Project Information

Title:	ECVET meets europass mobility
Project Number:	DE/10/LLP-LdV/TOI/147306
Year:	2010
Project Type:	Transfer of Innovation
Status:	granted
Country:	DE-Germany
Marketing Text:	The aim of the project was to use the europass mobility as a documentation instrument for ECVET and to make proposals for the further development of section 5a, which describes skills and competences acquired thanks to europass-mobility activities. It is necessary for the implementation of ECVET in Europe to report the experiences made with mobility actions in a bottom-up process to the EU-level in order to enhance the practicability. The modified europass mobility has been used and tested through negotiation processes in mobility projects (ongoing and separately applied mobility projects) in the hotel and restaurant sector. Target groups: students, VET-experts, Trainers in mobility processes, Trainers in HoReCa sector, Competent bodies for fostering the learning outcome
Summary:	The evaluation study about the utilisation of the europass mobility has shown that the spaces in the document where the acquired skills and competences can be described were rarely used. It is necessary for the implementation of ECVET in Europe to report the experiences made with mobility actions in a bottom-up process to the EU-level in order to enhance the practicability. The modified europass mobility has been used and tested through negotiation processes in mobility projects (ongoing and separately applied mobility projects) in the hotel and restaurant sector.
Description:	The following project steps have been realized: 1.State of Art/Identification of job procedures •Identification of two vocational educations in Germany (e.g. cook, professional waiter/waitress, qualified hotelier) •Identification of common job procedures for respectively e.g. DE-FR, AT, UK, PL, •Adaptation and further development of the matrices of the project „ECVET-tour“ to the requirements of the different countries •Usage of the VET-characteristics of the NA 2.Proposal for the further development of the europass mobility: europass meets ECVET •Proposal for the adaptation of section 5a (while keeping the instrument short), development of guidelines: support for the learning outcome-orientated description in section 5a •Identification of common quality criteria (based on the ten reference indicators of EQUARF) •Ensuring ECVET-compatibility/discussion with competent bodies 3.Reality-Test/Monitoring of the mobility phases •Existing mobility projects have used the developed products (adapted europass mobility and guidelines) for the documentation of learning outcomes •Realisation of expert workshops •Realisation of qualitative interviews with experts (participants of the mobility processes) 4.Adaptation of the products/Deduction of recommendations •Modification of both products based on the results of the reality test

Project Information

•Discussion of the results with „competent bodies“: Are the documentations of the learning outcomes with the europass mobility a reliable basis for the recognition of learning units with ECVET?

5.Project management

6.Quality management

7.Dissemination

Themes: *** Utilization and distribution of results
*** Lifelong learning
*** Recognition, transparency, certification

Product 'Modified matrices for the identification of common job profiles'

Title:	Modified matrices for the identification of common job profiles
Product Type:	procedure for the analysis and prognosis of the vocational training requirement
Marketing Text:	The matrices were used in the mobility projects in order to ease communication between the hosting and the sending partners. Both sides agreed on the learning units to be tested by means of the matrices. Although it requires expert knowledge to develop VQTS matrices it was decided within the consortium to recommend the development of such matrices in preparation for mobility projects in line with the ECVET criteria. The learning outcome approach of the matrices contributes to the transparency of qualifications across European countries.
Description:	The three VQTS matrices for the VET-qualifications cook, professional caterer and hotel- and restaurant-trade commercial assistant are described in learning outcomes and follow a holistic approach. The matrix consists of fields of competence whereas each field has steps of competence development.
Target group:	Teachers and trainers in mobility processes, companies, competent bodies for fostering the learning outcome approach
Result:	1. cook: product from the project ECVET Tour 2. hotel- and restaurant-trade commercial assistant: product from the project ECVET Tour 3. professional caterer: matrix was developed within the ECMO-project
Area of application:	The responsible teachers and trainers can discuss with their equivalent persons in the hosting institutions which learning unit of the matrix will be carried out in a mobility project.

Title:	Final Publication: ECVET meets EUROPASS Mobility. Documenting learning outcomes in mobilities.
Product Type:	others
Marketing Text:	Mobility in the context of Vocational Education and Training and the experiences of the trainees can foster an European labour market. Among the things that would be required in order to make mobilities more attractive for trainees is a transparent procedure of documentation of learning outcomes acquired abroad. There already exist European transparency instruments that aim at achieving this goal, such as ECVET and the EUROPASS Mobility. The goal of the ECMO project has been to improve the documentation of learning outcomes acquired during mobilities. To achieve this goal, ECVET and EUROPASS Mobility have been interconnected. This publication provides an overview of the project goals and results and refers furthermore to different stages of the project.
