CERTIPILOT

518178-LLP-2011-MT-LEONARDO-LMP

http://www.adam-europe.eu/adam/project/view.htm?prj=8267

Project Information

Title:	CERTIPILOT
Project Number:	518178-LLP-2011-MT-LEONARDO-LMP
Year:	2011
Project Type:	Development of Innovation
Status:	completed
Country:	EU-Centralised Projects
Marketing Text:	CERTIPILOT will create a framework for vocational training qualifications of maritime pilots. Thanks to CERTIPILOT for the first time it will be possible to take into consideration formal, informal and non-formal learning. Moreover, the issue of recognition of qualifications is addressed in a holistic manner, i.e. not focussing just on one specific training programme.
Summary:	CERTIPILOT focuses on maritime pilots and the recognition of the qualifications acquired through vocational training. This will be achieved through the cooperation between three pilots' organisations and a training provider and VET expert. The project envisages also the active involvement of European pilots and their organisations through online consultation and exploitation actions. Finally CERTIPILOT will allow the recognition of vocational training undertaken by maritime pilots within the ECVET and EQF.
Description:	Maritime Pilots role in ports is crucial for the delivery of energy and supplies, safety of people and goods as well as protection of the environment as their function consists in berthing and unberthing all types of ships. Their qualifications depend strongly on their experience together with continuous specific training provided by few centres in Europe. The International Maritime Organisation (IMO) is the competent body to fix minimum standards for training and certification for seafarers (STCW Convention) but it does not identify either the types of competences, the levels, nor the desirable criteria. Although there exist common challenges for the maritime professions, pilots have some specific elements, which need to be addressed. Vocational training qualification and certification for the pilotage service does not enjoy a common EU framework nor a National reference framework. This situation does not allow National Certification Authorities to establish a level for vocational training undertaken abroad, nor for qualifications acquired through non-formal and informal training. After an initial step of career development common to Master and officers, pilots' qualifications become more specific to their task but it is not possible to assess the competences and the levels related to their work. CERTIPILOT fills this gap, in particular in relation to the use of technology in VET and environmental protection.
Themes:	*** Lifelong learning *** Recognition, transparency, certification ** Labor market * Ecology
Sectors:	*** Transportation and Storage ** Professional, Scientific and Technical Activities * Other Service Activities
Product Types:	website description of new occupation profiles procedure for the analysis and prognosis of the vocational training requirement transparency and certification
Product information:	The project envisages the production of a manual to allow the certification and recognition of VET qualifications for maritime pilots particularly in relation to safety and environmental protection, through the application of ECVET and EQF to the sector. The project will create a comprehensive framework enabling pilots and National Authorities to assess pilots' qualification levels as well as the levels of training undertaken, both internally and abroad.

Product 'Manual'

Title:	Manual
Product Type:	procedure for the analysis and prognosis of the vocational training requirement
Marketing Text:	The Manual produced will help to assess the training and level rating undergone by Maritime Pilots in relations to Risk Prevention in Port Operations, Environmental Protection
Description:	At the end of the project a manual will be printed. It will be developed as a user-friendly package aimed at facilitating the application of the innovative system for recognition of competences acquired by pilots through formal, non-formal and informal training to other pilots, competent authorities and training providers. It will include information as well as useful tools to facilitate the application of the new model. The information concerned will be validated by the VET technical partner and will have been shared by all partners as well as by third parties in the consultation activities throughout the project. The lead partner will be in charge for collecting the relevant information and contacting the subcontractors for translating, designing, printing and uploading the manual on the project website. Soft copy of the manual will also be downloadable from the partners' websites. The manual will be presented and consolidated by partners during the fifth focus group meeting.
Target group:	Maritime Pilots Organisations; Maritime Training Providers; Maritime Authorities, National Education Authorities
Result:	The Manual is a comprehensive text which will identify the occupational standards required in relation to Risk Prevention in Port Operations, Environmental Protection for Maritime Pilots. Moreover the manual will allow to assess the level rating of vocational training undergone by Maritime PIlots.
Area of application:	Maritime Pilots Vocational Training

Product 'Individual Learning Agreement'

Title:	Individual Learning Agreement
Product Type:	transparency and certification
Marketing Text:	The Individual Learning Agreement is a key tool to facilitate the mutual recognition of qualification acquired.
Description:	The VET technical partner elaborates an Individual Learning Agreement template to be used by pilots, sending organizations and training providers for the recognition of qualifications, transfer, validation and accumulation of credits acquired during formal, non-formal and informal training through ECVET and EQF.
Target group:	Training providers, Maritime Pilots Organisations
Result:	Further application of ECVET
Area of application:

Product 'Memorandum of Understanding'

