Qualification européenne pour les spécialistes de la santé au travail et de la prévention des risques professionnels

510362-LLP-1-2010-1-IT-LEONARDO-LMP

http://www.adam-europe.eu/adam/project/view.htm?prj=6842

Information sur le projet

Titre: Qualification européenne pour les spécialistes de la santé au travail et de la prévention des risques professionnels

Code Projet: 510362-LLP-1-2010-1-IT-LEONARDO-LMP

Année: 2010

Type de Projet: Développement d'innovation

Statut: Clôturé

Pays: EU-Projets centralisés

Accroche marketing: Le projet vise à fournir une nouvelle qualification professionnelle et un cadre de la formation basés sur les normes existantes de certification et de l'utilisation des instruments créés au niveau de l'UE, en vue d'acquérir la transparence et la reconnaissance des compétences et de la qualification.
Le projet permettra également aux professionnels de la SST d'accroître leur mobilité entre les États membres en attaquant les obstacles à la transparence et à l'harmonisation des exigences de formation et des qualifications.

Résumé: A common EU legislative framework regarding Occupational Safety and Health (OSH) has been created since 1989, starting with the framework Directive (89/391/EEC) and followed by subsequent Directives. This legislation requires employers to ensure the safety and health of workers and to have competent advice on these problems.
These requirements have been enacted in different forms into the national legislation, causing a lack of transparency and recognition of qualifications for OSH professionals. Some directives have already tackled these barriers to mobility, but the progress in reaching agreement is still slow.
Since the adoption of the Lisbon Strategy, EU member states and the EC have strengthened their political cooperation in education and training. This has been done through the "Education and Training 2010" work programme (2001) and the strategic framework for European cooperation in education and training (2009).
The first objective of this strategic framework, "Making lifelong learning and mobility a reality", is addressed by this project.
Within this contest, the aim of EUSAFE is to develop a new professional qualification and training framework based on the already existing certification standards. The project will make use of the instruments created at EU level (EQF, ECTS, ECVET) and the two voluntary certification standards (EurOSHM and EurOSHT), developed by the European Network of Safety and Health Professional Organisations (ENSHPO).The outcome will be a suitable range of standardized profiles (expected at EQF levels 4, 5 and 6) to cover the different levels of qualifications and roles of OSH professionals.
A network of training centres, professionals and representatives from the education and academy world set up starting from the already existing ENSHPO and ENETOSH networks will have a positive impact in other countries not represented in the project consortium.

Description: The goal of achieving recognition of the competences and qualifications for OSH professionals will be reached through different instruments and outputs.
The project will initially produce comparative country reports on existing OSH training using the 8 levels of the European Qualification Framework (EQF). This will enable the identification of the training needs necessary to be fulfilled in order to achieve harmonisation to the training requirements set in EurOSHM and EurOSHT certification standards and across the different EU countries.
The final outcome will be a new profile for OSH professionals with qualifications in units of learning outcomes based on the European Credit system for Vocational Education and Training (ECVET), and a training framework consisting of educational objectives, teaching plans and examples of teaching materials standardized at EU level.
These instruments will be created with the involvement of the national organizations and institutions who will validate the proposed qualification (ENSHPO has already a good network of contacts with them). This involvement should convince the validating institutions of the necessity to include in their approved schemes training programmes that are harmonised with the training objectives of the EurOSHM and EurOSHT certification standards. The issue of negotiations with governments about

Information sur le projet

incorporating their role of validating the employment of safety professionals coming from one country to work in another will also be addressed.
The network of training centers, professionals from the field of education, the academic world, which will be created based on the existing ENSHPO and ENETOSH networks, will facilitate a positive impact in other countries not represented in the project consortium. These will include the German speaking countries, members of the DACHL organization and Greece, as most of the material will be translated into Greek by CySHA, the Cypriot partner.
The Consortium actually includes associations representing a large number of OSH professionals and experts in the field of Occupational Safety and Health. This insures the direct involvement of SMESs and large companies through their OSH professionals.
Moreover the Consortium includes organisations working in the field of Education and Training that will facilitate the participation of trainers, training centres, researchers and other educational organisations. Finally, other sectors, social partner organisations and companies will be invited to take part at the workshop and at the Final Conference.
The involvement of other organisations will be reached through the following activities:
- the evaluation of the state of the art and of the actual needs
- the evaluation of problems arising from mobility barriers of OSH professionals
- the evaluation of emerging training needs
- discussions in the forums of the Community

