ACTrain - Accessible web based and interactive video supported skills transfer

502521-LLP-1-2009-1-SI-LEONARDO-LMP

http://www.adam-europe.eu/adam/project/view.htm?prj=6239

Project Information

Title: ACTrain - Accessible web based and interactive video supported skills transfer

Project Number: 502521-LLP-1-2009-1-SI-LEONARDO-LMP

Year: 2009

Project Type: Development of Innovation

Status: granted

Country: EU-Centralised Projects

Marketing Text: There are several reasons, at the European level, why a consortium of experts from Slovenia, Greece, Italy and Austria, with excellent knowledge and experience in the education and training of the Deaf and Hard of Hearing, Blind and Partially-Sighted (4 target groups), have decided to submit this proposal:
• these targeted groups do not have equal access to (ICT-based) education and training, and applications for ICT are often user-unfriendly;
• the existing teaching methods, teaching materials, and approaches are not keeping pace with the technological changes sweeping through our society and ICT often has an insufficient presence in those European education and training systems that need to adapt to these changes (progress report adopted by the European Commission in 2008);
• ICT-based education and training is inaccessible for many European citizens, depending on their socio-economic backgrounds.

Summary: MAINTAINING TRADITION IN CERAMIC DESIGN THROUGH ICT
In order to provide innovative learning through ICT, at the European level, this consortium will develop innovative ICT-based training in ceramic designs for at least 70 Deaf and Hard of Hearing, Blind and Partially Sighted learners. Moreover, this innovation will be accessible to every European citizen. Experts will initiate this innovation over 6 piloted training programmes and design a Project Promotion Campaign, including dissemination of the results, at local, regional, national and European levels through the network of the European Platform for Rehabilitation. This will include all relevant European institutions concerned with educating and training people with special needs, policy makers, and others involved, with the purpose of transferring their findings into the mainstream practice and promotion of anti-discrimination and awareness-raising activities, social inclusion, ICT-based learning for all, EU-policies, and Lifelong Learning Programme.
The long-term objective of this proposal is to establish a firm foundation for the acceptance, formally or informally, of innovative ICT as one of the key ICT tools for the education and training of people with special needs.

Description: This project is meant to improve the learning possibilities, hand skills, knowledge in learning through ICT, employment possibilities, and the exchange of knowledge between partners. In this way people with special needs will be able to participate equally in the world of ICT, if only they want any new learning challenges.

This project is based on the report »The use of ICT to support innovation and lifelong learning for all« adopted by the EC in 2008, clearly stating that ICT is insufficiently present within Europe's education and training systems. It is the long-term objective of this project to establish a foundation for the Application Proteus to become one of the key ICT tools for the education and training of people with special needs.

Themes:
*** Intercultural learning
*** ICT
*** Lifelong learning
*** Social dialog
*** Open and distance learning
*** Access for disadvantaged
*** Equal opportunities
*** Continuous training
* Labor market

Sectors: *** Human Health and Social Work Activities

Project Information

*** Information and Communication
*** Education
*** Arts, Entertainment and Recreation
* Manufacturing

Product '1. Workshop 1: Kick Off Meeting'

Title:	1. Workshop 1: Kick Off Meeting
Product Type:	others
Marketing Text:	
Description:	On 8 – 9 April there was the Kick-Off-Meeting of the project ACTrain, having been selected for co-financing by the Education, Audiovisual and Culture Executive Agency (EACEA) within the framework of the Lifelong Learning Programme – Leonardo da Vinci – Multilateral projects for the development of innovation. The Kick-Off-Meeting was held at the Motel LEŠNIK, Dupleška cesta 49, 2000 Maribor, Slovenia (http://www.gostilna-motel-lesnik.si/gb/index.html). This was also the venue where we organized accommodation for partners from Italy, Greece, and Austria. The objective of the meeting was to: • enable partners, subcontractors and other participants, who would be working on the project to meet each other, • ensure an overview and to plan all the project's activities as well as defining the most optimal strategies for implementations of all workpackages, • establish a Project Management Group in order to ensure monitoring and implementation of single workpackages, • discuss the financial issues and management of the project, and • find the most optimal promotion and dissemination plan.

Marketing Text:

Description: The second partnership meeting was held on the 9th and 10th of November 2010 in Greece, hosted by our HRDC partner. It took place at the Hotel Astir, Agiou Andreou 16, Patras (http://www.hotelastirpatras.gr/patras-hotel/index.html, which was also the accommodation venue for the partners.
The objectives of the meeting were:
• providing an overview of the work done so far, and to plan the consortium's next activities,
• finding out and discussing the more optimal strategies for developing the ICT-based training,
• ensuring an overview when planning all the project's activities, as well as defining the more optimal strategies for implementing all work-packages,
• discussing financial issues and the management of the project,
• discussing possible adaptations for the target groups,
• visiting the School of Sign Language in Patras, 22 Gerokostopoulou Str (http://www.noimatiki.gr). During the visit all the partners had a chance to talk to the school's teachers and view the school's infrastructure and facilities.

