Eurocord-Ed: On-line Curriculum on Cord Blood Technology

142288-1-LLP-1-2008-1-FR-LEONARDO-LNW

http://www.adam-europe.eu/adam/project/view.htm?prj=6698

Information sur le projet

Titre:	Eurocord-Ed: On-line Curriculum on Cord Blood Technology
Code Projet:	142288-1-LLP-1-2008-1-FR-LEONARDO-LNW
Année:	2008
Type de Projet:	Réseaux
Statut:	Clôturé
Pays:	EU-Projets centralisés
Accroche marketing:	OCORD-ED's mission is to implement a self-sustaining web-based forum delivering professional education and public information on cord blood therapy.
Résumé:	EurocordEd is a comprehensive training tool for the many different vocational actors involved in the field of umbilcal cord blood. Its educational content is available at a time, place and ultimately in a language convenient to the user. The content on EurocordEd is generated and peerreviewed by international experts in the field of cord blood and so the platform is also a reliable resource of information for the general public and for local,regional, national and European policy decision makers.
Description:	Eurocord-Ed is an online curriculum in umbilical cord blood technology and clinical applications incorporating scientific, regulatory and ethical issues using a blended learning approach that combines online education and training as well as live events to provide state-of-the art peer reviewed content on all aspects of cord blood technology. The European School of Haematology, (ESH) provides much of the live content for Eurocord-Ed, which includes an annual World Cord Blood Congress. The 2011 congress will be held in Rome from October 27-29.
Thèmes:	*** Formation tout au long de la vie *** Formation ouverte et à distance *** Orientation professionnelle *** Formation continue ** Enseignement supérieur ** Formation initiale
Sectors:	*** Activités Spécialisées, Scientifiques Et Techniques *** Santé Humaine et Action Sociale *** Enseignement
Types de Produit:	Matériel d'apprentissage Matériel pour l'enseignement Site Internet Programme/curriculum Enseignement à distance
Information sur le produit:	The Eurocord-Ed website is a tool for vocational training and education in the field of umbilical cord blood technology. It contributes to the spread of best practice in European centres through dissemination of information on quality standards, quality control and accreditation procedures such as those developed by NETCORD and JACIE, the two major global accreditation bodies in the field the collection, processing, testing, banking, selection and release of blood products promoting high quality patient care and laboratory performance. The website will assist operators within European Tissue establishments to better understand the meaning of the Tissue and Cells Directives and ensure that their operations at all levels: procurement, processing, preservation, testing, storage and distribution of Tissue and Cells is carried out in compliance with the Directives throughout the community.

Produit 'Eurocord-Ed www.eurocord-ed.org'

Titre:	Eurocord-Ed www.eurocord-ed.org
Type de Produit:	Site Internet
Texte marketing:	The Eurocord-Ed website presents an online curriculum incorporating all aspects of umbilical cord blood technology and clinical applications. It contains pertinent up-to-date information relevent to all actors in the field of UCB including technicians, practicioners, mid wives, and health care decision makers.
Description:	The Eurocord Ed website is divided into several sections and subsections to allow users to easily locate information related to their specific interest in UCB. These sections include webcasts of training seminars and conferences in UCB, ressources on clinical applications, R&D, donation, procurement, processing and preservation, storage and distribution, good lab practice, regulation and quality control. The wesite also contains links to live educational events, cord blood banks, partner organisations news, as well as an expert forum.
Cible:	The website was developed to provide all actors in the field of cord blood technology with readily available scientific peer reviewed content covering all aspects of cord blood.
Résultat:	The website was launched in 2009 and has over 900 registered users.
Domaine d'application:	The Eurocord-Ed online curriculum is intended for scientists, clinicians, nurses, midwives, administrators, health care policy makers, teachers and trainers who have an interest in cord blood technology.
Adresse du site Internet:	http://www.eurocord-ed.org
Langues de produit:	anglais

Produit 'Eurocord-Ed Quarterly Accord'