Title:	Memorandum of Understanding
Product Type:	transparency and certification
Marketing Text:	The MoU is a key document to formalise the cooperation between training providers and industry and guarantee the recognition and validity of the qualifications acquired.
Description:	The VET technical partner elaborates a Memorandum of Understanding template to be used by National Authorities and training providers for the recognition of qualifications, transfer, validation and accumulation of credits acquired during formal, non-formal and informal training required by maritime pilots.
Target group:	Maritime Pilots Organisations, Training providers.
Result:	Further application of ECVET and further mobility of qualifications
Area of application:

Product 'Test on pilots partner competences - Europass'

Title:	Test on pilots partner competences - Europass
Product Type:	transparency and certification
Marketing Text:	The clear indication of the pilots' competences in the Europass CV is crucial to communicate the type and characteristics of the ability that the professionals have.
Description:	Pilots will test the new model developed in WP2 on them. They will apply the procedures and guidelines in order to come to a transparent identification of their qualification levels on the basis of the formal, non-formal and informal training they will have undergone that far.
Target group:	Maritime Pilots Organisation
Result:	Application of new competences to the Europeass CV
Area of application:	
Homepage:	www.certipilot.eu
Product Languages:	English

Product 'Test on existing mapped training'

Title:	Test on existing mapped training
Product Type:	transparency and certification
Marketing Text:	The Learning Outcomes are linked to the actual training available for pilots so as to better plan and understand specific needs and solutions.
Description:	The new model will be tested on the sample training courses selected in M6. Pilots will apply the system in order to come to a transparent and clear identification of the LO, units of LO and qualification levels of the training courses selected.
Target group:	Maritime Pilots' Organisations
Result:	Production of a document linking LOs with training and their characteristics.
Area of application:	
Homepage:	www.certipilot.eu
Product Languages:	English

Product 'Brochure'

Title:	Brochure
Product Type:	others
Marketing Text:	Informative brochure on CERTIPILOT
Description:	The brochures gives a general overview of the project aims and context.
Target group:	Direct beneficiaries and their members, European Pilots, Maritime Stakeholders, Local, National and International institutions, general public.
Result:	Inform about the project
Area of application:	For dissemination purposes

Final Project Report - Public Part

Events

Closing Event CERTIPILOT

Date	12.03.2014
Description	The closing event for the CERTIPILOT project wants to be an opportunity to set the basis for the further sustainability of the project, in particular through the facilitation of the recognition process for the qualification and framework created.
Target audience	National educational authorities, Maritime Pilots Organisations, Maritime Stakeholders and authorities, Training providers
Public	Event is open to the public
Contact Information	certipilot@gmail.com info@certipilot.eu
Time and place	Malta, The Palace Hotel, St. Julian's, 21.03.2014, h.09.00

Launching of CERTIPILOT Manual

Date	10.10.2013
Description	The Manual illustrating the main aspects of CERTIPILOT project is launched during a public event at the European Parliament, Brussels with the aim of further promoting the project content and encourage debate within the main stakeholders.
Target audience	Training providers, Maritime Pilots Organisations, Maritime related stakeholders, Port Authorities, Local, National and European instritutions
Public	Event is open to the public
Contact Information	certipilot@gmail.com info@certipilot.eu
Time and place	Brussels, European Parliament, Spinelli Building Room A5.2; 15.10.13 h.09.00

Consultation Event

Date	23.05.2012
Description	The partners of the CERTIPILOT projects will launch the public consultation on the vocational training framework for Maritime Pilots.
Target audience	Pilots organisations, Port Authorities, Training Centres and all interested parts are invited to this consultation session.
Public	Event is open to the public
Contact Information	certipilot@gmail.com
Time and place	20 July 2012, Malta

Events

Team Meeting

Date	02.04.2012
Description	During the third Certipilot meeting the model draft for pilotage training was consolidated. The planned consultation event was moved from september to july.
Target audience	Staff of CERTIPILOT
Public	Event is open to the public
Contact Information	certipilot@gmail.com
Time and place	19 - 20 Colegio Oficial de Practicos de Puerto, Madrid

Team Meeting

Date	27.01.2012
Description	The Second Meeting of CERTIPILOT will be useful to discuss the main structure of the model that is produced at the end of the project. Pilots organisations will also discuss the state of implementation of the research on Maritime training, International and National Legislation.
Target audience	Project Staff
Public	Closed event
Contact Information	certipilot@gmail.com
Time and place	27-28 Jan 2012 San Miniato (Pisa)

Kick Off Meeting

Date	29.10.2011
Description	The Launching of the project will happen in Malta on the 28-30 October 2011.
Target audience	
Public	Closed event
Contact Information	Daniele Fantechi certipilot@gmail.com
Time and place	Floriana, Malta