Thèmes:
*** Utilisation et diffusion de résultats
*** Formation tout au long de la vie
*** Enseignement supérieur
*** Validation, transparence, certification
*** Formation continue

Information sur le produit:
The project will produce:
- country reports on OSH training
- a new profile for OSH professionals with qualifications in units of Learning outcome (LO)
- a flexible instrument to validate, transfer and recognize learning results, ready to be transferred also in the other EU countries where the consortium members are not active.
- teaching plans
- teaching materials
- a network of training centres, professionals and representatives from the field of education and the academic world

The material supplied by the project will be in English. Participating institutions will

Produit 'Website'

Titre:	Website
Type de Produit:	Site Internet
Texte marketing:	The website has been built in the earlier months of project activities to allow an immediate visibility of the EUSAFE project. The project website has been further used to disseminate the project results achieved and to allow their validation by target groups making use of specific tools for investigation. Now the website is available in five different languages: Italian, English, German, Portuguese and Greek.
Description:	The website is divided into the following sections: - Home: quick information about the project and about the European funding agency - Project: detailed abstract of the project with its background and objectives - Partners: logo and links to Partners' websites - Outcomes: it contains the results deriving from Work Packages which are available for dissemination and validation - Stakeholders: role and types of stakeholders involved - Events: full list of past and forthcoming events - Library: useful documents and publications - Photogallery: pictures of meetings and events - Links: useful links to external websites that are relevant to the project contents and objectives (database, project management, promotion and sustainability, policy, etc.) - Contacts: who and how to contact to ask for further information.
Cible:	All relevant stakeholders, policy makers, professionals, training and educational organisations, other project contractors, the European Institutions.
Résultat:	- Website - Survey questionnaires linked to the results of Work Packages 3 - State of the art evaluation and collaboration with institutions responsible for validation - and Work Package 5 - Development of professional qualification and training framework.
Domaine d'application:	To disseminate and update target groups on the progress of project activities and on the results achieved.

Produit 'A Review of the provision of education and training for OSH professionals within the European Union (WP3)'

Titre: A Review of the provision of education and training for OSH professionals within the European Union (WP3)

Type de Produit:

Texte marketing: The analysis was required to undertake a review of the existing provision of education and training across the member states of the European Union using the EQF as a guideline for allocating estimated academic levels of study.
This project has determined the existing state of education across EU states and highlighted the differences and similarities between the existing systems. Analysis of the results shows that a harmonized approach would be an important step forward in developing a standardized qualification for Safety Practitioners within Europe.
The overall impression is that the EU has a well-developed occupational safety and health education system across most of the member states but that this education needs to be harmonized to ensure that recognition of this education by other countries within the EU is fair and equitable and does not disadvantage practitioners in companies which operate in several member states.

Description: The research activities undertaken to draw up the present report were directed to:
- evaluate the current provision of education across the member states, which would be used in a later part of the project when conclusions relating to a recommendation for a common standard were complete;
- produce a comprehensive review of the information elicited during the research and present it in an easily read format for users of the report and other interested parties;
- collaborate with institutions from across the EU to verify the validity of the information determined;
- analyse the findings of the research against the criteria for the European Safety Manager (EurOSHM) and European Safety Technician (EurOSHT) standards developed by the European Network of Safety and Health Professional Organisations (ENSHPO) and to allocate appropriate EQF levels.
- determine the requirements for health and safety practice in EU member states where specific legislative conditions apply.