Titre:	Eurocord-Ed Quarterly Accord
Type de Produit:	Autres
Texte marketing:	Eurocord-Ed publishes a monthly electronic news bulletin to disseminate the project.
Description:	A monthly electronic newsletter with links to the most recently updated informtion on the Eurocord-Ed webisite and to live activities programmed in the field of umbilical cord blood technology and clinical applications
Cible:	The newsletter is sent to the full Euroocord-Ed database which includes technicians, midwives, nurses, healthcare decision makers, administrators, scientists, and clinicians with an interest in cord blood technology.
Résultat:	Each newsletter is sent to the full Eurocord-Ed database which contains over 1000 contacts.
Domaine d'application:	The quarterly accord newsletter is a dissemination tool for Eurocord-Ed. Feedback from the newsletter is used to improve the website and to ensure that it reflects the needs of its users.

Produit 'Webcast of ESH EBMT Training Course 2009'

Titre: Webcast of ESH EBMT Training Course 2009

Type de Produit: Enseignement à distance

Texte marketing: Selected key sessions of the 2009 ESH EBMT training course on blood and marrow were webcasted and uploaed to the www.eurocord-ed.org platform.

Description: The following sessions were webcasted:
1) Keynote Presentation Role of HLA in unrelated donor transplantation - E. Petersdorf (Seattle)

2) Session I: Biology of HSCT
Mesenchymal stem cells - F. Dazzi (London)

3) Hematopoietic stem cells - A. Wodnar-Filipowicz (Basel)

4) The stem cell product - A. Urbano-Ispizua (Sevilla)

5) Regulatory T cells from Cord Blood - A. Madrigal (London)

6) SCT in acute Leukaemia in children - C. Peters (Vienna) ----- [more downloads]

7) Session II: Transplant management and complications

8) Early Complications - E. Carreras (Barcelona)

9) Late effects, health status and quality of life after hemopoietic stem cell transplantation (HSCT) - A. Tichelli (Basel)

Cible: The webcasts are intended for trainers and trainess in the field of cord blood technology.

Résultat: The webcasts were announced to the Eurocord-Ed and partner databases which contain over 20 000 email addresses.

Domaine d'application: Webcasts are considered to be an excellent training tool to compliment live education.

Produit 'Webcast of the ESTM Cord Blood Banking Residential Course 2009'

Titre:	Webcast of the ESTM Cord Blood Banking Residential Course 2009
Type de Produit:	Enseignement à distance
Texte marketing:	Sessions of the 2009 ESTM course on the organisational, technical and clinical aspects of cord blood banking were webcasted and uploaded to the www.eurocord-ed.org platform.
Description:	The ESTM Resdidential course on therganisational, technical and clinical aspects of cord blood banking webcasts cover a thourough introduction to cord blood banking, as well as organisation and standards, quality, equipment and personnel, cord blood donation, Cord blood processing and storage, and cord blood selection and clinical outcom
Cible:	The webcasts are intended for trainers and trainess in the field of cord blood technology.
Résultat:	The webcasts were announced to the Eurocord-Ed and partner databases which contain over 20 000 email addresses.
Domaine d'application:	Webcasts are considered to be an excellent training tool to compliment live education.

Produit 'Webcast of the Adult somatic stem cell conference 2009'

Titre:	Webcast of the Adult somatic stem cell conference 2009
Type de Produit:	Enseignement à distance
Texte marketing:	Webcasts of the Adult somatic stem cells - new perspective conference held in Monaco in November 2009 are freely available to registered users on the www.eurocord-ed.org website.
Description:	Main Topics of the webcasts include Differentiation of Adult Stem Cells, Procurement of Stem Cell iPS, Differentiation of Stem Cells for Clinical Use, and Preclinical and Clinical Studies
Cible:	The webcasts are intended for trainers and trainess in the field of cord blood technology.
Résultat:	The webcasts were announced to the Eurocord-Ed and partner databases which contain over 20 000 email addresses.
Domaine d'application:	Webcasts are considered to be an excellent training tool to compliment live education.

