# CHAPTER 1 THESEIS Virtual Community Platform

THESEIS internal Virtual Community Platform (VCP) is an online tool for the partners' internal communication, data store for documents, for reporting purposes, etc. The VCP platform for the THESEIS project is available at http://theseis.euproject.org.

Using a single secure login all THESEIS members have access to all their specific contents, groups, and services worldwide with a web browser. Each service plays a vital role in delivering the value of online communities as well as communicating, sharing, and publishing many different types of information. Advanced services (engines) are available on VCP that cater for different needs: file & link libraries, project office and management, learning service development, competency framework, contact databases etc. New tools and features are added continually to the platform.

The VET training model will be based on the collaborative instructional strategy and will use all the necessary learning services, made available from the THESEIS Virtual Community Platform (VCP) for the preparation of the training courses.

Start Project Questionnaires

**Project THESEIS**

THESEIS aims at developing, testing and disseminating an innovative training model in the field of occupational Health and Safety of workers in the pollution management sector of eco-industry. THESEIS seeks:
i) to determine the competences, skills, knowledge and attitudes that the particular workforce needs to acquire and
ii) to address these using innovative pedagogical approaches and practices based on collaboration instructional strategy and interactive on-line design tools.
