italian laws and regulation, moreover it was debated the safety issues from the farmers point of view (end user) and from the manufacturers point of view (machine design and safety check list), 4. According to the discussion and the questionnaires analysis, the following aspects should be fixed: Which are the user of the training modules (farmer, designer of the agricultural machine), Which are the main issues to be investigated (e.g. road circulation, use of individual protection devices, use of hazardous materials like pesticide), On what kind of agricultural machines or equipment should be based the training (tractors, sprayers, mixer feeder, etc.), 5. The experience of CCOO, Estudios Europeos Declerq and ENAMA in previous training project: having regard to the previous points, which are the modules which can be likely transferred into the SAFER? A presentation of the training modules, 6. first drafting of the training modules and materials, decision on the main aspects of the training modules and materials, 7. action plan for the work package 5 “Development of training modules and tools” and work package 6 “organization of pilot training activities”, 8. final work assignments (individual tasks), Financial and administrative rules implementation, interim report tasks assignment.