Produit 'Wecast of the ESH Conference of Biology and Clinical Applicaitons of Cord Blood Cells 2008'

Titre:	Wecast of the ESH Conference of Biology and Clinical Applicaitons of Cord Blood Cells 2008
Type de Produit:	Matériel pour l'enseignement
Texte marketing:	Webcasts of the 20th Anniversary of the First Cord Blood Transplant and 10th Anniversary of the Netcord organisation internatioanal conference organised in partnership with ESH - EUROCORD - NETCORD - EBMT - UT MD Anderson Cancer Center - Duke University and covering all aspects of BIOLOGY AND CLINICAL APPLICATIONS OF CORD BLOOD CELLS chaired by Joan Garcia, Eliane Gluckman, Joanne Kurtzberg, and Elizabeth J. Shpall held from October 16-19, 2008 in Mandelieu, France.
Description:	Webcasts include state-of-the-art session on Cord blood transplant: banking, organization, regulatory issues, Stem cells from cord blood, The role of the hematopoietic microenvironment on hematopoietic stem cell function, Immunological properties, Role of HLA in cord blood transplant, Clinical results in adults, Cord blood transplant in children, Graft facilitation-Homing, New protocols for cord blood transplant
Cible:	The webcasts are intended for trainers and trainess in the field of cord blood technology.
Résultat:	The webcasts were announced to the Eurocord-Ed and partner databases which contain over 20 000 email addresses.
Domaine d'application:	Webcasts are considered to be an excellent training tool to compliment live education.

Événements

WORLD CORD BLOOD CONGRESS III CORD BLOOD TRANSPLANTATION AND IMMUNOBIOLOGY OF HAEMATOPOIETIC STEM CELL TRANSPLANT

Date	27.10.2011
Description	The upcoming WORLD CORD BLOOD CONGRESS will cover a wide range of topics including cord blood transplant in adults and children, the role of HLA in cord blood transplant, stem cells, cord blood banking and regulatory issues. A international panel of distinguished scientists and clinicians will participate in this major international forum over three days of interactive conferencing. The scientific programme will comprise a series of plenary presentations and debates. Short oral communications selected from submitted abstracts will enable registered participants to present their own data.
Cible	The WORLD CORD BLOOD CONGRESS is open to all the professional actors working in the fields related to cord blood biology and clinical applications, from both the public and private sectors, including physicians, research scientists, technicians, data analysts and nurses. The congress will also be of interest to healthcare policy decision makers.

Événements

16th Congress of EHA

Date	09.06.2011
Description	The 16th Congres of EHA will present the latest scientific and clinical research in all aspects of hematology, as well as ‘state of the art’ Education Sessions for clinicians and hematologists in training. Oral presentations and poster sessions offer the opportunity for investigators, especially younger investigators, to present their work. The program includes Hematology-in-Focus and Meet-the-Expert sessions, as well as Lunch Debates and the EHA Scientific Working Groups. Two more recent innovations, the Laboratory Hematology Workshop and the Molecular Hemopoiesis Workshop have proved very popular and exciting and will continue at the 16th Congress.
Cible	Registration is open to all academic medical professionals with an active interest in hematology.

Événements

ESH-EBMT Training Course on BLOOD AND MARROW TRANSPLANTATION

Date	09.05.2011
Description	This course provides a comprehensive training in all aspects of autologous and allogeneic stem cell transplantation and comprises a mixture of formal lectures, case presentations by attendees and faculty, meet-the-expert breakfasts and dinner table discussions. For each topic we give an explanation of the basic principles and then develop the subject through to the most recent advances in understanding and management. The faculty are chosen not only for their expertise in their subject but also for their teaching skills and willingness to discuss the field of transplant in both formal and informal settings.
Cible	The course is suitable for physicians at all stages of their career and is particularly useful for those in training, for those who wish to develop their current practice to a more challenging type of transplant and also as an update for established transplanters.
Public	Événement public
Informations de contact	European School of Haematology IUH Centre Hayem Hôpital Saint Louis 1, av Claude Vellefaux 75010 Paris, France email: caroline.lamy@univ-paris-diderot.fr website: www.esh.org
