E-learning – Innovationstransfer in dem modernen Medizin–Equipment Feld

2010-1-CZ1-LEO05-04338

http://www.adam-europe.eu/adam/project/view.htm?prj=7932

Projektinformationen

Titel: E-learning – Innovationstransfer in dem modernen Medizin–Equipment Feld

Projektnummer: 2010-1-CZ1-LEO05-04338

Jahr: 2010

Projekttyp: Innovationstransfer

Status: abgeschlossen

Land: CZ-Tschechien

Marketing Text: Entwickeln ein effektives Instrument fuers Lernen (e-learning Kurse), das den Teilnehmern die notwendigen aktuellen Kenntnissen aus dem Medizintechnologiefeld zur Verfuegung stellen werden.

Zusammenfassung: The project is a reaction to the insufficient situation regarding vocational education and training in the medical technology branch. Education in the field of medical technology is very specific as it connects expert knowledge from two different branches: medical field and technology. The offer of the education from this field is not only very unsatisfactory but also quite unsystematic and unstandardized. The education in national languages is quite missing in this branch and also the form of the education is insufficient.

Beschreibung: The goal of the project is to create an effective learning tool (e-learning courses) which will provide to the participants the necessary up-to-date knowledge from the field of the medical technology.
The new courses will be based on the results of the English e-learning courses in medical equipment from the previous project. The scale and the content of the courses will be adjusted to the targeted countries and participants (employees of hospitals), including translation into participants mothertongue. The courses will be transfered in the partner countries.

The aim of the project is to develop vocational skills which are in demand on the labour market in the medical technology branch. Analysis showed that the range of the available trainings in the field of medical technology is insufficient and very often not up to date due to the fact, that this sector is experiencing fast development.

Within the project an analysis was undertaken in the partner countries to prove the feasibility of transfer of the e-learning courses to other sector and target group – medical/hospital sector. Based on the results of the analysis the innovative content of the previous 6 courses will be selected to meet the requirements of the target group and 3 new topics will be identified for the new courses. The content of the 9 courses will be adapted to the target group, tested on a pilot group and then transferred to the new target countries (France, Germany and Spain).

Themen:
*** Nutzung und Verbreitung von Ergebnissen
*** Arbeitsmarkt
*** Lebenslanges Lernen
*** Fernlehre
*** Weiterbildung
** Qualität
** Interkulturelles Lernen
** Berufsorientierung und -beratung
** Unternehmen, KMU
* Sozialer Dialog

Sektoren:
*** Erbringung von Freiberuflichen, Wissenschaftlichen und Technischen Dienstleistungen
*** Gesundheits- und Sozialwesen
*** Erziehung und Unterricht
** Erbringung von Sonstigen Dienstleistungen

Produkt Typen:
CD-ROM
Fernlehre
Unterlagen für offenen Unterricht

Produktinformation: The main outcomes of the project will be 9 e-learning courses in the medical

Projektinformationen

technology branch in 5 language versions (German, French, Spanish, Czech and English), in total 45 versions of courses. These courses will create a basis of vocational education in the medical equipment branch for the medical equipment employees as well as for the hospital staff.

Produkte

1 E-learning course: Latera beds with lateral tilt

2 E-learning course: Modern Acute Care

3 E-learning course: Pressure Ulcers Etiology

4 E-learning course: Active Anti-decubitus Mattress Systems

5 E-learning course: Acute Care Beds Effective Utilization

6 E-learning course: Critical Care Beds I

7 E-learning course: Critical Care Beds II - Moving and handling

8 E-learning course: Home Care

9 E-learning course: Safety of patient and nursing staff

Produkt 'E-learning course: Latera beds with lateral tilt'

Titel:	E-learning course: Latera beds with lateral tilt
Produkttyp:	Unterlagen für offenen Unterricht
Marketing Text:	This e-learning course will show you the benefits and applications of lateral tilting in nursing practice. You can choose from 5 language versions (EN, DE, FR, ES, CZ) and learn at any time you need.
Beschreibung:	The result is a vocational education tool focusing on the question of the right and effective use of medical equipment. It is an e-learning course which includes many interactive elements and is closed by a final test. When passing the test the successful participant receives a certificate.
Zielgruppe:	1) employees of medical equipment producers 2) medical/hospital staff
Resultat:	- An e-learning course in 5 language versions. - Increased knowledge of the target groups regarding the use of modern medical equipment. - Indirect – increased effectiveness of work of the target groups.
Anwendungsbereich:	The product is used for the vocational education of medical/hospital staff and the employees of medical equipment producers in various EU countries.

