Project Information

Title: ASSISTIVE TECHNOLOGY LEARNING THROUGH A UNIFIED CURRICULUM

Project Number: 518229-LLP-1-2011-1-UK-LEONARDO-LMP

Year: 2011

Project Type: Development of Innovation

Status: completed

Country: EU-Centralised Projects

Marketing Text: This project will address the gap in ICT AT support and counter the lack of skills in terms of ICT competencies by the creation of an AT curriculum that aims at providing ICT AT training to learners interested in gaining or sustaining their employment, where they are equally informed on what AT is available to support them in their daily working activities.

Summary: This project will address the gap in ICT AT support and counter the lack of skills in terms of ICT competencies by the creation of an AT curriculum that aims at providing ICT AT training to learners interested in gaining or sustaining their employment, where they are equally informed on what AT is available (see linkage to EASTIN) to support them in their daily working activities. ATLEC will also create a curriculum that will take onboard the individual needs for PwDs, their employability needs and perspectives and which will be also adjusted to local circumstances. ATLEC will focus on training the learners (PwDs) in specific skills thus qualifying them to become trainers in this and associated AT ones and also creating a new upgraded specific job profile of ICT AT trainer. Learning will be offered in a blended approach: through F2F training, (either individual or in group) as well as via online learning through a fully accessible WCAG2.0 compliant multilingual platform. The AT curriculum will combine existing popular IT trainings in conjunction with specific ICT AT training by interactive methods such as video tutorials. To foster the integration of learning with working life DN will set –up (e)mentoring schemes as part of the learning conducive environments at the workplace, thus providing the learners with work-placed training and apprenticeship pathways as a basis for development of vocational skills relevant to the labour market needs.

Description: Although there are European initiatives such as EASTIN (www.eastin.info), which already gather (partial) ISO structured databases on AT, the actual ICT AT training is lacking, or not meeting the needs of the end-users. Although there are a number of initiatives on AT across the EU such as ATVET (UK), Blind people in Qualification (Austria), IMPACT, Keeping Pace with Assistive Technology (IT), they mainly address training of the trainers and professionals working with PwDs, and not the actual beneficiaries (people with disabilities) which remain largely unaware of the ICT AT that is there for them. ATLEC is to fill this gap and will focus on training the learners in specific skills particularly tailored according to their individual and employability needs, while also creating the job profile of ICT AT trainer.
The innovation of this project lies with the user centred design approach as well as the individual tailoring of the ATLEC curriculum and training materials to the learners' needs, combined with the implementation of mobile learning objects to support the training, as well as applying mentoring as an additional supportive aspect of the ATLEC training services. The focus is on the person with disability (his/her needs and abilities as a learner), as well as the trainer.
Also the pedagogical methodologies will be innovative, using blended learning (F2F, online and mobile), resulting in accessible WCAG2.0 compliant learning/training objects, which are thus exchangeable with other learning initiatives. All ATLEC learning objects, training material and mobile applications will also be offered through the platform the ViPi project (KA3 -ICT, 511792-LLP-1-2010-1-GR-KA3-KA3NW) aims to launch in 2012, and which is coordinated by PhoenixKM.

Themes:
*** ICT
*** Lifelong learning
*** Access for disadvantaged
** Labor market
** Continuous training

Project Information

	* Sustainability
Sectors:	*** Education * Information and Communication
Product Types:	others open and distance learning modules material for open learning DVD CD-ROM website teaching material program or curricula
Product information:	• To create a specific ICT AT curriculum taking into account individual needs/different disabilities; o Customise the curriculum and nationally adapt it (pilots in UK, BE, GR and IT); o Publish the training materials as both traditional paper version, as well as exchangeable learning objects (SCORM compliant learning courses). o Establish a trainer's handbook that will accompany the ICT AT curriculum. • To deploy an online as well as mobile learning platform that will enrich the learning experience; o To support the development of innovative ICT-based content, services (both mobile and online, as well as F2F), pedagogies and practice for lifelong learning easily and freely available; o To provide all training materials and learning objects in a fully accessible manner for all types of disabilities in different formats; o To publish all tools and learning objects for free under a creative commons license, while also providing it through the VIRGIN portal that will be operational in 2012. • To make the working environment more accessible for PwDs by implementing a novel, contemporary and benchmarked learning in ICT AT solutions; o To foster the integration of learning via the ATLEC curriculum, by establishing mentoring schemes and providing workplace training as a basis for the development of vocational skills relevant to the labour market needs; o To increase the employability of People with disabilities at the work place by teaching them new skills for new jobs. • To prepare the necessary steps for qualifying people with disabilities as ICT AT trainers; o To introduce the curriculum to local VET centres, special education and employment centres; o To prepare a job profile of ICT AT trainer.

Product 'Communication strategy'

Title:	Communication strategy
Product Type:	others
Marketing Text:	The communication strategy will be used for internal purposes (internal deliverable), only to arrange communication within and outside partnership. This is crucial for the successful partnership, implementation of the project and the social image and impact of the project.
Description:	The communication strategy will be used for internal purposes (internal deliverable), only to arrange communication within and outside partnership. This is crucial for the successful partnership, implementation of the project and the social image and impact of the project. The methodology for evaluation of the internal deliverable will be the peer review.
Target group:	Public
Result:	Report
Area of application:	In every dissemination activity of the project.
Homepage:	http://www.atlec-project.eu
Product Languages:	English

product files

D.1.1 Communication strategy.pdf

http://www.adam-europe.eu/prj/8301/prd/1/1/D.1.1%20Communication%20strategy.pdf
The communication strategy will be used for internal purposes (internal deliverable), only to arrange communication within and outside partnership. This is crucial for the successful partnership, implementation of the project and the social image and impact of the project. The methodology for evaluation of the internal deliverable will be the peer review.

