Entwicklung der europäischen beruflichen Bildung & Bewertungsmaßstäbe für registrierte Unabhängige LOLER Inspektoren am Arbeitsplatz (LOLER)

UK/11/LLP-LdV/TOI-445

http://www.adam-europe.eu/adam/project/view.htm?prj=8398

Projektinformation

Titel: Entwicklung der europäischen beruflichen Bildung & Bewertungsmaßstäbe für registrierte Unabhängige LOLER Inspektoren am Arbeitsplatz (LOLER)

Projektnummer: UK/11/LLP-LdV/TOI-445

Jahr: 2011

Projekttyp: Innovationstransfer

Status: bewilligt

Land: UK-Vereinigtes Königreich

Marketing Text: Gründliche Prüfung von Hebezeugen ist gesetzlich vorgeschrieben und entscheidende Methode der Verhütung von Unfällen und Todesfällen am Arbeitsplatz (Lifting Operations & Lifting Equipment Regulations 1998-LOLER).

Zusammenfassung: Reduction of accidents working at heights is currently the number one priority of the UK HSE. The 2009 statistics for the UK alone show over 4000 major injuries were caused by falls from height at work (source: http://www.hse.gov.uk/falls/). Many of these accidents occur due to equipment failure which could have been preventable if equipment had been thoroughly examined prior to use (European Priority 1). This equipment includes ropes, harnesses, connection devices, mobile platforms, ladders etc. This is supported through examination of new inspection techniques using appropriate technologies.

Beschreibung: Aims & Objectives of the completed LOLER project:
• People using safety equipment for lifting operations or working at heights undertake appropriate daily inspections & comply with European law
• New techniques and test work equipment suitable for LOLER inspections has been established - for example Robb/Nevrkla Rope Test
• European LOLER training and assessment standard (comply with ECVET) has been developed
• Operator and inspector competence can be certified at the European level under umbrella ABA INTERNATIONAL http://www.aba-skills.com/
• Number of LOLER inspectors were competently trained and examined in testing lifting equipment
• Register of European LOLER inspectors with a system for updating & CPD has been developed
• Successful quality consortium, knowledge collaboration & added value certification

Themen:
*** Arbeitsmarkt
*** Qualität
*** Nachhaltigkeit
*** Anerkennung, Transparenz, Zertifizierung
*** Weiterbildung
* Nutzung und Verbreitung von Ergebnissen
* Interkulturelles Lernen
* Lebenslanges Lernen
* Hochschulbildung
* Berufsorientierung und -beratung
* Chancengleichheit
* Erstausbildung

Sektoren:
*** Baugewerbe/Bau
*** Erziehung und Unterricht
*** Land- und Forstwirtschaft, Fischerei
** Verkehr und Lagerei
** Erbringung von Freiberuflichen, Wissenschaftlichen und Technischen Dienstleistungen
* Bergbau und Gewinnung von Steinen und Erden
* Erbringung von Sonstigen Dienstleistungen

Produkt Typen: Transparenz und Zertifizierung
Lehrmaterial
Unterlagen für offenen Unterricht
Verfahren zur Analyse und Prognose des Berufsbildungsbedarfes

Produkt 'Project Management Plan'

Titel:	Project Management Plan
Produkttyp:	andere
Marketing Text:	Management Plan - the key of the achievements good results
Beschreibung:	Management Plan contains project brief and project partners key roles, work packages and anticipated project results, schedule and communication management, financial management, quality management, dissemination and exploitation aims. Part of the appendix supporting the Management plan is the Organisational chart and Gannt chart. Progress/status reports, Interim reports and monitoring calls also support the plan.
Zielgruppe:	Project partners and technical and project evaluators.
Resultat:	Project Management Plan
Anwendungsbereich:	Project

Produkt 'Research & Needs Analysis'

Titel:	Research & Needs Analysis
Produkttyp:	Verfahren zur Analyse und Prognose des Berufsbildungsbedarfes
Marketing Text:	cross-analysis of exisiting VET methods both inside and outside of the partnership relating to work at height inspection training and assessment methods
Beschreibung:	WP2 (A) Analysis of accident statistics and associated trends relevant to work at height. Compilation of falls in arboriculture data across European member countries. Consideration of equipment & anchor point failures in relation to arboriculture (due to being identified during preliminary research). Review of wider rope access industries in regard to equipment failure. WP2 (B) Review and comparison (mapping exercise) of training and assessment methodology across partner countries in relation to arboricultural access equipment checking, inspection and examination. Current UK Thorough Examination of Arboricultural Climbing and Rigging Equipment was used as the template for comparison.
Zielgruppe:	Arborists Rockclimbers Builders - work at height Fireworkers Rope access Instructors Mountaineers Aerial rescue services Lifting & rigging inspection services Entertainment/theatre sector
Resultat:	-Analysis of accident statistics -Review and comparison of training and assessment methodology