Product '6. Curriculum and training content discriptions'

Title:	6. Curriculum and training content discriptions
Product Type:	program or curricula
Marketing Text:	
Description:	Partners have been developing teaching materials for 50 lessons of ICT-based training in ceramic design. Materials will be available in 5 different European langauges: English, German, Slovene, Italian, and Greek. It will include a general overview of all teaching modules, and content of the training. These teaching materials will be a foundation for adaptations of the trainings according to the special needs of the target groups.
Target group:	Curriculum is being adapted to the needs of 4 target groups: blind, partially sighted, deaf and hard of hearing.

Product '7. Adaptations for Accessibility of target groups'

Title: 7. Adaptations for Accessibility of target groups

Product Type: open and distance learning

Marketing Text:

Description: Videos, subtitles, audio descriptions, adapted texts, video with sign language, translations, e-materials, e-handbook and much much more has been developed by the partnership ACTrain in order to provide Learning through ICT for everyone in Europe regardless of their socio-economic background. Adaptations have been developed in a very close cooperation with the target groups and experts with great deal of experience in the field of education and training of people with special needs.
By bearing in mind the specific needs of the target groups and the experience of the experts, the partnership ACTrain has so far agreed on the following adaptations:

1.) for the blind and partially-sighted:
• the blind will be able to download their lessons if they want to read them using their already existing screen readers such as Jaws, Proteus, Amebis, Virgo, Apollo, Zoomtext, Braille Display or Braille Line;
• all lessons will be available as an audio description, which is the best way to provide access to education and training for the blind and partially-sighted;
• the blind will hear what is on the photos or in the videos via the audio discriptions;
• since the innovative, though as yet unavailable Application Proteus, will orally guide the blind and partially-sighted throughout their whole training, they will no longer need any of their already existing screen readers, and will not have to buy any additional and expensive software or hardware. The partnership is developing an all-inclusive and innovative ICT tool for the education and training of people with special needs;
• moreover, the blind and partially-sighted will no longer need any of their existing devices, since the Application will include all the things they need to have access to education and training and

2.) adaptations for the deaf and hard of hearing:
• videos will have subtitles for a better understanding;
• sign-language videos will be made;
• photos, videos, and explanations will be used in order to enable the target group to understand the lessons – different teaching materials that will enable them to understand the lessons better;
• words hard to understand will be explained and described if necessary;
• new signs will be developed in sign-language;
• lessons will be structured according to the clarity principle with very clear beginnings and endings;
• synonyms will not be used, always the actual words;
• where necessary, concrete descriptions will be used for words regarding colours, forms, time, location etc.

Target group: Adaptations are being adapted to the needs of 4 target groups: blind, partially sighted, deaf and hard of hearing.

Product Type:	Film
Marketing Text:	
Description:	5-minute video that will present the innovation developed in the project, as well as the project. The video will be part of the webpage www.see-hear-touch.com which will be disseminated to all relevant institutions within the network. The video will include activities like development of the ICT-based training, promotion activities. The video will be used for promotion purposes and will also include all for promotion interesting activities of the project. For this reason all partners are asked to contribute photos, videos and other materials they think would be interesting for the development of the Video-on-line presentation. All the materials have to be sent to P2 on their server. The P2 should give instructions, if possible, partners should use the same server as for the ICT-based training.

Product '16. E-newsletters'

Title: 16. E-newsletters

Product Type: distribution methods

Marketing Text:

Description: ACTrain partnership has been developing a network of target audiance which is being used also for promotion through e-newsletters on national and European level. Since all interesting news are being published on the web page, the partnership has agreed on distributing e-newsletters not before first concrete development products of ICT-based training are delivered. E-newsletters are prepared in short texts with interesting photos.

Target group: To be able to understand the dissemination strategy and target audiance, it should be explained that the project ACTrain is closely connected to the following fields:
•pottery,
•development of the ICT in education and training of people with sepcial needs,
•education and training in general and for people with special needs,
•creative approaches towards education and training
•as well as art and cultural heritage.