Cible: Policy makers (regulators, employers' association, trade union organisation), OSH professionals, training and education providers.

Résultat: - Information related to specific countries
- EurOSHM and EurOSHT standards
- Analysis of OSH Education Provision in the EU
- Analysis of the regulated qualification requirements
- Contact details for responding organisations

Domaine d'application: The current country reports are a valuable tool in expediting the development of a standardized qualification for Safety Practitioners as they do reflect a good position statement of the existing education processes.

Produit 'Development of professional qualification and training framework (WP5)'

Titre: Development of professional qualification and training framework (WP5)

Type de Produit:

Texte marketing: WP5 aims:
- to create and develop a new profile for OSH professionals with qualifications in units of learning outcomes based on the ECVET system. It is foreseen the creation of innovative programs for teaching and vocational training.
- to arrange teaching plans and materials to support learning courses standardized at EU level
- to create flexible instruments to validate, to transfer and to acknowledge learning results
- to develop pilot courses for trainers and evaluators
- to define a proper application of the credit systems to the teaching modes applied: face to face, in service, work based learning, e-learning and virtual environments

Description: The preparation of the WP5 started in the Porto meeting of the partnership in 9 and 10 May 2011. It was agreed that the deliverables would be adjusted to the progress of WP3 and WP4. One of the decisions was to adapt the D5.3 to the identification of existing courses that could satisfy some or all requirements of D5.2. This was due to the fact that it was not possible to create new e-learning materials to satisfy the requirements. The procedures agreed were to define D5.1 as a result of the deliverables of WP4, define the structures of courses of levels 4 to 7 of EQF in OSH according to the Learning Outcomes defined in D5.1 and obtain examples of existing courses in OSH that could comply with D5.2 requirements in terms of Learning Outcomes and of assessment modes. The process is based on the fact that any professional that has a certain level of qualification has acquired all LOs of previous levels.

Cible: OSH professionals
Training providers

Résultat: D5.1. Development of OSH professional qualification
D5.2 - Development of teaching plans and materials
D5.3 Development of pilot courses

Produit 'Creation of a Community (WP6)'

Titre: Creation of a Community (WP6)

Type de Produit: Méthodes d'évaluation

Texte marketing: A community including OSH professionals and OSH training organizations has been created to encourage the mutual information on the available knowledge and exchange of best practices in OSH professional training and certification.
The Community members have been recrited at first though the collaboration with the following organisation ENSHPO (European Network on Safety and Health Professional Organisations) and ENETOSH (European Network Education and Training in Occupational Safety and Health).

Description: The aims of the present project activities were:
- To create within the existing networks, a focus group of training centres and OSH professionals in charge with evaluation, transfer and dissemination of activities regarding the newly created professional qualification and training framework;
- To encourage spreading of the new professional qualification and training framework created across Europe and its use in countries not directly involved in the project;
- To compare and share via forums the learning and training programs for OSH professionals at EU level;
- To underline the advantages in mobility resulting from the use of the newly created professional qualification and training framework, sharing experiences of the early adopters;
- To link existing websites (Enshpo and Enetosh) to the project website thus providing focused information sharing and discussion about the new professional qualification and training framework being developed.

Cible: Project partners and associates from ENSHPO and ENETOSH networks.
Representatives of EU Parliaments involved in OSH aspects, EU-OSHA Agency, EU Commission on Employment and Social Affairs, EU and local Employer associations, EU and local Trade Unions Organizations, Eusafe partners, Enshpo and Enetosh members, stakeholders of Eusafe project and in particularly, at the local level, the focus groups of professionals, local government institutions, regulatory Agencies, qualified OSH training centers. Qualification and certification bodies, insurance public and private companies.

Résultat: - Project web based Platform (Alfresco) for internal management and documents sharing
- Project website
- Informal agreements with the involved organizations in view of transfer and dissemination of Learning Outcomes (LO) regarding Competences (C), Skills (S) and Knowledge (K) of OSH technicians and OSH managers, following the EQF and ECVET matrixes.

