N.E.T.WORK - ECVET system for No borders in tourism' hospitality European Training and WORK

147788-LLP-1-2008-1-IT-ECVET

http://www.adam-europe.eu/adam/project/view.htm?prj=6217

Project Information

Title:	N.E.T.WORK - ECVET system for No borders in tourism' hospitality European Training and WORK
Project Number:	147788-LLP-1-2008-1-IT-ECVET
Year:	2008
Project Type:	Other EU-Projects
Individual Participation:	Not possible
Deadline Participation:	
Status:	completed
Country:	EU-Centralised Projects
Marketing Text:	The N.E.T.WORK project intends to coordinate, redirect and integrate with the ECVET framework those processes, procedures and tools recognised as effectively testable in the partner countries. The partnership will produce: a coordinated reference framework for the development and testing of ECVET; the definition, validation and certification – within existing training paths in the chosen qualifications area (tourist welcoming, specifically, hotel and alternative lodging reception) – of congruent and measurable “modules” (learning outcomes and units), valid for all the partner countries; the congruence of ECVET-related certifications and their recognition within formal systems. The core of the project is, therefore, the design of specific tools for the common definition, delivery, recognition and validation of modular training pathways within the ECVET system. These will be tested to identify strengths and weaknesses in supporting credit transfer and accumulation, as well as mobility.
Summary:	The project “N.E.T.WORK - ECVET system for No borders in tourism' hospitality European Training and WORK”, pursues the following general objectives: to constitute a partnership with a common operational framework for the development and testing of the ECVET system for the accumulation and transfer of credits in education and vocational training, allowing the documentation and certification of learning achievement during training outside the “limits of the system”; to carry out tests within the ECVET system with reference to the specific target of beneficiaries of vocational training pathways and eventual mobility projects, in tourism and hospitality management with particular focus on the reception areas in hotel and alternative lodging structures; to define and implement specific ECVET techniques and produce methodologies, specifications, guidelines and handbook to widen the expected impact of testing; to empower system mainstreaming interventions to contribute to strengthening the results of the general ECVET system in a wider EU context. The innovative expected outcome of the project, stands in the idea of proceeding in an analytical analysis of the different professional profiles agreed by the partnership for the experimentation and in its declination: in Learning Outcomes, in function of their evaluation, validation and recognition during “certification” processes; in Learning Units in terms of the knowledge, skills and competences to be acquired (qualitative dimension); and in the provision and application of credits, both to the L.O. and to units in order to articulate their weight in function of its possible transfer into the various national standards.(quantitative dimension). Therefore the credits would illustrate the proportion that the unit represents in relation to the qualification, facilitating in this way the transfer of learning results and establishing a reference point that is common to the qualification systems. To this ends the partnership will identify and produce specific work procedures both for the actuation of the subsequent testing and for the definition of appropriate tools for the registration of the credit recognised for each learning outcome. The partnership will proceed in parallel to correlate the units for the capitalisation and accumulation of credits with the levels indicated by the EQF.
Description:	The project is oriented specifically toward the application and development of the ECVET system in the area of reception in hotel structures, for which, in all the partner countries, the opportunity appears evident of starting up/consolidating both a functional formalisation of partnerships aimed at translating the orientations and

Project Information

applications already underway into lasting systematic accepted practices, and the coordinated and approved testing of such practices.
The project, therefore, does not intend to propose either new instruments or new procedures in the reference areas of the ECVET system, but on the contrary to coordinate, redirect and integrate within ECVET those processes which, in the current situation of the partner nations, have been recognised from the preliminary phase as effectively testable and which can be attributed to that system.
In relation to this, the project includes a series of work phases which call for a continuous and profound sharing of the methodologies for the analysis and description of training profiles, which will be tested in the national contexts of the partnership, in particular: - Description and selection of the training profiles to be tested; - Sharing and validation of the description methods for the learning outcomes and units; - Description of the training profiles by learning outcomes and units; - Quantification and attribution of credit points; - Definition of Learning Outcomes verification systems; - Constitution of partners' agreements for the implementation of the experimentation; - Fine-tuning the Experimentation Plan; - Experimentation; - Validation and dissemination of the ECVET system guidelines.