This is the reason for selecting the following target audience:
•policy making institutions (governments, ministries, unions etc.)
•organizations for the re-integration of people with special needs
•institutions for education and training including those with special needs (primary, secondary schools, schools for education of people with special needs etc.)
•organizations and companies developing ICT in the field of education and training
•pottery workshops and organizations in the field of culture and cultural heritage
•organizations, associations, institutes etc. responsible for the re-integration of the deaf and hard of hearing
•organizations, associations, institutes etc. responsible for blind and partially-sighted
•institutions providing programmes that include pottery or working with clay in the form of work therapy or creative workshops, such as psychiatric hospitals, homes for the aged etc.
•European citizens who want to be creative, innovative and learn tradition through ICT, regardless of their socio-economic backgrounds
•different conferences, seminars, events etc.

Product '18. Project Web-page'

Title: 18. Project Web-page

Product Type: website

Marketing Text:

Description: The webpage www.see-hear-touch.com represents a reflection of the project's implementation. It was developed by the new P2 Aeris 3 d.o.o. All partners are responsible for the development of the webpage content and translation of this content into 5 European languages: Slovene, English, German, Italian and Greek. The webpage is also adapted for the target groups and continually chekced by them in order to ensure accessibility of the webpage for people with special needs.
The official language of the project is English. The content of the webpage (articles, news, and all other texts) have to be written in English first and then translated and published by partners. It is a reporting tool of the partnership of what has been done in order to have a constant overview over the achievement of planned results of the project. The webpage includes the following cathegories:
• ABOUT - it is explained what the project is about
• HOME – it contains all the cathegories and is very different since it contains a story about Sarah and Lucas
• ARTICLES – for all activities of the project
• PRODUCTS – Proteus Application with ICT-based training in ceramic design can already be accessed from this category. Although the whole 50 lesson training is not complete yet, the results can be followed here and used gradually
• PARTNERS – each partner has prepared a description of their organization; in this cathegory partners of the project have been presented
• CONTACTS – all partners can be contacted by everyone who may hav any question
• logos of all partners as well as the co-financing programme and the EACEA Agency
• besides the mentioned cathegories all people will also have an access to the innovative ICT-based training specially adapted for the deaf, hard of hearing, blind and partially-sighted that has been developed by the partnership

The purpose of www.see-hear-touch.com:
• promotion of the project
• introduction of several activities for people with special needs
• cooperation of all partners and multinational presence through different activities of partners; the web page is interactive so that all partners have an active role in contributing their part and write articles about different activities
• introduction of the innovative ICT Application and the ICT-based training adapted to the needs of the target groups
• the main communication channel between partners about the progress of the project
• the main source for media releases in a later stage of the project
• all people are invited to play an active role in maintaining tradition through ICT, everyone is invited to write comments, ideas, suggestions etc. and participate in a project in which one of the oldest traditions in the world goes hand in hand with the latest or not yet existing Information and Communication Technology for education and training of people with special needs

What is so special about this ICT-based training?
• it has not yet been developed for these target groups
• it is multilingual
• adaptable to the needs of the user
• a big challenge: 4 different target groups with quite opposite needs – deaf, hard of hearing, blind and partially-sighted
• accessible for all regardless of their socio-economic backgrounds
• all-inclusive-ICT: participants will not have to buy any additional and expensive programmes or any other hardware (navigation is voice-guided – the blind, for example, do not need a screen reader since the Application includes the voice-guidance), the training can be performed on any modern computer with internet

Product '18. Project Web-page'

Description: connection
• it can be used during distance-learning by everyone, and for those people with special needs
• the whole project, as well as the ICT, has been developed in very close cooperation with the target groups of the project
• the Application can be used for any other modules in any other field, not only in ceramic design
• scalable architecture - participants can add or hide different functions, depending on their needs - the Application is designed for everyone, not just the target groups of the project, which is a very important added-value of the ACTrain project; expandable (depending on the needs of participants, functions can be added or ignored)
• the application is optimised for best performance, even on smaller screens

The name of this Application - Proteus - is based on the Olm (Proteus anguinus). It is a blind and a deaf amphibian, endemic to the subterranean waters of those caves within the Dinaric karst regions of Southern Europe. It lives in the waters that flow underground through this extensive limestone region, including the waters of the Soa River basin near Trieste in Italy, through to southern Slovenia, southwestern Croatia, and Herzegovina. The olm is the only species of its genus Proteus, the only European species of the family Proteidae, and the only European exclusively cave dwelling chordate. It is also occasionally called the "human fish" - because of its pink skin and small arms and legs, it also looks rather like a small human (taken from Wikipedia and other websites). The Logo includes elements that indicate eyes and ears because the application is aimed at the deaf and hard of hearing, blind and partially-sighted.