Domaine d'application: The tools and methodologies proposed will be adopted by professionals and organisations that will be involved on the phases of activities regarding the evaluation, transfer and dissemination.
Some of the involved organisations are listed here:
ILO (International Labour Office)
ISSA (International Social Security Association)
INSHPO (International Network of Safety and Health Practitioner Organisations)
ICOH (International Commission on Occupational Health)
IEA (international Ergonomics Association)
CFPA-I (Confederation of Fire Protection Associations-International)
NIOSH (National Institute for Occupational Safety and Health)
FOCUS International ISHCCO (International Safety and Health Construction Co-ordinators Organisation)
EU-OSHA (European Agency for Safety and Health at Work)
European Parliament – Specific commissions involved on OSH fields
European Commission DG Employment, Social Affairs Dir. Safety & Hygiene at Work
Business Europe (European Association of Employers)

Produit 'Creation of a Community (WP6)'

Domaine d'application: ETUI (European Trade Unions Institute)

Produit 'Transfer and dissemination (WP7)'

Titre: Transfer and dissemination (WP7)

Type de Produit: Méthodes de distribution

Texte marketing: The report on transfer and dissemination includes the activities carried out and to be carried out with reference to the Valorisation Plan, the project Website, the local Workshops and the Final Conference. The document shows the main tools to use in strengthening the dissemination phase.

Description: The main section of the document addresses the following topics:
- Alfresco tools for internal management and document sharing with stakeholders
- Project website creation
- Dissemination events
- Informative material
- EUSAFE project geographical organization

The following list shows the geographical organization set up for Eusafe project in view of validation, transfer and dissemination of the learning outcomes according to EQF and ECVET criteria regarding professional OSH Technicians and Managers.

1° Geographical area: Northern Europe (Finland, Sweden, Norway, Latvia, Denmark, Lithuania, Estonia)
Coordinator: Paivi Rauramo (COS – Finland)

2° Geographical area: Central-Eastern Europe (Germany, Poland, Austria, Czech Republic, Slovakia, Hungary, Luxemburg, Switzerland, Turkey, Liechtenstein)
Coordinator: Ralph Gierke (VDSI – Germany)

3° Geographical area: Central Europe (UK, Ireland, Belgium, The Netherlands, Iceland)
Coordinator: Hazel Harvey (IOSH – UK)

4° Geographical area: Southern Europe (Italy, France, Spain, Portugal, Slovenia, Malta, San Marino, Monaco, Vatican City State, Andorra)
Coordinator: Giancarlo Bianchi (AIAS – Italy)

5° Geographical area: Eastern Europe (Romania, Bulgaria, Croatia, Macedonia, Montenegro, Albania, Serbia, Ukraine)
Coordinator: Cornelia Bohalteanu (ARSSM – Romania)

6° Geographical area: Cyprus and Greece
Coordinator: Athos Charalambous (CySHA - Cyprus)

7° Geographical area: Russia
Coordinator: Nicolay Novicov (Nacot- Russia)

Cible: Representatives from EU Parliaments involved in OSH issues, EU-OSHA Agency, EU Commission on Employment and Social Affairs, EU and local Employer associations, EU and local Trade Unions Organizations, EUSAFE partners, Enshpo and Enetosh members, stakeholders of EUSAFE project and in particular, at local level, the focus groups of professionals, local government institutions, regulatory Agencies, qualified OSH training centers, qualification and certification bodies, insurance public and private companies.

Produit 'Progress Report - Public Part'

Titre: Progress Report - Public Part

Type de Produit: Autres

Texte marketing: The Public Part of the Progress Report is an official document that has been submitted to the Commission after twelve months of project activities.
The Public Part contains the description of the project's objectives and results, presented against the work plan, how they were achieved, how they will be exploited and how they contribute to EU policies. It is a document intended for general, external communication, including people who are not familiar with the sector your project addresses.
This Interim Report has therefore been written to inform everyone potentially interested in EUSAFE Project (European Qualification for Occupational Safety and Health Professionals) about its specific features and expected outcomes:
- New harmonized standard profile for OSH professionals, described according to EQF and ECVET criteria;
-Training/teaching framework and models associated to new profiles.