Themes: *** Lifelong learning
*** Recognition, transparency, certification
* Continuous training

ECVET Components: Analysing and writing learning outcomes
Units of learning outcomes
Assessment of learning outcomes

Product Types: CD-ROM
others
evaluation methods
transparency and certification
website

Product information: In general terms, the "product" of the project, as previously indicated, will consist in two substantial outputs:
- the stipulation of agreements/conventions aimed at providing validation and continuity on the part of the competent organisations of the partnership to the approved recognition/certification defined through the ECVET methods, and to broaden as much as possible the area of approved applicability;
- the creation and application of common instruments for the definition, actuation, validation and certification of modular training paths, already existing in the partner countries, within the ECVET system (including in these also the processes of support, validation and recognition of LLL & LWL training experiences)with the goal of facilitating mobility in various training phases.
The focus of this operation will be the generalised application to the reference training paths of the methodology of learning by competences, and the consequent process of analytical splitting up of the differentiated aspects of the learning outcomes registered in that path, which makes possible the use of Learning Outcomes as the elements of an approved reassembling into coherent blocks of training results (Units) but also and especially as unitary elements, distinctly recognisable and measurable in a prospective of accentuated flexibility of the Units themselves.
This formulation may allow the creation of a more analytical and therefore more easily shared specification of the ECVET grid,through rendering objective the value of the various Learning Outcomes in "credits" within those which can altogether be assigned to the Unit(s) to which they refer

Product 'PM Tool Kit'

Title:	PM Tool Kit
Product Type:	others
Marketing Text:	Kit of specifications, tools, formats and procedures for the management and coordination of the project
Description:	The tool-kit will comprehend specifications, tools, formats and procedures related to: - Coordination and management formats for the predisposition of periodical cahier de board (4 times) in order to check and control: work plan state of art, project milestones, deadlines, financial resources, partnership management, etc… - Working papers formats for the qualitative and content-related organization of workshop, meetings and events - Excel files for budget control - Internal formats and tools for support activities in the interim and final reporting phases - Discussion panel format Specifically, this toolkit will be produced as file (electronic publication) in the partnership working language (ENG), uploaded in the reserved area of the project web-site (see: deliverable n. 11.1) for internal use. The direct users will be the partners' experts/researchers, managers and administrative staff
Target group:	The direct users will be the partners' experts/researchers, managers and administrative staff
Result:	Materials and specifications
Area of application:	The tool kit will help the Partnership to manage the project in an efficient and effective manner.

Product 'Communication Tool Kit'

Title:	Communication Tool Kit
Product Type:	others
Marketing Text:	Kit of specifications, tools, formats and procedures for the internal and external communications of the project
Description:	The tool kit will comprehend specificatrions, tools, format and procedures related to: - definition of a project logo and a set oif communication plans preparation of deliverables, newsletter, information materials, dissemination/promotion materials - procedures for internal communications - procedures for external communications
Target group:	The direct users will be the partners' experts/researchers, managers and administrative staff, final users of the external communication will be the overall public targets of the project: - EU Stakeholders, - EU Commission - Potential learners, students, - VET institutions and operators, - unions and employers' associations, - labour market operators
Result:	
Area of application:	The tool kit will help the Partnership to manage internal and external communications in an efficient and effective manner.

Product 'Research Tool-kit and guidelines'

Title:	Research Tool-kit and guidelines
Product Type:	others
Marketing Text:	Research tool kit to realise the desk and field researches
Description:	The preliminary “Research tool-kit and guidelines” will be useful in order to define a common-shared set of tools and formats for the conduction of the 2 research steps desk and field, as well as in order to guarantee the homogenization and compatibility of data, information and results collected. The tool-kit will be composed by: - formats for the collection and reporting of desk analysis data and information; - interviews questionnaire - formats for the feedback of the semi-structured interviews - check lists for field observations on-the-job - overall guidelines for the use and drawing up of the research products and results.
Target group:	The direct users will be the partners’ researchers and final users will be tourism and hospitality sector operators and institutions.
Result:	Preliminary Research tool-kit and guidelines
Area of application:	This set of tools will help the Partnership to conduct the desk and field researches regarding the training paths and the certification systems existing in the various national contexts.