Produkt 'E-learning course: Modern Acute Care'

Titel:	E-learning course: Modern Acute Care
Produkttyp:	Unterlagen für offenen Unterricht
Marketing Text:	During this e-learning course you will be introduced to the properties, functions and ergonomic features of modern acute care beds, which you can apply in your day-to-day practice. These hospital beds will assist you to facilitate demanding caregiving work, increase the patient's safety and can increase the patient's comfort. You can choose from 5 language versions (EN, DE, FR, ES, CZ) and learn at any time you need.

Produkt 'E-learning course: Pressure Ulcers Etiology'

Titel:	E-learning course: Pressure Ulcers Etiology
Produkttyp:	Unterlagen für offenen Unterricht
Marketing Text:	Thanks to this e-learning course you will learn a lot of useful information that will be beneficial for your practice in caring for patients who are at risk of developing pressure ulcers. Together, we are going to have a look at what pressure ulcers are and go over their four stages. If you learn to correctly identify the stage of a pressure ulcer, you will find it easier to provide appropriate treatment to your patients. You can choose from 5 language versions (EN, DE, FR, ES, CZ) and learn at any time you need.

Produkt 'E-learning course: Active Anti-decubitus Mattress Systems'

Titel: E-learning course: Active Anti-decubitus Mattress Systems

Produkttyp: Unterlagen für offenen Unterricht

Marketing Text: During this e-learning course you will be introduced to the passive and active systems that help in the prevention and management of pressure ulcers. Much of the course is focused on active anti-decubitus systems. These are to eliminate pressure on the patient's tissues at pre-set intervals which prevent the occurrence and development of pressure ulcers.
You will be introduced to different types, properties and functions of these systems. This will help you learn to use them effectively in your practice and to find out which is the most appropriate solution for each patient.
You can choose from 5 language versions (EN, DE, FR, ES, CZ) and learn at any time you need.

Produkt 'E-learning course: Critical Care Beds II - Moving and handling'

Titel:	E-learning course: Critical Care Beds II - Moving and handling
Produkttyp:	Unterlagen für offenen Unterricht
Marketing Text:	This e-learning course will help you improve techniques of patient moving and handling. It will teach you how to protect yourself from potential injuries and how to reduce the physical load and reduce the risk of musculoskeletal disorders. The course will among others highlight the potential risks of musculoskeletal disorders and we will show you some simple effective solutions to reduce these risks. You can choose from 5 language versions (EN, DE, FR, ES, CZ) and learn at any time you need

Produkt 'E-learning course: Home Care'

Titel: E-learning course: Home Care

Produkttyp: Unterlagen für offenen Unterricht

Marketing Text: In this course you will learn some useful tips, instructions and recommendations to make your work easier and more pleasant.

We will see how we can help our clients perform routine activities with maximum ease and safety including:
• having meals and watching TV,
• getting out of bed
• or sitting in bed, etc.

We will also describe practical solutions that can provide substantial help with routine care activities when taking care of our immobile clients. We will find out how to reduce physical effort during:
• regular repositioning,
• client hygiene
• or changing bedclothes.
You can choose from 5 language versions (EN, DE, FR, ES, CZ) and learn at any time you need.

Produkt 'E-learning course: Safety of patient and nursing staff'

Titel: E-learning course: Safety of patient and nursing staff

Produkttyp: Unterlagen für offenen Unterricht

Marketing Text: In this e-learning course you will learn about the ways of preventing events and situations that put the safety of our patients and of ourselves at risk. We will have a look at patient injuries and falls which are often directly related to hospital equipment.
You will be introduced to the IEC 60601-2-52 safety standard, abbreviated to IEC 2-52. This norm defines the safety performance of hospital beds. We will have a look at how this norm may help us in our practice.
We will also explore nosocomial infections with regard to patient treatment. You will be shown how these serious infections can be prevented.
You can choose from 5 language versions (EN, DE, FR, ES, CZ) and learn at any time you need.