Description: The following section defines the layout and content of the Public Part of the report of the EUSAFE project:
- Executive summary
- Tabel of contents
- Project objectives
- Project approach
- Project outcomes and results
- Partnerships
- Plans for the future
- Contribution to EU policies
- Extra heading/section

Cible: - European Commission as funding body
- Organisations throughout Europe interested in the topics covered by the project and its final outputs
- Other project applicants

Résultat: Report on the progress made and on the results achieved during the first period of activity.

Domaine d'application: Widespread public dissemination.

Produit 'EUSAFE Flyer'

Titre: EUSAFE Flyer

Type de Produit: Autres

Texte marketing: Flyers have been produced to have a widespread dissemination of the EUSAFE project. They are characterised by a double face sheet containing the main features of the project. The public reading the contents of flyers will become immediately aware of the aims of EUSAFE as well as of the organisations participating to the project consortium.

Description: The front of the flyer is more graphical while its back is much more descriptive.
The front contains the following information:
- the project title
- the project duration
- names of project coordinator and project manager
- a short abstract of the project
- the project consortium

The back contains the presentation of each Partners included in the project consortium:
- AIAS, Italian Association of Safety, Health and Environmental Professionals
- CYSHA, Cyprus Safety and Health Association
- ENSHPO, European Network of Safety and Health Professional Organisations
- IOSH, Institution of Occupational Safety and Health
- UPORTO, University of Porto
- VDSI, Association of German Safety Engineers

Cible: All relevant stakeholders, policy makers, professionals, training and educational organisations, other project contractors, the European Institutions.

Résultat: Graphical layout and printing of Flyers.

Domaine d'application: Flyers are distributed in conferences and meetings and are also sent to major stakeholders. The widespread dissemination ensured by flyers helps in creating new contact and relations adding value to the adoption of tools and methodologies developed within the project activities.

Produit 'Dissemination Plan'

Titre: Dissemination Plan

Type de Produit: Méthodes de distribution

Texte marketing: The dissemination plan has been set up to fix dates and deadlines connected with the dissemination and validation of the results of Work Package 3 and 5.
The plan shows the involvement of each Partner in the dissemination phase and the process of sharing and sending comments on the documents analysed in this phase as well.
The most relevant part of the dissemination plan is afforded to the activities to be carried out by Geographical Coordinators. Geographical Coordinators will be in fact responsible to strengthen the outcomes validation in different European and non European areas.
The final aim of the plan is therefore to grant a proper dissemination in every countries in view of the final conference foreseen in Milan in autumn 2012.

Description: The structure of the dissemination plan allows the reader to see the key activities related to dissemination as well as the responsible actors involved and a timetable with deadlines and tasks duration.
The plan was set up during the EUSAFE internal meeting in Cyprus (February 2012).
It started to work earlier in march 2012 and will end in autumn 2012.
The contents of the activities foreseen in the plan are linked for the most part to improve the outcomes resulting from Work Package 3 and 5, to build the survey questionnaires to be channelled with the help of the Geographical Coordinators and to identify the Local Focus Points to which the questionnaires should be addressed.

Cible: Partners and Geographical Coordinators.

Résultat: To carry out activities planned without delays and to allow the achievement of the following major outcomes:
- Questionnaires
- Feedbacks consolidation
- Basic material package for local meetings
- Geographical area meetings
- Final conference

Domaine d'application: The dissemination plan is used internally by the organisation involved in the activities planned.