Product 'Descriptive charts of the training profiles'

Title:	Descriptive charts of the training profiles
Product Type:	others
Marketing Text:	Descriptive charts of the training profiles existing in the national contexts of the partnership
Description:	The “descriptive charts of the professional profiles” belonging to the reception area of tourism “welcoming” structures, represent a work-tool indispensable for the definition of a “common context” (meaning by this the approval of a common-shared terminology and vocabulary, the definition of roles and tasks with regard to the work processes present in hotel and non-traditional hospitality structures of the partnership countries, as observed and reported during the research phase, etc…) and, at the same time, for the definition of “contact points” of the training profiles examined in order to valorise the differences during the structuring of the experimentation.
Target group:	The direct users will be the partners’ researchers and final users will be tourism and hospitality sector operators and institutions.
Result:	Work-tool containing professional profiles specifications
Area of application:	This output will be a support in the description of the training profiles chosen for the ECVET system experimentation.

Product 'Trans-national comparative matrix'

Title:	Trans-national comparative matrix
Product Type:	others
Marketing Text:	Matrix for comparison in terms of marco-competences
Description:	The “trans-national comparative matrix” will be the output of an analysis process that will be carried out on the results of the 2 research phases. It will provide a guide in the description of training profiles that include all the items described by the various partners with a view to the completeness of the professional profile and to the consequent mobility of these within the partnership territories.
Target group:	The direct users will be the partners’ researchers and final users will be tourism and hospitality sector operators and institutions.
Result:	Research report and discussion document
Area of application:	The matrix will contain a methodology for the comparison of the professional profiles chosen for experimentation in terms of macro-competences.

Product 'Analytical description of the training qualifications to be tested in the experimentation'

Title:	Analytical description of the training qualifications to be tested in the experimentation
Product Type:	others
Marketing Text:	Analytical description of the training profiles in terms of KSG
Description:	The “Analytical description of the training qualifications to be tested in the experimentation” calls for: - an analysis of work activities, required competences, skills and knowledge
Target group:	The direct users will be the partners’ researchers and final users will be: - tourism and hospitality sector operators and institutions; - VET institutions and operators - potential learners/students; - learners/students involved in the experimentation
Result:	Material and strategic specifications
Area of application:	This output will contain a methodology for the description of the macro-competences in terms of KSC.

Product 'Operational guidelines for the construction of learning outcomes and units'

Title:	Operational guidelines for the construction of learning outcomes and units
Product Type:	others
Marketing Text:	Operational guidelines for the definition and description of LO and Units
Description:	The output is a report containing guidelines (procedures, tools, elements, etc) for the construction, identification and approval of learning outcomes and units in function of their evaluation, validation and recognition at certification. These operational guidelines represent a fundamental support for the partners who will conduct the experimentation and, in terms of impact with an increasingly broad public – i.e. for VET operators and institutions - they are meant to serve as an “operational handbook” which gathers the main indicators from the EU Commission in terms of description of the units related to each learning outcome. For this reason the guidelines will include a methodology for the construction of learning outcomes and of the units contained in these outcomes, which will be characterised by: - intelligibility; - coherence; - measurability.
Target group:	The direct users will be the partners’ experts/researchers and final users will be: - tourism and hospitality sector operators and institutions; - VET institutions and operators - potential learners/students; - learners/students involved in the experimentation.
Result:	Prototype of guidelines
Area of application:	The operational guidelines will provide the methodology for the construction of the LO and Units.

Product 'Specifications for the description of selected training profiles'

Title:	Specifications for the description of selected training profiles
Product Type:	others
Marketing Text:	
Description:	The “Specifications for the description of selected training profiles” chosen for the experimentation will contain units described as follows: - generic title of the unit - EQF reference level, which may or may not correspond to that of the qualification - a list of the Learning Outcomes – articulated in KSC- in the form of measurable performance indicators - evaluation criteria - the relative value of the unit in relation to the complete qualification.
Target group:	The direct users will be the partners’ experts/researchers and final users will be: - tourism and hospitality sector operators and institutions; - VET institutions and operators - potential learners/students; - learners/students involved in the experimentation.
Result:	Material and specifications
Area of application:	This output will allow the indicated targets to describe the training profiles using ECVET system describers.