WP2- Standards Mapping Report

Produkt 'LOLER standards & test methods'

Titel:	LOLER standards & test methods
Produkttyp:	Lehrmaterial
Marketing Text:	LOLER standards & test methods
Beschreibung:	Preparation / adaptation and transfer of competence standards into practice. Set the agenda and design a methodology to conduct the training and testing. Undertake mock examinations and evaluate the results. Evaluate and refine the standard for use by trainers and assessors. Produce and review the report of draft LOLER standards that work in practice and ensure industry consultation takes place.
Zielgruppe:	Arborists Rockclimbers Builders - work at height Fireworkers Rope access Instructors Mountaineers Aerial rescue services Lifting & rigging inspection services Entertainment/theatre sector
Resultat:	Rope test device
Anwendungsbereich:	The same as target group
Homepage:	www.loler.co
Produktsprachen:	Englisch

Produkt 'LOLER examination and verification procedures'

Titel:	LOLER examination and verification procedures
Produkttyp:	Evaluierungsmethoden
Marketing Text:	This Standard has been observed by the existing UK national Awarding Body – City and Guilds and their representatives were very impressed with assessment procedures, Quality Assurance and underpinning criteria.
Beschreibung:	Production of LEVEL 1 and LEVEL 2 Standards, assessment criteria, assessment procedure, record of achievement forms were all produced in assistance with Project team. Live testing was carried out a number of times, ending in the qualifying of three indivduals, to a good, accepted standard. Live testing was carried out in Czech Republic during the final meeting. Four candidates passed the assessment and one failed. All assessment results forms, and standard equipment lists have also been developed with feedback to creat a valuable and useable standard.
Zielgruppe:	Arborists Rockclimbers Builders - work at height Fireworkers Rope access Instructors Mountaineers Aerial rescue services Lifting & rigging inspection services Entertainment/theatre sector
Resultat:	LEVEL 1 and LEVEL 2 Standards
Anwendungsbereich:	The same as target group

Produktsprachen:	Englisch

Produkt 'LOLER Certification & Website inclusion'

Titel:	LOLER Certification & Website inclusion
Produkttyp:	Transparenz und Zertifizierung
Marketing Text:	Establish a database/website, an audited LOLER certification system and supporting organisation & framework.
Beschreibung:	The LOLER certification system that we have successfully developed consists of Operator and independent inspector Standards, assessment criterian, proceures for assessment and result recording documentation. The certification system relies on the underpinning standard and provides every training centre/National awarding body with a flexible framework on which to implement the system. Every centre will be recognised throughout Europe by the Awarding Body Association (ABA International), a Not for Profit organisation.
Zielgruppe:	Arborists Rockclimbers Builders - work at height Fireworkers Rope access Instructors Mountaineers Aerial rescue services Lifting & rigging inspection services Entertainment/theatre sector
Resultat:	Database/website, an audited LOLER certification system and supporting organisation & framework ABA International http://www.aba-skills.com/.
Anwendungsbereich:	The same as target group

Produkt 'Dissemination & Exploitation Plan'

Titel:	Dissemination & Exploitation Plan
Produkttyp:	Verbreitungsmethoden
Marketing Text:	The dissemination and exploitation plan of the LOLER Project has been of crucial importance to achieve successful results.
Beschreibung:	The dissemination and exploitation plan is a clear and concise guide that indicates those activities that are going to be carried out during the LOLER project. The plan has been drafted at the very beginning of a project and contains activities to be carried out continuously until the project's end and afterwards.
Zielgruppe:	Arborists Rockclimbers Builders - work at height Fireworkers Rope access Instructors Mountaineers Aerial rescue services Lifting & rigging inspection services Entertainment/theatre sector

LOLER PROJECT TECHNICAL STANDARDS & MANAGEMENT MEETING in Dublin

Datum	12.06.2013
Beschreibung	Following on from the successful pilot tests undertaken recently in Italy on the new forthcoming ABA endorsed qualification, the next meeting had been held in Ireland. With the support of Kong and other industry leaders in the rope access & climbing sectors and the Leonardo Lifelong Learning Programme, the next stage took place in Dublin in June 2013. The 1st International training event for lifting equipment operators and inspectors aimed specifically at arborists/tree climbers was hosted within the beautiful city of Dublin during June 12th-14th. Alongside inspector training & examination a novel new scientific tool for non-destructive testing of climbing ropes was undergo further testing.