Product 'IPR agreement'

Title:	IPR agreement
Product Type:	others
Marketing Text:	The IPR agreement is an internal deliverable that will be prepared and signed by all partners at the beginning of the project, thus ensuring that all parties' interest is protected.
Description:	The IPR agreement is an internal deliverable that will be prepared and signed by all partners at the beginning of the project, thus ensuring that all parties' interest is protected. The methodology for the evaluation of the internal deliverable will be the peer review.
Target group:	Confidential, only for members of the consortium (including EACEA and Commission services and project reviewers)
Result:	Agreement
Area of application:	Internally in the project

Product 'Project steering group minutes'

Title:	Project steering group minutes
Product Type:	others
Marketing Text:	As the project steering group is the managing body of this project, all its discussions and decisions taken will be minuted and uploaded to the project collaboration platform. This will ensure equality of partners, a sound recording of procedures as well as good track of decisions made. This will be an internal deliverable.
Description:	As the project steering group is the managing body of this project, all its discussions and decisions taken will be minuted and uploaded to the project collaboration platform. This will ensure equality of partners, a sound recording of procedures as well as good track of decisions made. This will be an internal deliverable. The methodology for evaluation of the internal deliverable will be the peer review.
Target group:	Restricted to other programme participants (including Commission services and project reviewers)
Result:	Report
Area of application:	Internally.

The methodology for evaluation of the internal deliverable will be the peer review.

Product 'National advisory board minutes'

Title:	National advisory board minutes
Product Type:	others
Marketing Text:	At national level, national advisory board will be established, 1 per country. This national advisory board will consist of local project partners, people with disabilities, VET centres representatives, policy makers and other AT ICT stakeholders. Their involvement will ensure that a user centred design approach is applied, while also maximising dissemination and exploitation of results.
Description:	At national level, national advisory board will be established, 1 per country. This national advisory board will consist of local project partners, people with disabilities, VET centres representatives, policy makers and other AT ICT stakeholders. Their involvement will ensure that a user centred design approach is applied, while also maximising dissemination and exploitation of results. This is an internal deliverable and the methodology used for evaluation will be the peer review.

Product 'Consolidated survey findings'

Title:	Consolidated survey findings
Product Type:	others
Marketing Text:	This report will comprise a quantitative and qualitative analysis of the national findings related to ICT AT training, individual needs of learning/teaching it, relevant methodologies and pedagogical approaches etc. In addition a comparative version in English will be produced to describe and compare the national particularities and similarities of the needs. This will be a first public report that will be widely disseminated to stakeholders, in order also to gather additional feedback.

Product 'ATLEC Training courses'

Title:	ATLEC Training courses
Product Type:	teaching material
Marketing Text:	Training courses will be developed on the basis of the ATLEC curriculum and the individual needs of the learners.
Description:	Training courses will be developed on the basis of the ATLEC curriculum and the individual needs of the learners.
Target group:	• Trainers: from AT training centres, employment centres, AT evaluation centres and educators. • Beneficiaries: o People with mobility impairments o People with learning difficulties o People with vision impairments
Result:	Online, mobile and textual training course material.
Area of application:	Training courses will be provided through blended learning: • Individual learning (e.g. by job coaches) • Small groups learning (e.g. in VET centres) • Online (via online ATLEC learning platform) • Mobile (via ATLEC mobile learning application)

Product 'Mobile learning application'

Title:	Mobile learning application
Product Type:	others
Marketing Text:	An Android based mobile application will allow on the spot training of trainers and people with disabilities about usage of ICT AT, specific to the situation they are in, thus providing a customised content provision. This will be directly linked with the information provided by the ATLEC portal and training platform.
Description:	An Android based mobile application will allow on the spot training of trainers and people with disabilities about usage of ICT AT, specific to the situation they are in, thus providing a customised content provision. This will be directly linked with the information provided by the ATLEC portal and training platform. The mobile application will also directly connect to the Android accessibility API (Android 2.0+) to ensure people with different disabilities can all interact with the mobile application, using the supported Android assistive technologies. By using Google's Talkback and other Android screenreaders as well as other accessible and personalised features of the Android Smartphone, we will be able to adjust the educational content accordingly, manifesting a good example of ICT AT, taking in consideration the educational needs and limitations of the user. This ICT application, running on the Android Operating System, will be based on self-learning and informal peer learning. Both of them are important ways of developing e-skills and digital competences.
Target group:	All stakeholders.
Result:	Software (Android based)
Area of application:	Mobile learning

D.5.2 External evaluation reports.rar

http://www.adam-europe.eu/prj/8301/prd/13/1/D.5.2%20External%20evaluation%20reports.rar
This report will be prepared by the external evaluator both at the interim and the final stage. The external evaluator will play the role of a critical friend too and will ensure all planned activities go smoothly on time and with guaranteed quality.
The external evaluator will be expected to present his external evaluation approach during the 2nd partner meeting, and participate in all subsequent partner meetings.

Product 'Dissemination strategy'

Title:	Dissemination strategy
Product Type:	others
Marketing Text:	The dissemination strategy will be elaborated in the 1st month of the project. It will define a rigorous model of dissemination, promotion and mainstreaming of the project's results including identification of key dissemination targets (media, tools, and channels), stakeholders mapping and mainstreaming of final products. The dissemination activities will be targeted at mainly the following groups: people with disabilities , AT trainers , ICT specialists, web developers, VET and special education trainers, educational managers, etc.
Description:	The dissemination strategy will be elaborated in the 1st month of the project.