Product 'Descriptive outline of credit points for the analysed qualifications and related units - Guidelines for the verification and evaluation of Learning Outcomes'

Title:	Descriptive outline of credit points for the analysed qualifications and related units - Guidelines for the verification and evaluation of Learning Outcomes
Product Type:	others
Marketing Text:	Descriptive outline of credits points
Description:	Credit points, expressed in number form, are associated with each unit referring to a qualification; these points supply information in relation to the value represented by the unit itself in relation to a qualification. A different number will be assigned to the same unit afferent to profiles chosen for testing according to the Learning outcomes that compose the unit of reference.
Target group:	The direct users will be the partners' experts/researchers and final users will be: - VET institutions and operators - potential learners/students; - learners/students involved in the experimentation.
Result:	Report/specifications
Area of application:	This output will contain a shared proposal for the determination of credit points

Product 'Formal agreements - Experimentation plan - Guidelines for the application of ECVET'

Title:	Formal agreements - Experimentation plan - Guidelines for the application of ECVET
Product Type:	others
Marketing Text:	Formal agreements
Description:	The agreements will be confirmed using the models and instruments made available by the European ECVET system. In the agreements, besides citing the instruments and operational methods constructed by the partnership and described in the guidelines, the details of the testing will also be defined as well as the roles of each partner organisation. Parallel to the agreements among members of the partnership we hypothesise the formulation of agreement protocols extended to other institutional subjects and training agencies of the territories involved.
Target group:	The direct users will be the partners' experts/researchers and final users will be: - VET institutions and operators - potential learners/students.
Result:	protocols of agreements
Area of application:	The application of the agreements can be found in institutional relations with bodies/organisations that have various roles in the training sector

Product 'Experimentation analysis Report: Interim results and impact'

Title:	Experimentation analysis Report: Interim results and impact
Product Type:	others
Marketing Text:	Report of experimentation
Description:	The contents of the Report will be structured as the collection of each partner country's related monitoring report and a synthetic trans-national analysis. The contents will be structured as follows: - Interim results of testing in terms of efficacy and efficiency - SWOT analysis of the system - Hints and suggestions for a fine-tuning of the experimentation, and eventual problem setting and solving - Short term impact (first indications for planning, using Learning outcomes and Units) - Forecast of medium term impact - Suggestions concerning inputs for transferability of the model to other geographic contexts
Target group:	The direct users will be the partners' experts/researchers and VET institutions and operators involved in the experimentation, while final users will be: - learners/students involved in the experimentation.
Result:	monitoring and evaluation analysis report (results and impact)
Area of application:	The report will allow the monitoring "in itinere" of the experimentation process and the application of any necessary corrective measures

Product 'Experimentation results and impact analysis: Final Evaluation Report'

Title:	Experimentation results and impact analysis: Final Evaluation Report
Product Type:	others
Marketing Text:	Result of experimentation
Description:	The contents of the Report can be outlined as follows: - Results of testing in terms of efficacy and efficiency - SWOT analysis of the system - guidelines for the use of the fine-tuned and tested system - Impact and definition of new approaches in the planning and programming of training interventions (indications for planning using Learning outcomes and Units) - Indicators of the transferability of the model to other geographic contexts.
Target group:	The direct users will be the partners' experts/researchers and VET institutions and operators involved in the experimentation, while final users will be: - VET institutions and operators - potential learners/students; - tourism and hospitality sector operators and institutions.
Result:	monitoring and evaluation analysis report (results and impact)
Area of application:	The report will contain a methodology useful for evaluating the results of any future experimentations.

Product 'Vademecum of the ECVET management system'

Title:	Vademecum of the ECVET management system
Product Type:	CD-ROM
Marketing Text:	Vademecum of the ECVET management system
Description:	In the vademecum, besides a detailed description of the procedures and methodological models of the ECVET system tested, the operational instruments of the work will be reported: from the way of constructing training pathways to tools & instruments for the evaluation and certification (and registration) of credits and the models of the network agreements for the mutual recognition of credits. Constant reference will be made in the vademecum to the guidelines and instruments foreseen by the EU Commission under the ECVET system.
Target group:	The direct users will be the partners' experts/researchers and VET institutions and operators, while final users will be: - EU Stakeholders, - EU Commission - Potential learners, students, - VET institutions and operators, - unions and employers' associations, - labour market operators
Result:	handbook
Area of application:	The Vademecum will contain procedures and methodological models that can be used in the application of the ECVET system.