Produit 'Survey Questionnaires'

Titre:	Survey Questionnaires
Type de Produit:	Méthodes d'évaluation
Texte marketing:	The survey has been designed to carry out both the dissemination and the evaluation activities of the following products: State of the art evaluation for existing qualification for OSH Professional (WP3) and Development of Professional qualification and training framework (WP5). Both the dissemination and the evaluation process has been planned with the cooperation of seven Geographical Coordinators, and will be carried out by the final addressees (target group) as identified by Local Focus Points.
Description:	The surveys will take place through the compilation of free-access questionnaires which have been published on www.eusafe.org website. All those concerned will have direct access to the statistics for each single question. Further statistics (e.g. by geographical area or by category), to be agreed with the Work Package Leaders, will be carried out by the project coordinator and put at disposal of the interested parties on a specific page of the EUSAFE website.
Cible:	Professionals Training and Educational Centre Policy Makers: Regulators, Employer Associations and Trade Union Associations
Résultat:	The Work Package Leaders will evaluate the feedbacks and on that basis will formalize the final version of WP3 and WP5, which will be forwarded to the Geographical Coordinators to allow them to organize and carry out the Geographical Area Meetings.
Domaine d'application:	The results will be processed by Work Package Leaders in order to readapt or improve the reports concerning their activities.

Produit 'Identification of methods and instruments for the recognition of the new qualfication (WP4)'

Titre: Identification of methods and instruments for the recognition of the new qualfication (WP4)

Type de Produit: Transparence et certification

Texte marketing: A tool to evaluate the performance requirements and training needs of a Safety Manager and a Safety Technician has been developed within the activities of Work Package 4.
The tool has been based on the existing EurOSHM and EurOSHT (ENSHPO EUROSH (M) and EUROSH (T), 2012) standards.
Appropriate terminology and levelling activities have been carried out so that the tool could be used as the definitive ‘job specification’ for OSH practitioners.

Description: The activities for Work Package 4 started as an academic exercise. A series of performance standards were developed based on the UK National Occupational Standards (NOS) in Health and Safety Practice, these were adapted for the broader European perspective. Performance standards describe what a person needs to be able to do in practice rather than education or training programmes. They are required to give the underpinning knowledge, skills and competence as described by the European Qualification Framework (EQF).
The revised EurOSHM and EurOSHT standards were evaluated as EQF levels 6/7 and 4/5 respectively by the consortium and the performance standards were mapped against these levels.In order to present a cohesive approach to the development of learning outcomes as described by the EQF, it was necessary to place the performance standards in groups. The OHSAS 18001 Safety Management standard model was used to facilitate this.

Cible: VET providers and educational institutions, national authorities for the development of professional standards and qualifications.

Résultat: Matrix with standards of performance

Domaine d'application: The performance standards can be used to identify education and training needs as they indicate the expected outcomes from the learning objectives.

Produit 'Final Report - Public Part'

Titre: Final Report - Public Part

Type de Produit: Autres

Texte marketing: The EUSAFE Project has been inspired and produced by the European Occupational Safety and Health (OSH) profession who recognised the need to harmonise regulated and non regulated standards of practice. The report will be useful to; the Occupational Safety and Health community, educationalists and academics and other industries who are examining the principles and requirements of the EU in developing common professional standards and alignment with the European Qualifications Framework and transferable skills policies.

Description: The EUSAFE Project has been inspired and produced by the European Occupational Safety and Health (OSH) profession who recognised the need to harmonise regulated and non regulated standards of practice. The report will be useful to; the Occupational Safety and Health community, educationalists and academics and other industries who are examining the principles and requirements of the EU in developing common professional standards and alignment with the European Qualifications Framework and transferable skills policies.

Cible: · Professionals working or aspiring to become qualified in OSH
· Employers who need to know what credentials provide a level of assured competence
· Representatives of employees - to ensure that management appointments are capable of providing co-worker safety and health
· Regulating bodies who are responsible for ensuring that EU standards were being correctly interpreted and applied and by employers or their OSH practitioners

Résultat: The result of the project provides a tool to assure the EU community that the OSH profession is delivering harmonisation of the profession standards and, in particular, is applying European education policy through the mechanism of European Qualification Framework. Although there is still work to be done in implementing all of the findings.