Product 'Project Website'

Title:	Project Website
Product Type:	website
Marketing Text:	
Description:	The project website is meant as a partnership coordination tool, as well as a privileged channel for project dissemination and valorisation activities, filing and storage of all documentation produced within the project development, advertising of events and connections with the EU institutional stakeholders, the Executive Agency and other EU project partnerships involved in similar activities and initiatives.
Target group:	The direct users will be the partners' experts/researchers and VET institutions and operators, while final users will be: - EU Stakeholders, - EU Commission - Potential learners, students, - VET institutions and operators, - unions and employers' associations, - labour market operators
Result:	service website
Area of application:	The site will be an instrument for project valorisation and for the dissemination of its results.
Homepage:	http://www.ecvet-network.eu/
Product Languages:	English Italian

Product 'N. 6 QUARTERLY NEWSLETTER'

Title:	N. 6 QUARTERLY NEWSLETTER
Product Type:	others
Marketing Text:	Valorization through newsletter
Description:	The quarterly newsletters will be meant as the main advertising/promotional dissemination and valorisation tool. 6 issues of the newsletter will be issued, and they will contain project presentation, developments, interim and final results, thematic discussion and focus, interventions of experts, news on events and project milestone, etc.
Target group:	The direct users will be the partners' experts/researchers and VET institutions and operators, and final users will be: - EU Stakeholders, - EU Commission - Potential learners, students, - VET institutions and operators, - unions and employers' associations, - labour market operators
Result:	Newsletter, advertising/promotional product
Area of application:	The Newsletters will permit the valorisation of the project and the divulgation of its results, as well as the spread of the testing processes set in motion by the ECVET projects.

1st Dissemination Thematic Seminar with experts

Date	04.06.2010
Description	The 1 st Dissemination and confrontation seminar was organised by the Slovenian partner. It took place in Ljubljana (Slovenia. It was organised in order to disseminate share and discuss whit local experts: - project interim results, - state of art of tools, methodologies ad devices for the implementation of Ecvet framework - prospects and expectations from experimentations of the Ecvet system.
Target audience	Partecipants were around 30 VET and sector related (tourism and ospitality) local expert and operators.
Public	Event is open to the public
Contact Information	Emanuela Schiaffella e.schiaffella@cstassisi.eu
Time and place	4 June 2010 - Ljubljana

3rd Trans-national Workshop

Date	03.06.2010
Description	The 3rd Trans-national thematic Workshop was organized by the Slovenian partner in June 2010 (3rd and 4th). It took place in Ljubljana (Slovenia) with a duration of 2 working days.
Target audience	Participants, around 15, were mostly partners' staff, researchers and experts.
Public	Event is open to the public
Contact Information	Emanuela Schiaffella e.schiaffella@cstassisi.eu
Time and place	3-4 June 2010 - CPI - National Institute for Vocational Education and Training - Ljubljana, (Slovenia)

Events

2nd Trans-national thematic Workshop

Date	08.02.2010
Description	The 2nd Trans-national thematic Workshop was organized by the Portuguese partner in February 2010 (8th and 9th). It took place in Villa Nova de Gajia - Oporto (Portugal) with a duration of 3 working days. It was organized in order to share and discuss: - comparison among the different specifications issues emerging during the WP, at trans-national level; - validation and agreement on WP outputs and products; - finalization of output and results of the phase; - start-up of the work on quantification and assignment of credit points through the involvement and contribution of experts; - qualitative project development strategies and relative project management issues.
Target audience	Participants, around 25, were mostly partners' staff, researchers and experts.
Public	Event is open to the public
Contact Information	Emanuela Schiaffella e.schiaffella@cstassisi.eu
Time and place	8-9 February 2010 - CONSULTIS – CONSULTORIA EMPRESARIAL, UNIPESSOAL, LDA, Oporto, Portugal
